

2.6. Hackett Leads Sophomores James E. Hackett, with a 3 aver- age, led the class of 1937, followed by Anne M. Boyer, Wilbur J. Pert- stein, and Harold H. Ruland, 2.7; William J. Scarlett, Vincent A. Schmeidtfer, and Mary L. West, 2.6; Johnson Brenneman, Myra E. Cohn, Alvin E. Heutchy, James R. Keough, and James H. Ramsey, 2.5. Ralph E. Dimmick led the Lower Division with an average of 3, fol- lowed by Kathleen E. Gilbody, 2.9; Rose M. Costanzo and Vernon L. Hull, 2.8; Ronald G. Forbes, Robert L. Kaye, John A. McLaughlin, and El- eanor L. Robinson, 2.7; and Marshall K. Evans, and Frieda M. Knepper, 2.6. Richards Funceral Held Funcral services for Mrs. John R. Richards, wife of John R. Richards, director of the division of extension of arts and science, were held yester- day, afternoon at Wilmington, Del. Mrs. Richards died Monday after-	Half past four and school is out." This quotation from McGuffey's ford first grade reader is included in a set of six McGuffey readers recently re- ceived by Prof. E. L. Nixon, of the department of plant pathology, as a gift from Henry Ford. The books were reprinted especially for Profe- sor Nixon from the original books by Mr. Ford. "The McGuffey readers are remem- bered with affection by our fathers and grandfathers. They were used mostly in the middle western part of Pennsylvania, but were not restricted to that section. Except the Bible and Guffe tor, said in a talk over the radio on of th	ey's Readers by Henry Ford habout Professor Nixon's inter- in the old school texts and Mr. had the copies made which he here. So excellency without great la- talent makes a man respectable, makes a during the last cen- talent makes a during the last cen- scording to one authority on old books; the McGuffey books excell thers for purposes of moral in- ction. War, liquor, laziness, im- tered, dishonesty and other vices wed terrific blows from the Mc- ey brothers and they believed their books should be character ing as well as educational. rom 1836 through the second half is convictions of the American on than any other factor," ex- entor Gifford Pinchot once said	home a museum in which are housed all the Priestley relies that could be gathered together. Other Priestley lectures, which deal annually with the borderline between physical chemistry and some other science, have treated biocolloids, met- allography, medicine, ceramics, elec- trical engineering, biochemistry, and metallurgy in relation to physical chemistry.	sible. Dr. James E. Gillespie, professor of European history, doubted if there would be a war in the immediate fu- ture. He said, "Germany is not pre- pared for war, and all of the other major nations are anxious to avoid trouble at the present time. There is no question but what Germany will rearm, but she won't dare to start anything because she is isolated." Dr. Jacob Tanger, acting head of the department, said, "Germany won't tart anything, and if she doesn't, the other countries won't either. All the European officials realize that a war will offer an excellent chance for the spread of Communism throughout all of the countries. Also, the dicta- tors know from experience that if they got their countries into a war, they would be very apt to be 'un- horsed' before it was over." While pointing out that he was not in a position to make an authentic statement on the question, Dr. Fran- cis J. Tschan, professor of ancient, formar, medieval, and Oriental his- tory, felt that there was no immedi- te doneer of a Euronean war. He	of Europe, and is as unsound as the sy treaties of Westphalia, Utrecht, and Vienna were." Altred G. Pundt, instructor in his- tory, was the only one of the four in- queriewed who felt that war in Eu- sis rope was imminent. He said, "There are three facts which make me be- lieve that war is inevitable. First, q there has been an eighty per cent rr increase in the manufacture of arma. duments in Europe during the past few ic years. This same increase took place in Europe during the past few ic years. This same increase took place in Europe during the past few ic years. This same increase took place in Europe in the five years directly preceding the World War. "Second, there is a growing war- thite tension within Germany. And, third, all of the countries of Europe are becoming increasingly distressed over the prolonged depression. How- wever, there is one very significant fac- tor which should at least delay any European war. That is, that at the present time, there is no balance of the power in Europe. Practically all of the major nations have lined up for a the major nations have lined up for a the major nations that anything E	Beginning at noon today, the lour- ecy will continue until tomorrow light. All trams must debate, as no yes will be drawn. Over twenty- vice colleges, representing Ohio, Penn- ylvania, and West Virginia, have een invited to participate. 7 To Discuss Marriage Other than entering the armament uestion debates, the public discus- ions, and the after dinner speaking ontest, the varsity teams will stage he split team debate on the marriage uestion, which was held here Feb- uary 28. Joseph F. O'Brien, men's ebating couch, and Clayton S. Shug, o-ed coach, will accompany the quads. Aaron N. Deeker '36 and Arthur 'ollock '37 will meet Susquehanna Iniversity representatives in an or- hodox debate on the armament ques- ion over station WKOK, Sunbury, on fonday afternoon. The local squad vill take the affirmative side of the uestion. Few intercollegiate contests re- nain for the month of April before he season comes to a close with the mnual Forensic dinner in May.
