Penn State Sends Films To Australian Government

Australian government recently purchased duplicates of five color motion picture films photographed and used by the agricultural extension service of the College in its state-wide educational program. J. M. Huffington and G. F. Johnson, of the agricultural extension staff, photographed the pictures in color. They show how some of the largest and most successful Pennsylvania vegetable growers produce carrots, cabbage, tomatoes, and other garden crops of highest quality. In Australia the films will be used to assist in the war effort to increase commercial vegetable production.

Lininger Lectures At Library Reading

In the fifth in the present series of Wednesday Library Readings, Dr. F. F. Lininger, director of the agricultural experiment station at the College, read from Liberty Hyde Bailey, famed horticulturist, sociologist, scientist, philosopher, and one-time Dean of the New York State College of Agriculture at Cornell University.

"Dean" Bailey, explained Dr. Lininger, was the first professor of horticulture in the United States at a time when the agricultural colleges were just getting under way. He is noted for his horticulture of more than 150,000 specimens at Cornell.

Dr. Lininger read from Bailey's address, "The Scientific Spirits in a Democracy," which shows his love of country life and his faith and confidence in farm folk.

The last of the Library Readings taken from education philosophies pertinent to present day thought will be given Wednesday by A. O. Morse, assistant to the president in charge of resident instruction.
