

WRA Adds Co-Rec Day, Dance To Social Program

With stars as the roof and the Atherton Hall parking lot as an imaginary barn, WRA will act as hostess to service men and women, coeds, and townspeople next Saturday night at Co-Rec evening.

Square dancing will be the feature attraction of the evening with Chauncey Lang acting as caller. Preceding the square dancing at 7:30 p.m., men and women will participate in softball and volleyball on Holmes Field, as well as archery, bridge, and ping pong. Every event will be outdoors, but in case of rain the entertainment will be moved to another building on campus, to be announced later.

Executive board members of WRA will be in charge of a coke bar at the parking lot. Profits from the sale of soft drinks will be given to the various service groups. This year's Co-Rec evening will be in connection with the programs planned by the Social Saturday Night Committee. H. R. Gilbert is chairman of this committee and Elizabeth McKinley will serve as chairman of arrangements for Co-Rec evening.

The following Saturday night, July 31, the annual Sweetheart Dance will be held in White Hall. Joan K. Miller, chairman of the dance, has announced committee heads. Mary Kay Hess will be in charge of decorations; Adele Levin, WRA president, ticket chairman; Margaret K. Ramaley is in charge of invitations; and Margaret L. Good is publicity chairman.

Jim Burden, a new name band on campus, will provide the music for dancing from 9 to 12 p.m. Women will act as escorts, inviting men as their guests, following WRA Sweetheart Dance tradition. The dance will be formal for women and semi-formal for men, according to Miss Miller. This is the only formal planned for the Summer semester.

Children At Rec Hall Hinder Military Program

Local parents were urged today by Dean Carl P. Schott to keep their children away from Recreation Hall at all other times when no special events are taking place.

The dean revealed that many of the children are a source of constant nuisance and as such are impeding the progress of the extremely busy military program in Recreation Hall.

"We must all remember," he said, "that Recreation Hall is to all intents and purposes a military reservation and that civilians should be there for stated purposes only."

Those in charge have been patient with the intrusion of the youngsters, Dean Schott said, and warned that if the situation does not improve, policing measures will have to be adopted.

MORNINGSTAR BREAD

Morningstar Bread is fine for every purpose. It makes sandwiches that are pleasing in taste and at the same time nourishing. And if you want crisp toast that fairly melts in your mouth this is the loaf for you.

MORNING STAR. TRU-WHEAT PURITY BREAD and TROPHY WINNER CAKE

Former Utah Professor Accepts Teaching Post On MI School Faculty

Dr. Corliss R. Kinney, formerly professor of chemistry at the University of Utah, has been appointed professor of fuel technology in the School of Mineral Industries at the College, according to an announcement by President Ralph D. Hetzel.

Dr. Kinney received his undergraduate training in chemical technology at Iowa State University, and did his graduate work in organic chemistry at Harvard under the late Professor E. P. Kohler, receiving his Ph.D. degree there in 1925.

The same year he joined the chemistry department at the University of Utah as an instructor, and was successively advanced to the position of professor of chemistry. While at Utah, he published about 30 research papers on various phases of organic chemistry and fuel technology.

Dr. Kinney has also done considerable work on the cracking of Utah coal tar oils and tar acids. He served as a member of the executive committee of the Utah Conservation and Research Foundation which investigated the low temperature carbonization of Utah coals.

In addition to teaching courses in fuel technology, Dr. Kinney will be in charge of the research program at the College on the non-fuel uses of bituminous coal. Dye-stuffs, wood stains, carbon blacks, and plastics have been made from coal, and further research is needed in order to expand this field of coal technology.

Air Corps Instructor

(Continued from Page One) tees may apply for ASTP if they achieve a score of 115 or better on the Army General Classification Test, which will be given at the first reception center. Lt. Weaver, of the 3rd Service Command, suggests that such students remain in their status quo until notification of complete instructions which will be issued shortly.

