**Telephone lines
are planted
with plows**

RURAL telephone wire—not in cables—can now
go underground where bad weather and grass
fires can't harm it.

To make this possible, an entirely new kind of
wire had to be developed. Special insulating com-
pounds, special splicing methods were devised.
Then a simple, economical method of burial had
to be found. A special plow solved this problem—
one that digs a furrow and tucks away the wire in
a single operation.

Just one more step in the process of making
Bell System service constantly more dependable.

Why not telephone home tonight? Rates
to most points are lowest any time after
7 P. M. and all day Sunday.
