

Faculty Members Attend Wilson Diamond Jubilee

Four members of the College faculty attended the Diamond Jubilee celebration at Wilson College from October 12-15. Dr. F. E. Krauss represented the Classical Association of the Atlantic States; Dr. F. W. Owens, the American Mathematical Society; Dr. H. W. Weigel, the Pennsylvania State Modern Language Association; and Dr. Mary L. Willard, the American Chemical Society.

WSGA Rules College Coeds

Every coed at the College is a member of the Women's Student Government Association, the organization which controls almost all matters of woman student life. WSGA is made up of six separate bodies, each with its own function. Senate, the executive body, is composed of a president, vice-president, secretary, treasurer, senior senator, two junior senators, sophomore senator, two freshman senators, town senator, independent senator, a Collegian representative, the chairman of Judicial, and the Panhellenic pres-

College Publications Welcome Freshman With Writing Ability

If there are any freshmen—male or female—who have the time, the inclination, and the talent to write, they will find Penn State campus overflowing with ideas. And the glad recipients of these freshman masterpieces are Collegian, Engineer, Portfolio, La Vie, and the Frosh Handbook. If you should pass the south entrance to Carnegie and notice the Daily Collegian sign printed above the entrance, you may wonder why the newspaper only comes out twice a week. But Collegian used to be a daily and those who still remember that time are looking forward to seeing it back on its old schedule.

Advertising Candidates

Anyone interested in working on the advertising staff of Collegian is asked to attend the first candidate's meeting in 8 Carnegie Hall, 7 p. m., Monday, November 4.

For the time being, however, Collegian will continue as a semi-weekly, publishing all the latest about campus activities, and obtainable at the Student Union desk of Old Main. Anyone interested in writing may try out as candidates.

To be on the staff of the Penn State Engineer, you must be either registered in the School of Engineering or a chemical engineer in the School of Chemistry and Physics. The magazine is a semi-technical monthly and publishes scientific articles of all kinds. Guest feature writers may have their articles published by contacting the feature editor.

To be on the staff of Portfolio, the only requirement is submission of a feature article, poem, or short story which is accepted for publication. All types of materials are acceptable for the magazine, which is published irregularly, about every six weeks.

La Vie will welcome talent from fifth and sixth semesters, at which time the candidate will assist in the preparation of data for the yearbook and will then be voted upon by the members of senior board. If the candidate is accepted, he will become a senior board member in turn.

Frosh handbook, published yearly for first semesters only, presents data and facts of all sorts which the freshmen will want to know concerning the rules and regulations of the College and other information pertaining to its history, customs, and traditions.

A bachelor's main troubles are that he has no wife to blame for them.

Dotterer And Son Resume Chess—War's Won

A chess rivalry interrupted by war has been renewed by a college professor and his son. The professor, Dr. R. H. Dotterer, teaches philosophy at the College. His son is Capt. John Dotterer of the Army Medical Corps. Son and father have been playing chess since 1919. "My big ambition," Captain Dotterer says, "is to get to the place where I'll be able to give father a handicap." For the first few years, the captain sported a nice handicap, but it decreased as his skill increased, and now it's all-even.

When the son entered military service in 1943, the Dotterers continued to play via the mails. Their cross-country game ended, however, when Captain Dotterer was shipped overseas and Army censors evinced unusual interest in their symbols.

While on duty in seven European countries, Captain Dotterer accumulated five battle stars but was eager, immediately after his return to this country, to renew the chess rivalry with his father.

The captain won the first game they played, but Professor Dotterer still was reluctant to give him full credit. "Dad has the perfect system," the Army medico explains. "When he wins, all is well, but when I win he reminds me that he has taught me all I know about chess."

Physics Prof. Returns From Overseas Tour

Marsh W. White, professor of physics at the College, recently returned from a six-weeks' tour of Europe where he made a personal report for the New Developments division of the War Department's general staff.

Prof. White has been on leave from the College for the past year as special consultant for this division.

In his aerial tour of Europe Prof. White made a study of the number and quality of men in the Army, with particular regard to their technical and professional qualifications in chemistry, physics, design engineering and other fields.

He visited headquarters and colleges in England, France and Germany.

Purpose of the trip was to help the army determine how to assign personnel now in service to places where they would be of greatest use.

Prof. White revealed that many of the men will be returned to the United States to work in special research projects assigned to colleges, to supervise such work, or to engage in special study.

Some regular army officers, he said will be trained in basic science at the graduate level, sent to colleges, and used in future emergencies.

About 250 Naval Reserve Officer's Training Corps candidates and 400 members of the Army Specialized Training Program are stationed at the College.