Naval Aviation is still open for the same age group as the Army Air Corps, but students must go to Philadelphia for all interviews and examinations. The date of call to active duty for successful candidates, though still uncertain, will probably come between now and next March. Some of these boys will be appointed to the V-12 program for at least 2 semesters, while others will go directly to Pre-Flight School.

Probable date for the next V-12 and A-12 examinations is sometime in November, which will permit qualified applicants to enter these programs for assignment in March. Those who took the examination in April were enlisted about June 1 and assigned to college in July. Scores of the November test will probably be announced in December with interviews scheduled for January, and February. Applicants for Marines will enter through the V-12 program.

The only category still open to upperclassmen is SV-7 and is for engineering students only. The vision requirement for this class is 12/20 uncorrected, 20/20 corrected, although, in exceptional cases, those with lower vision acuity may be accepted. General service is still open to men up to 28 years of age with 2 terms of college mathematics and 18/20 eyes.

Ski Troops and Mountain Troops have reopened and are soliciting applicants. Interested selectees and ERC enlistees may secure applications from Galbraith and, if accepted, may be transferred to Ski Troops upon induction or call to active duty.

Boerlin Announces New Film Library, Projection Service

On the recommendation of its Committee on Audio-visual Aids, the College announces a new Film Library and Projection Service which will meet both campus and off-campus needs under the joint sponsorship and supervision of Central Extension and the College Library with Irving C. Boerlin in charge. The acquisition of film will include gifts, purchases, loans, deposits, and rentals. Six hundred and sixty films on approximately 300 subjects are now on file in the Film Library, Room 9, Central Library, and are available for lending.

It is expected that College departments as they realize the value and availability of the Film Library and Projection Service will make increasing use of it and will gradually order films in their own fields through funds provided by the College, in much the same way as library books are now obtained.

If the local Film Library proves inadequate, other rental film services will be consulted. Inasmuch as films are more expensive than books, it is essential that purchase of films receive the approval of the departments and schools concerned, the librarian of the College, and the film executive. Similar approval will also apply to films otherwise obtained. It is hoped that, as the film service develops, College departments may see fit to deposit film now in their possession in the Film Library and add to its usefulness. One College department has already deposited 19 such films. Films will be serviced by the Film Library staff.

Projection service has thus far been offered under separate organization for campus service and off-campus service, and union in a joint program should make such service many times more effective.

Applications for purchase of film for the Audio-visual Aids Library should be addressed to the College librarian.

Requests for projection service or for information concerning available films should be directed to the Film Library, Central Library Building.

Chance Vought Aircraft Interviews Students

Engineering students will have an opportunity to be interviewed by Mr. Charles Garratt, of Chance Vought Aircraft Company, Monday, according to Miss Charlotte E. Ray, dean of women.

Mr. Garratt is interested also in meeting some women students who may wish to prepare for training as engineering assistants. The time and place for Mr. Garratt's interviews will be announced by the School of Engineering.

A booklet, "Women in Aircraft Engineering," presenting the Chance Vought program may be obtained at Dean Ray's office.

326 Pennsylvania Men Register In V-12 Program

Up-to-date census of the Navy V-12 enrollment at the College shows that of approximately 600 trainees Pennsylvania has a preponderance of 326. Twenty-five other states and the District of Columbia are also represented. Of these Ohio has the second largest representation with 106.

New York, third among the Navy, ranks first with the Air Corps as the native state. A complete study by Dr. Asa E. Martin, head of the history department, shows that the Air Force represented 38 states and the District of Columbia.

Transfers Entertained

Junior Service Board will entertain transfer students at a supper in Hort Woods tomorrow evening, according to Carol Kane, president.

WOMEN IN SPORTS

By MIRIAM FRANKEL
WRA has set the stage for another program of intramural sports—summer style. First to get underway is softball, with a schedule of competition for the 14 teams completed, under the management of Gloria McKinley.

