

Artists' Film Tickets Go on Sale Monday

'The Human Adventure' To Show Finest in World's Art.

Talking Picture Taken In Near East Lands

Tickets for "The Human Adventure," eight reel talking film to be shown February 28 in Schwab auditorium under the supervision of the Artists' Course Committee, will go on sale Monday morning in the Athletic Association office, Old Main.

Final arrangements for the film, which was produced under the direction of the Oriental Institute of the University of Chicago have been completed, according to Dr. Carl E. Marquardt, chairman of the Committee. The Erpi Picture Consultants, of New York City, will install the finest Western Electric sound equipment in the Auditorium for the production.

Shows History of Man
"The Human Adventure" was gradually developed from the researches and explorations of the Oriental Institute. The film carries the audience by airplane through the land where civilization first arose—Egypt, Palestine, Syria, Anatolia, Iraq, and Persia. Fourteen expeditions were dispatched by the Institute to make the film. Eight of these are observed while actually engaged in the scientific recovery of the lost chapters of the human adventure.

Special planes were chartered and professional cameramen were employed to produce a story which has never before been told on the screen. Two separate trips were made from Chicago to the Near East to produce the film. More than 32,000 feet of negative were exposed and much of the film was made from the air in more than 9,000 miles of flying. Three years were required to make the picture.

Conference Will Hold Retreat, March 1, 2, 3

Assembling men and women students, graduates, and members of faculties from over forty of the colleges, universities, and graduate schools in the Middle Atlantic Region, the Intercollegiate Christian Conference will hold its annual mid-winter retreat at Buck Hill Falls on March 1, 2 and 3. A large delegation from this campus is expected to attend.

The sports program for the entire conference will be under the direction of the Penn State delegation, with Manlio F. DeAngelis '35, in charge of the arrangements. Weather conditions permitting, such winter sports as tobogganing, skiing, skating, and possibly dog-sled riding will be held. Mr. and Mrs. William L. Hammaker, associate secretaries of the P. S. C. A., will have charge of the book display and the program of reading suggestions.

Other speakers on the program not listed before are Dr. James H. Franklin, president of Crozer Theological Seminary; Dr. Lynn Harold Hough, of the Drew Theological Seminary; and Dr. Paul M. Lambert, professor of Religion and Ethics at New College, Columbia University.

Thirteen students, members of the faculty, and townspeople have signified their intention of attending, and many more are reported planning to attend. Those who desire more information on transportation, accommodations, program, and costs should consult members of the P. S. C. A. staff in Room 304, Old Main.

Library Restricts Use Of Bound N. Y. 'Times'

Volumes of the New York Times, in the College library, covering the period from the entrance of the United States into the World War in 1917 to the present have been reserved for restricted use to actual references submitted by students. This move was taken, Librarian Willard P. Lewis said, because of the severe strain placed on the bindings due to continued use.

Requests for the use of the Times should be made at the general circulation desk and access will be given to the papers.

Society Holds Banquet

Purple Quill held its semi-annual dinner at the Nittany Lion Inn Wednesday night. No new members will be elected until the spring banquet. Hugo K. Frear '32 was among those who returned for the dinner.

Selsam Sees Economic Interests As Threats Against World Peace

L. A. Lecturer Doubts If Entrance Into League Would Aid Affairs; Tells of Its Work.

Seeing no prospect for world peace because of national economic interests involved, Dr. J. Paul Selsam, of the department of history and political science said, in the discussion period following his Liberal Arts lecture Tuesday night, that he did not believe that the entrance of the United States into the League of Nations would help world affairs.

In his speech on "The League of Nations and the World Crisis," Dr. Selsam discussed the origin of the League and work thus far. The League, he said, was the outcome of a movement which had been gaining momentum for several years.

Refuting the charge that the League has done nothing to solve world economic problems, Dr. Selsam pointed out that it has established many agencies toward this end.

The World Economic Conference in 1927, under League sponsorship, adopted many resolutions which would have been of value, he believes, had the nations involved accepted them.

