

Colonel Emery May Leave College To Head U. S. Infantry Office

Students Believe In Absolute Peace

By Student Opinion Surveys

AUSTIN, Tex., Nov. 14.—Unlike U. S. public opinion, majority sentiment among college students today holds that it is more important for the United States to try to keep out of war than to help England even at the risk of becoming involved.

Simultaneously over the entire nation, Student Opinion Surveys of America has sent its interviewers to query all types of students on large and small campuses, presenting to them a problem vital to American youth, a question many times discussed in a thousand dormitory and boarding house bull session. With the cooperation of The Daily Collegian and scores of other newspaper members, the Surveys has gathered and tabulated these opinions by means of scientific sampling methods. Here are the results:

Students were asked which of the two following things they thought was more important for the U. S. to try to do. Their answers, in percentages, are given after each statements—

Keep the U. S. out of war .55%
Help England, even at the risk of getting into the war 45%

This is not what their elders think. A Gallup poll recently pointed out that the majority of Americans believe the British are holding our first line of defense and helping them is more important than merely trying to steer away from the conflict.

Students, however, have repeatedly shown their tendency toward isolationism and their strong desire to avoid another war. For two years the Surveys has been gauging collegiate sentiment the nation over.

ENCHANTING!!!

MERLE OBERON, the sensational star of "WUTHERING HEIGHTS" is now appearing in "OVER THE MOON" which will be shown at the Nittany Theatre, today only. (Adv.)

Wants Gift Suggestions

William B. Bartholomew, senior class president, yesterday issued a call for suggestions for the senior class gift. "In order that expenditure of the \$5,000 gift fund may be decided on wisely, we must begin our consideration as early as possible," Bartholomew said. Suggestions should be submitted to the class president either personally or through Student Union.

Dedication Closes Dealers' Meeting

At the dedication exercises of the new Agricultural Engineering Building held yesterday afternoon, the two-day annual meeting of the Pennsylvania Farm Equipment Dealers' Association came to a close.

Dean Stevenson W. Fletcher, School of Agriculture, who presided at the afternoon session, reminded the crowd in attendance that the School of Agriculture is dedicated to the service of Pennsylvania agriculture, including the engineering phases.

The development of mechanized farming was briefly reviewed by J. W. Cooper, president of the Pennsylvania Tractor and Implement Club. He told how farm machinery began with the invention of the reaper in 1831, followed by the thresher in 1834, the steel plow in 1837, and the mower in 1858. The first steam tractor was made in 1849, he said, but like the first tractors powered by internal combustion engines, steam tractors proved too heavy for plowing. More recently light tractors have brought about changes in practically all farm machines, was another statement made by the speaker.

Has Served Here For Two Years

Col. Ambrose R. Emery, head of ROTC at the College, received a telegram Wednesday from the War Department disclosing that orders were being issued that will detail him to Washington, D. C. as Chief of the Infantry Office there. The order goes into effect November 22, it was announced by the military department yesterday.

Just two years have elapsed since Colonel Emery was moved from Schofield Barracks, Hawaii, to his present post here at the College.

While attending Baylor University in Texas, Emery started his military career as bugler and drummer boy in the cadets corps. Shortly after graduating from Georgia Tech, he took an examination for his commission as second lieutenant in the Army.

Emery was commissioned in April, 1905, and he joined the 27th Infantry at Fort Sheridan, Illinois. In 1906 he was detailed to Cuba and served there for three years. As a first lieutenant, Emery was stationed in Idaho with the National Guard, Texas, and the Philippine Islands.

As a captain in 1916, he served with the 15th Infantry at Tientsin, China. He then returned to the States and reported for duty at Camp Lewis.

Emery attended the Army War College in 1931, and from there went to Texas A. & M. as professor of military science and tactics, where he stayed for four years.

The two years previous to his coming here Colonel Emery spent in Hawaii commanding the regiment he joined when first commissioned, the 27th Infantry.

Mr. W. H. Wade, past president of the Pennsylvania Electric Association, told of the difficulties confronted by the men who paved the way for the use of electrical energy on farms to make it profitable for both the producer and consumer.

Ausmus S. Marburger '41, president of the student branch of the American Association of Agricultural Engineers, outlined the functions of the organization.

Prof. Ralph U. Blasingame, head of agriculture engineering, expressed appreciation of a loyal staff, for encouragement by the Board of Trustees of the College, for the cooperation and help of farm machinery dealers and manufacturers, and for the enthusiasm of the students.

Transferred

Col. Ambrose R. Emery, head of the College military department for the last two years, has received word he will be transferred to active army duty.

Drum And Bugle Corps Solicits

If someone took a poll of State College residents, asking who their favorite band is, the results would not show BG or TD on top. No—that honor would be reserved for the State College Drum and Bugle Corps, a band that has carried the fame of their little town far and wide.

The drum and bugle corps is self-supporting, and in order to maintain uniforms and other accounts, funds must be solicited for its upkeep. For this purpose band members have solicited townspeople and will visit fraternities, dormitories, and other student residences on Saturday.

For the past three years the corps has played at Penn State football games. The organization is always at the disposal of the College and the student body. Thus, the corps was on hand with the blue band and 2,000 rosters to greet the Penn State football team after the Temple game.

The corps has won state championships four times, and has traveled a total of 10,000 miles. It represented the United States in the Canadian Exhibition at Toronto.

High ROTC Rating Tribute To College

"The 'excellent' ROTC rating, highest given by Army inspectors, which Penn State consistently receives in spite of an inadequate armory, is a tribute to both students and college," declared Col. Ambrose R. Emery, head of ROTC yesterday.

The national defense mindedness of the country increases the interest in ROTC units of which Penn State has the largest in the East and twice as large a unit as there is in Pennsylvania.

The ROTC gains in enrollment this fall in both the basic and advanced courses has brought the total contingent at the College to 2,500, or one half of the male student body.

Colonel Emery said that the students are showing more interest and enthusiasm for ROTC this fall than ever before. Out of the 2,155 Penn State men who took part in the World War 48 per cent emerged from the war commissioned officers.

Hillel Debate Tonight

A debate on the subject "Resolved, that America should open its doors to refugees" will be presented at the evening service of the Hillel Foundation at 7:30 p. m. tonight. The Hillel men's debating team will meet the Hillel women's debating team.

Senior Schedule Posted For Engineering Lectures

Dean H. P. Hammond of the School of Engineering announced the time and rooms for today's Senior engineering lectures. They are as follows:

Electrical, industrial and mechanical engineers in Room 110 EE Building at 4:10 p. m.
Architects and architectural engineers in Room 310 Main Eng. Building at 4:10 p. m.
Civil and sanitary engineers in Room 105 Main Eng. Building at 4:10 p. m.

CLASSIFIED SECTION

FOR SALE—One full dress suit with white vest, practically new. Size 38. Call 4336. 2tch11-15E

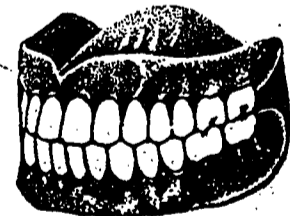

SECOND FLOOR ROOM—Twin beds for two, quiet gentle boys, 625 N. Allen St. 3tpd E 11-12-11-15-11 19

LOST—Ladies white gold Hamilton wrist watch. South Allen St. Reward. Notify Club Office. Dairy Building. 3tch11-19E
