

Cole To Give Lecture

Dr. L. J. Cole, chairman of the department of genetics at the University of Wisconsin, will visit the College this week. Dr. Cole will deliver a lecture on "Genetic Studies at the University of Wisconsin" before the research staff and student body of the School of Agriculture in Room 100, Horticulture building, Thursday afternoon at 4:10 o'clock. The lecture will be open to the public.

Campus Bulletin

TODAY
Freshman Commission and Forum will hold a joint session in Hugh Beaver Room, Old Main, at 7 o'clock.

American Society of Civil Engineers and Alpha Nu, astronomical society, will hold a joint meeting in 105 Main Engineering, at 7:30 o'clock. Dr. Charles A. Rupp, of the department of mathematics, will speak on "Shooting Stars." The meeting is open to the public.

TOMORROW
All Freshmen candidates for football manager report to Recreation Hall at 3 o'clock.

Le Cercle Francais will hold a special song practice in the Women's building at 7:30 o'clock.

FRIDAY
W. S. G. A. dance will be held in Recreation hall. Bill Bottorf will play.

MISCELLANEOUS
Radio and facilities of Room 418 Old Main is for the use of all Penn State Club members both day and evening. Apply at the Student Union office for information and the key.
Don't forget the Easter dance on April 18. "Bunny" Lynn Christy will furnish the music.
The annual Priestley Lecture series

is being held every night this week in the Chemistry Amphitheatre at 7 o'clock.

Professor Max Krisa, of the institute of animal nutrition, will present a paper on the influences of mineral deficiencies of energy metabolism at a meeting of the American Institute of Nutrition, which will be held in Washington on March 25.

Power Facilities Good

George V. Ebert, superintendent of grounds and buildings, announced that the water and electric power facilities of the College remained in good condition throughout the flood. The flood, which can be considered in the light of a test, has proved that the College power plant is capable of supplying the needs of the whole town as well as the College. "Had this catastrophe occurred five years ago," Mr. Ebert said, "we would have been forced to close the College."

Concert Date Changed

Due to the protracted illness of Hummel Fishburn, the Phi Mu Alpha concert Sunday has been indefinitely postponed. The last of the mid-winter series of concerts, it was to be held jointly with the Louise Homer Club and the Women's Symphony Orchestra.

Chemists, Physicists Will Attend Conclave

Six members of the College faculty in the School of Chemistry and Physics are taking part in the third Pennsylvania conference of College Physicists Teachers meeting this week at Wilson College in Chambersburg.

On Friday afternoon Prof. Oscar P. Smith, vice-dean of the School of Chemistry and Physics, will speak on the survey course in physics given here.

On Saturday morning Prof. R. B. Dow, D. McLachan, Dr. D. H. Rank, and Carl E. Post, all of this College, will contribute short papers in a general resume of current advances in physics research and techniques.

The arrangements committee is composed of Dr. Wheeler P. Davey, research professor in physics and chemistry here, chairman; Prof. T. D. Cope, University of Pennsylvania; Prof. H. M. Franklin and Marshall; Prof. P. McCorkle, West Chester State Teachers College; Prof. R. H. Sutton, Haverford College; Prof. D. W. Weeks, Wilson College; and Prof. Charles Williamson, Carnegie Institute of Technology.

Fellowship Established

The John H. Weaver Company has established the John Heisley Weaver Fellowship in the department of fuel technology for this year, according to a recent announcement by Dr. Alfred W. Gauger, of the department of fuel technology. The fellowship is awarded to encourage fundamental research in the coal industry, in which Weaver has figured prominently.

Priestley Talks Open With Dr. Lewis, MIT

The second lecture in the tenth annual series of Priestley Lectures on the "Borderline Between Fluids and Suspension" will be given by Dr. Warren K. Lewis, of Massachusetts Institute of Technology, in the Chemistry Amphitheatre at 7 o'clock tonight.

Tomorrow's lecture will deal with the viscosity of fluids, including the outline of the physical nature of viscosity, and the effect of temperature and pressure on viscosity. Dr. Lewis will also point out the analogies between viscosities and properties of fluids and the influence of temperature.

Dr. Arnold To Deliver Liberal Arts Lecture

Speaking on "The Book of Good Love," Prof. Harrison H. Arnold, of the department of romance languages, will deliver the sixth lecture in the 1936 Liberal Arts lecture series in the Home Economics auditorium tonight at 7:30 o'clock.

"The Book of Good Love," written in 1348 by Juan Ruiz is one of Spain's three best books. It is considered the outstanding book of the middle ages.

In his lecture, Professor Arnold intends to outline the contents of the book which are written in verse form. Originally, the book was probably read by a minstrel to a crowd and was not intended for private reading.

The story is an autobiography of a priest and his amorous adventures. It also contains fables and anecdotes. The introduction of Professor Arnold's lecture will be an account of the comparative value of Spanish literature.

CLASSIFIED

aroma . . . it's as much a part of Chesterfield as the taste

Did you ever notice the difference in the aroma of Chesterfield tobacco?

Every person who knows about tobacco will understand this . . . for to get a pleasing aroma is just like getting a pleasing taste from fruit.

Mild ripe tobaccos, home-grown, and welded with the right kind of tobacco from far-off Greece and Turkey (Samsoun, Smyrna, Xanthi and Cavalla) . . .

. . . that's why Chesterfield has a more pleasing aroma.

. . . with that pleasing aroma