Games take place on Holmes Field at 7:30 p.m. The double elimination plan being used permits a team a second opportunity after the first defeat. Working towards the Intramural Cup as the ultimate goal, the winning team of the softball tournament will receive five points; runner-up, three. The cup is awarded to the team which accumulates a majority of points.

Opening the tournament, Ath East played Chi Omega at 4:30 p.m. Thursday, while Kappa Alpha Theta contested Kappa Delta, Ath West played Phi Mu, and

Sigma Delta Tau, Kappa Kappa Gamma. Next week's schedule places Jordan Hall against Wo-Mac (a team combining Women's Building and Mac Hall), and Alpha Chi Omega versus Alpha Epsilon Phi on Tuesday. Watts will meet Delta Gamma on the field Wednesday.

Plans for additional sports include tennis, swimming, golf, and archery tournaments. All girls interested in participating are requested to sign up with intramural managers located in respective dormitories.

Wanted—Candidates For Student Activities

Collegian Business Staff will have its first meeting for candidates in the Collegian business office, 4:30 p.m. Monday. Philip P. Mitchell, business manager, stressed that all freshmen and sophomores should come out.

Freshmen and sophomores who want to try out for Collegian Editorial Staff and haven't yet attended the meetings should attend the next meeting in 8 Carnegie Hall, 7:30 p.m. Tuesday.

There will be a meeting of candidates for the business staff of Froth in Carnegie Hall Thursday, July 22, 7 p.m., according to promotion manager Muriel Liebowitz. All students, especially freshmen, are urged to come.

Those interested in joining the staff of the Penn State Engineer should attend a meeting in 100 Electrical Engineering on Monday, July 19, at 7:30 p.m.

College Bureau States 127 May Graduates Achieve Positions

One hundred and twenty-seven of the 411 May graduates have been placed in positions, according to a recent announcement of the College Placement Service.

Totaling 46 employed, the School of Education and Psychology leads the other seven schools.

The Liberal Arts School with 28 employed is next. Agricultural graduates follow with 21.

Sixteen members of the School of Engineering are presently employed. Ten from the Mineral Industries School, five from the Chemistry and Physics School, and one graduate of the School of Physical Education complete the list of employed.

This report is presented to show the present employment status of our most recent graduates.

PSCA Rural Service Program Helps Solve Farm Shortage Problem

Reinforcing the diminishing number of farmers, 50 students have volunteered to go haying at 2 o'clock this afternoon under the rural service plan sponsored by the PSCA.

Farmers within a ten-mile radius of State College will be aided in picking fruit, shocking wheat, truck gardening, or hay making.

Farmers will supply transportation. Students will begin work every afternoon at 1:30 and will conclude at 5 p.m.

Katherine Miller and James Ziegler, co-chairmen of the drive, advise all students who wish to offer their services to apply at 304 Old Main or at Student Union for further information.

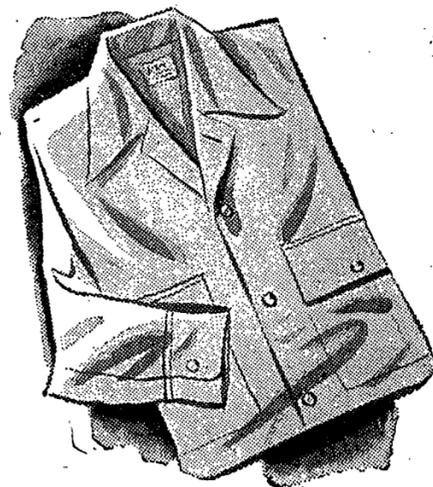

Aircraft Representative To Interview Seniors

A personnel representative of Chance Vought Aircraft Corporation will interview students on campus Monday, George M. Leetch, head of the College Placement Service, announced.

All senior women who are interested in training in aircraft engineering may arrange for interviews at the Placement Service office, 204 Old Main.

Senior mechanical engineers who wish to apply for jobs with Chance Vought must register at Prof. H. A. Everett's office in Main Engineering.
