

Collegiate Review

The forthcoming issue of Life, containing a coverage of the Bowdoin scenes is being eagerly awaited by all connected with the Bowdoin College world. The **Orient** reports, "Judging from the duration of the photographer's visit, it would seem plausible that the editors of Life are planning quite an extensive story on the college."

Credit for the most initiative and aggressiveness in connection with the Life affair must be given to the Betas there. From all appearances, the Beta president was the self-appointed right hand man and confidant of the Life expedition. Who conceived the idea of taking some "shots" at Vic's, the local Skellar, it is not known, but when the photographers arrived, there sat the Betas in all their glory earnestly guzzling beer, having received a helpful tip-off.

Also from Bowdoin we hear of the problem of enforcement of freshman customs. This problem has diminished considerably since BMOC Pete Curran's explanation of two weeks ago. Realization of the fact that these rules are an established Bowdoin tradition and not merely a whimsy of upperclassmen makes it considerably easier for the Frosh to observe them. Traditions are the essence of Bowdoin life, and the hundreds of Bowdoin men who will someday return from the services must not find that any of these traditions have been allowed to die out.

The Southern Cal Trojan is interested in the correct attire for "campus sailors." To be a "campus sailor," the well-dressed sailor wears attire befitting the nature of the campus rounds he

is going to make. Always this attire is the natty white costume so favored among sea-faring men. The hat is white with the flaring sides turned up in cowboy fashion. From his hat may dangle the charming little clothes stops that designate those with the desire to be different.

The conventional white jumper will be worn. As with automobiles, the balloon tire effect of one's jumper sleeves adds distinction. It not only makes the one stripe on the cuff less conspicuous, but it also serves as an excellent place to hide small notebooks, pencils or corkscrews. For all his sophistication, the "campus sailor" remains a boy at heart and delights in carrying around with him such trifles. Then too, ballooned sleeves are more or less essential when one lacks a handkerchief.

In the matter of trousers, a pleasing variety is noted. The tight fitting type with the flaring bell-bottoms is much favored and considered chic in intercollegiate circles. Though 13 buttons are correct, one may pass with a good many less. The trouser bottoms should well cover one's shoes. Not only is this economical in regard to polish, but permits those so inclined to stand inspection barefooted. If the latter method of dress is chosen, one would do well not to snap one's toes when the inspecting officer strides by.

Socks may or may not be worn. If worn, a laced effect—that is, a hole here and there placed about in an informal manner adds a definite touch. Garters should always be worn whether with or without socks. It is the fine points of one's dress that counts.

The wearing of red flannels is bound to excite comment among discerning coeds. It adds color to jumper.
