## Candidate Views Educators' Task

"Education will have one of the most important jobs in the reconstruction period after this war" was the observation of Ralph H. Smith, judge of the common pleas court of Allegheny County and candidate for governor of Pennsylvania, when interviewed yesterday.

Smith, a former educator, said that we would have to learn to live under the new steep which will come at the end of the war. He said that the working man will have to find a suitable way to spend the hours which he will find as leisure time when shortened working hours return.

He outlined three things which would be necessary of the intelligent person after the emergency. Such a person will have to achieve a greater amount of general education, gain practical training in government, and learn how to live and spend spare time wisely.

He stressed the importance to each individual citizen of understanding his country and knowing all that goes to make it great.

## Pastor Asserts Need For Leaders

Colleges must produce young leaders who can combine the "infinite and industrial, the eternal and economics, the souls with silver, and God with gold," declared Dr. Louis H. "Spiritual hunger has always preceded physical hunger," Dr. Evans asserted, and said that what we need most now in our hour of need is a Shepherd. The half-gods have taken over, and they are not good enough, he declared.

Concluding a three-day visit to the campus, Dr. Clarence P. Shedd, professor of religious education and director of courses on religion at Yale University, spoke briefly on the great need there is in the present chaos to maintain free channels of communication between the Christian peoples of the world.
