

### Route to College Undergoes Repairs

Route 22 from Lewistown to Mifflintown, through the Lewistown Narrows, is being rebuilt into a three lane system with two of concrete and one of macadam in the center. Another section on the west side of Seven Mountains from Mifflin

County line to Potter's Mills is being rebuilt of reinforced concrete. Traffic routes are being kept open during construction on both of these highways. When completed, there will be an almost continuous concrete highway to Harrisburg. Only about a mile of macadam will remain; this is between Reedsville and Lewistown.
