

Chapel

Choir Presents Easter Music

The Chapel choir under the direction of Mrs. Willa Taylor, professor of music education, will present numbers from the Easter section of Handel's "Messiah" at their annual Easter Musical Chapel service in Schwab auditorium at 11 a. m. Sunday.

The program offers "Behold, the Lamb of God," "He Was Despised," "Surely He Hath Borne Our Griefs," "Lift Up Your Heads, O Ye Gates," "I Know That My Redeemer Liveth," "Since By Man Came Death," and "Worthy is the Lamb." Soloists for the occasion will be Jacqueline Heckert, soprano and Paulette Minner, contralto.

Organ selections to be played by Irene Osborne Grant include, Prelude, "Marche Funebre et Chant Seraphique" by Guillemant; Offertory, "Jour de Printemps" by Kinder; and Postlude, "Tocatta on 'Jesus Christ is Risen Today'" by Snow.

Chaplain John Henry Frizzell will officiate.

Four Brothers Study Animals

Recent appointment of James A. Christian, of DuBois, as an instructor in animal husbandry at the College disclosed a four-brother team, all studying livestock at the College.

James, along with his twin-brother, John, received his degree in animal husbandry in December, 1942, and a month later entered the Army. Following his discharge last Fall, James started graduate work and assisted with classroom work during the Fall semester. His new appointment makes him a full-time instructor, although he plans to continue his graduate work.

His twin-brother, John, is also doing graduate work towards his master's degree in animal husbandry, while another brother, Lynn, following military service, has resumed his undergraduate studies in animal husbandry. The fourth brother, Ross, interrupted his undergraduate work to serve in the Navy, but plans to return to the College as soon as he receives his discharge.

Seibert To Discuss TB At Annual Curie Lecture

"Researches in the Chemistry of Tuberculosis" is the subject to be discussed by Dr. Florence B. Seibert at the annual Marie Curie lecture at 119 New Physics April 29.

Dr. Seibert is an associate professor of biochemistry at Phipps Institute at the University of Pennsylvania, and is widely known for her isolation of the purified form of tuberculin, now used in detection of tuberculosis infections.

The Little Man

Meet Tom Payne's Competitor

Ed. Note:—This is the third in a series of features on the little men on campus, better known as LMOC's. We thought you'd like to know them.

By LOIS MARKS

Today there is being born in State College, via the Hillel mimeograph, a new paper, the house organ from Common Sense, called, unusually enough, "Common Sense," and entering into competition with Collegian, the CDT, and Thomas Payne.

We get this information by our special grapevine, which functions much like an AP wire, lots of information and no caps. Being an eager Collegianite, and anxious to preserve our power as the press, we tracked this rumor down to Sunnie Milner, the president of Common Sense.

Sunnie is our buddy, a vivacious little blue-eyed brunette with a grand sense of humor and a magnificent record collection. She's an eighth semester soc major and made a three-point average last semester, which she tries to keep undercover. But we never suspected her of perfidy.

"Of course we're not trying to run you out of business. It's just our publicity committee on the job," Sunnie said. "We're just trying to bring our activities to the eyes of the students. It's sort of an open forum to discuss the issues of the moment. It's a medium through which all our committees can report what they're doing. More or less an exchange for student opinion, throughout the nation as well as on campus; we're trying to keep in touch with the other youth organizations and to bring it to the eyes of State College."

Max Lerner's Responsible

Common Sense began its life in 310 Ath, Sunnie's room, through a midnight discussion after a Max Lerner lecture. It grew out of a hot discussion on just what students could do to influence public opinion. The idea of a campus organization to foster dis-

cussion and action on important issues caught on with "the people who think" and Common Sense was born.

"Common Sense's function is to bring global, national and local issues to campus," Sunnie explained. "We're trying to combat the apathetic atmosphere which is almost inherent in a college town. We don't want to influence student opinion; we're just trying to create some. The students should have some idea that there's a working, breathing world outside of the Nittany Valley."

We asked Sunnie just what they intend to do about the world at large. We knew of Common Sense as merely an organization that started the book exchange.

"Well," she explained, "There are lots of things we can do. We can send petitions, telegrams and letters to legislatures. We cooperate with thinking groups on campus, like the AVC and the Citizen's Atomic Bond Committee. We can try to get the issues in front of the students, by our paper, for example."

"Why, right now we're putting on a forum on the atomic bomb. That'll be on the 16th. Duncan, Brewster, Mrs. Robinson and Reverend Eades and probably some one who worked on the bomb will cover the scientific, political, religious and social aspects of the problem. It will be an open forum to let everyone and anyone have their say."

And That's Not All

"We're doing other things, too. We're conducting a research project on student wages, we're also trying to get a weekly news commentator for WMAJ. Our cultural committee is holding a series of record concerts just about every other Sunday, from Bach, to Bal-lads, to Boogie. And quite a few people are out for it, too. Say, do you know . . ."

And then we heard a lot of names, familiar and unfamiliar. People on campus are getting more inter-

ested in the world, and the ex-GI's especially don't intend to get out of touch just because they happen to be in State College.

Sunnie is quite pleased with the success of Common Sense, and also a little scared. But she's not the kind of kid to go around courting the famed "Big Dealers." We somehow think of Sunnie more as a kid who will get us a second cup of coffee at dinner than as Madame President.

Sunnie's been all around in the Liberal Arts School. She's tried psych and journalism before she finally hit on soc.

"I did have a burning ambition to be a journalist," she said, looking scornfully at us as the horrible example, "but after I attended three WCTU meetings for Journ 27, my burning ambition was sort of squelched."

This dispelled all our fears of permanent competition, so we thanked Sunnie, borrowed a record and left quietly.

Cosmopolitan Club

will present a South American program at its meeting in the Grange Playroom, tonight at 8. The meeting will be in accordance with Pan-American Day, Sunday, April 14, announced Salvador Cortes, chairman of the

Ex-GI Information

Veterans who have subsistence allowance checks due them prior to March 1, are requested to report to the veterans administration as soon as possible.

The first of the single housing units for men students is almost completed. It is planned to have 14 of these units when the project is completed. Each unit will accommodate 60 men and will have a dining hall.

The extension of Thomas Drive from E. College avenue to the fertility plots is being completed. The new trailers will be ready for occupancy after they are reconditioned. The playground for the children of Windcrest is finished, and the remaining grounds are being landscaped.

LETTERS ARE FUN... With Personalized Stationery

Do you have a list of long overdue correspondence? Why not "get in the writing groove" . . . it will be easy when you see our gay colored Colonial's stationery . . . personalized especially for you.

There are pretty floral designs, decorated with your personal monograms or name to harmonize with the rich colors of the paper.

COMBINE YOUR COLORS

Choose a striking yellow tint background with floral and name decorations in forest green, an alluring combination . . . crispy white styles . . . Peach, Melba, as delightful as its name . . . Larkspur Blue, bordered in white (you could use white ink for your message) . . . many exclusive styles and ALL personalized to match with your name in a distinctive style.

COME IN TODAY

We're proud of our new personalized stationery and you will be too . . . make your choice from our book of selections. The styles are ultra modern, for the discriminating . . . are certain to make your writing fun!

Laboratory in a Birch Thicket

This thicket of birch trees is one of the Bell System's scientific workshops.

Here our scientists have strung telephone wires through the crowded branches to learn just how much tree rubbing and abuse the protective coverings and insulation on new types of wire will stand.

Important? With more than fifteen million insulated "drop wires" connecting home and business telephones to nearby poles, we've got to be sure that the wire we use is the very best that can be produced.
