

42 Hamilton Coeds Registrar Announces Complete Course 'Experimental' Frosh Scholastic Results

Forty-two Hamilton Standard Propeller students were presented with certificates last night at the completion of their intensive six-months training period in aeronautical engineering. Commencement exercises were presided over by Royal M. Gearhardt, associate professor of architectural engineering.

H. P. Hammond, dean of the School of Engineering, delivered greetings to the coeds, followed by an address by President Ralph D. Hetzel. After the presentation of diplomas and the singing of the Alma Mater, the coeds together with faculty guests adjourned to the Nittany Lion Inn for a banquet.

George Roreman, engineer in charge of the training program, delivered a short talk followed by a welcome address by Edwin Eaton, administrative engineer from East Hartford, where these coeds will be sent to work. The final talk was given by Adrian O. Morse, assistant to the president.

Forty-five more women will arrive December 30 on the Hamilton Standard Propeller Scholarship to do the same type of work that those now graduating have completed.

Sixty-nine "experimental" freshmen at the College this year have been earning their high school diplomas while starting college careers, William S. Hoffman, registrar, announced today.

These first-year students are "educational guinea pigs" in a State-wide wartime acceleration program under which secondary school students within one half year of graduation are permitted to enter colleges as freshmen in full standing.

Penn State enrolled 69 such students, 62 men and 7 women, who ranked reasonably high in their classes, met subject-matter entrance requirements lacking only elective units, and were recommended by their high school principals. The understanding in each case was that awarding of the high school diplomas was dependent on the student's success during his first semester at college.

Results of that first semester, released today by Registrar Hoffman, show that 42 of the 67 who completed the semester passed all subjects, 9 failed not more than three credits, 11 failed more than three credits but less than half of the number scheduled, and

Among the 17 organizations included in the fund are United Service Organizations, United Seamen's Service, War Prisoners Aid, Belgian War Relief Society, British War Relief Society, French Relief Fund, Friends of Luxembourg, Greek War Relief Association, Norwegian Relief.

Polish War Relief, Queen Wilhelmina Fund, Russian War Relief, United China Relief, United Czechoslovak Relief, United Yugoslav Relief Fund, Refugee Relief Trustees, and United States Committee for the Care of European Children.

only 5 failed half or more of their credits.

These statistics compare favorably with the record of any freshman class during the last decade, Hoffman observed, and they offer proof of the value of the program proposed by the State Department of Public Instruction last December.