"In the field of economic world problems," Dr. Selsam declared, "the League has put forth policies of a sound and constructive nature, but not one of these suggestions has been followed by the governments involved."

While many have doubted the ability of the League to accomplish its primary purpose, that of preventing war, it has intervened in twenty-three disputes successfully, the speaker pointed out. In several of these cases, he continued, arms had already been resorted to. The machinery of the League works, he stated, when applied without fear and without hesitation.

The failure of the League in the Manchurian crisis and the present war between Bolivia and Paraguay Dr. Selsam blamed upon the fact that the member nations had interests involved. For this reason they refused to grant the League the power necessary to intervene successfully, he continued.

Ending his lecture on a pessimistic note, Dr. Selsam quoted a comment of John Jay which he feels applies to conditions today: "Nations, when they have prospects of gaining something, will make war."

A. A. Requests Students To Obey Rec. Hall Rules

The Athletic Association has asked that the rule prohibiting smoking in Recreation hall be obeyed by all students and others attending events there. Besides the danger from fire, it is unfair to ask the athletes to perform in a smoke-filled atmosphere, it was explained.

John M. Stocker '35, president of the Association, asked that the booping prevalent at the last few contests be stopped. He also emphasized the need for obeying the rule which prohibits cheering during the progress of the fighting in the boxing and wrestling meets.

Varsity Debates Against 5 Teams Listed for Week

Pittsburgh University Women To Meet Team Here.

Wilkinson, Berbatis Will Debate Tonight

Five varsity debates, one with the University of Pittsburgh women debaters on the topic of marriage, will occur within the next week, Angelo N. Berbatis '35, debate manager announced. A radio debate with Gettysburg, a parliamentary debate with Drexel Institute and regular clashes with St. Francis and Bucknell were held this week.

Meeting the Gettysburg duo at Harrisburg last Tuesday, William H. Brown '36 and Robert L. Durkee '35 opposed a Drexel negative team Wednesday night in a parliamentary style debate on the same argument question used throughout previous debates. The latter contest was given before the regular debate session in North Liberal Arts Building. At the same time Joseph A. Pacello '35 and Joseph S. Fry met St. Francis away on the same question.

Thursday night Bucknell played host to Jean E. Kemp '37 and Margaret I. Doherty '37 in a women's debate. Roy Wilkinson '37 and Berbatis will oppose a Lehigh University squad at Millheim tonight.

Oregon style will again feature the Juniata debate Monday night when James W. Townsend '35 and Durkee stage a debate at the Odd Fellows Hall on the argument question. This debate will be a non-decision contest.

Second Debate Thursday
Although arrangements are still pending, it is probable that Lester M. Benjamin '37 and Arthur Pollock '37 will oppose Washington and Jefferson in an Oregon style debate some place in the vicinity, while Ursinus will engage in a women's debate in Home Economics auditorium the same night. The co-ed debaters have not been selected.

Townsend and Wilkinson have been chosen to meet the University of Pittsburgh women in the second campus feature debate Thursday night. Both teams will discuss the question of whether a male college graduate, earning a minimum salary of \$1,500 a year, should marry before the age of twenty-five. An audience vote will decide the victor.

At the close of this debate, Beta Sigma Rho, winning fraternity in the recent inter-fraternity discussion contest held annually by the Forensic Council, will receive a silver loving cup, which the fraternity will keep permanently, and the Kappa Delta Rho trophy, which will be retained for one year.

Numerous debates are scheduled for next month, including several feature debates on the campus. The inter-collegiate tournament, which occurs sometime in April, will climax the local debating season.

Club Elects Officers
Leon M. Lurie '38, was elected president, Manuel Katz '36, secretary, and Albert L. Brucklaecher '38, treasurer, of the Social Problems Club at a meeting last Tuesday. Tentative plans, including bi-weekly forums headed by different professors, were also decided on. The first of these forums, with Prof. S. K. Stevens of the history department, leading a discussion on the NRA, will be in the Home Economics Auditorium, Tuesday at 7:15 o'clock.

