DEFERRED RUSHING

LAST MONTH a new frate mity rushing, code. radically different from those of other years, was put into effect

Despite all of the code's shortcomings, student opinion was plactically unanimous in its praise for the initial silent period which extended from Welnesday night of Freshman Week to the following Saturday afternoon

The three-day respite given to the incoming freshmen was something novel in Penn State's rushing history for it provided, among other thing", a breathing spell during which freshmen could adjust themselves more readily to the new environupper classmen could prepare more efficiently for the entertainment of the lushees during the subsequent rushing period o 0

NOW, OF COURSE, there are those who would scuttle this progressive step toward the realization of more ideal relations between fraternite, and iushees and revert to the old iushing code ander which the evils of lead-piping flourished so

"As long Ribuman nature remains what it is,

3. As the second with the second s ruching experience, the Collegian believes that there is another element—far stronger and far more numerous than the first—which is whole-_heattedly in favor of deferring tushing for a long-er period in order that incoming freshmen might be given sufficient time to learn all they can about · the different fraternities and about fraternities in general

It is among this group that considerable agitation for the postponement of rushing has been ev dent for the past few years

It was in this group that a movement was begun last year to revise the rushing code, a movement which culminated last month in the postponemen of rushing for three full days

It is in this group that a movement now has be gun to pestpone rushing until the beginning of the semester

NOW, IT MUST be admitted that the plan to defer rushing one full semester has its advantages It would, for instance, practically eliminate lead-

it would give the freshmen five months to learn what they can about the different social groups through informal contacts and thus enable to choose with greater exactness the type of fraternity into which they could fit themselver mos readily

It would give fraternity members five months to study different prospects and thus enable them to choose with greater exactness the type of men who they believe would add greater prestige and greater honor to the fintermity itself Above all it would serve to eliminate misfits and maladjustments and black sheep

ALL THIS, of course, is ideal. But idealism must be tempered with practicability-and it is

mester, what will happen to the fraternities which are serving their purposes but which, because of the prevailing competitive con-

By HELEN V ATKINSON '40'

Turning back the pages of his flife,-we find that President Ralph Dorn Hetzel was born in Merrill Wisconsin. He barely made the old ear, for his birth date is December 31, 1882

Like so many other people. President Hetzel's vocation is not what he dicanned of as a boy. If chad planned to be a lawyer. He finished also undergraduate work in law and, in fact, was even admitted to the Wisconsin but in 1908 and the Oregon hat in 1910 before the field of education claimed his time and interest

The Rev. Kroll, Class Of '17 Will Address Gathering