Steidle Gives Report
Dean Edward Steidle attended the annual meeting of the American Institute of Mining and Metallurgical Engineers in New York the first part of this week. He presented a progress report of the Institute Committee on Bituminous Research Planning of which he is chairman. He also heads the program committee of the Division of Mineral Industry Education and is a member of the committee on non-metallic minerals and ground movement and subsidence.

Queer Idol of Human-headed Bull Uncovered by Exposition In Persian Ruins.
and many other archaeological finds of importance to the historian of ancient man.

The firm ends with the first professional cinematic record ever made on standard size film of Persepolis, the capital of the Persian Empire built by Darius the Great about 500 B.C. Here the institute's Persian expedition made its headquarters in the reconstructed harem of Darius.

The monuments, the great columns and the carved stairways of the Palace of Darius, shown in the film, are among the finest examples of art and architecture in the world and are rivaled only by the glories of the Acropolis.

The accompanying illustration is of the figure of a human-headed bull wearing a crown which was found by the expedition at Persepolis.

Excavations Reveal 14 Distinct Cities Superimposed On Stone Age Village.
Some of the highlights of "The Human Adventure" eight reel talking picture to be shown in Schwab auditorium February 28 under the auspices of the Artists' Course are sequences in which Dr. James H. Breasted, founder and director of the Oriental Institute of the University of Chicago is seen and heard describing the work of the Institute and the epic rise of man. Dr. Breasted is one of the most famous American archaeologists and historians and the author of many books.

Some of the features of the film are a flight over the Persian Mountains and one in a sandstorm which reached heights of 12,000 feet; excavations which reveal 14 distinct cities each built one upon the other with a Stone Age village at the bottom and the remains of an early Christian temple at the top; weapons made by Stone Age man; wheat from the days of Joseph; the stables of King Solomon;

Woman Writer To Talk
Miss Betty Reed, special feature writer of the Philadelphia Evening Bulletin, will be the speaker at a tea given by Theta Sigma Phi, women's journalism fraternity, in second floor lounge, Old Main, Sunday.

Miss Reed was the only reporter from the Bulletin and one of the few women reporters who covered the Hauptmann trial which will be the subject of her talk.

All women journalists and junior and senior members of the publications' staffs have been invited to attend.

Thespians Reveal Identity of Star
Error of Show's Publicity Agent Confuses Name of Lead In 'Don't Let On'.
Because of an error in material released by the Thespian publicity agent last Wednesday night, Margaret S. Giffin '35, a member of the varsity women's quartette, was announced as the lead in the new Thespian production "Don't Let On." The real lead is Margaret R. Giffin '37, a transfer from William and Mary College this year. Both of them are prominent in dramatic and musical circles.

Miss Giffin will play opposite Norman Holland '37 in "Don't Let On." She has appeared in leading roles in musical productions at William and Mary, chief among which was the role of "Buttercup" in "H. M. S. Pinafore," the famous Gilbert and Sullivan success, which happens to be the first production in which the Thespian club here permitted women to appear in their shows. Miss Giffin also played the part of "Hansel" in the production "Hansel and Gretel," while she was attending the Virginia college.

19 Women's Men
J. Ewing, "Spook" Kennedy, director of "Don't Let On" and other Thespian production, announced today the dancing choruses of men and women for the coming show. A total of nineteen chorines and eight chorus boys have been selected for "Don't Let On." All of them have had considerable experience in chorus work, both here in Thespian shows and in other dramatic clubs, and for this reason Kennedy expects it to be one of the best ever to dance on "the local boards."

Engineer Will Lecture In Amphitheatre Today
Col. Oliver F. Allen, consulting engineer of New York City, will speak on "Some International Aspects of Engineering" in the Chemistry amphitheatre at 3:10 o'clock this afternoon. The lecture will be of interest to students outside the School of Engineering.

Colonel Allen specializes in Diesel engineering and will discuss research in that field being carried by professors in the Engineering Experiment Station of this college. The speaker was the foreign representative of the International General Electric Company for some years, and, consequently, is thoroughly acquainted with European engineers and practices.
