

Student Jailed For Homicide After Windcrest Shooting

John Edward Galloway, 23-year-old chemistry student, was in the Centre county jail today, facing a homicide charge in the slaying of his 20-year-old dark haired bride of a month.

Catherine Diamond Galloway, formerly of Nanticoke, who married Galloway September 21 after a college romance, was shot and killed early Saturday as she was stroking a kitten in the Galloway trailer at Windcrest.

Chief of Police John R. Juba, who brought a charge of homicide against Galloway before Justice of the Peace J. D. Hart, said the former Army Air Force flight engineer told him he had pointed a .32 caliber automatic at his wife without realizing what he was doing.

The bullet entered Mrs. Galloway's chin, came out her neck and re-entered it and lodged in her spine. She was dead at 1:45 a.m. when Dr. H. T. Dale arrived at the scene.

After the shooting, Juba told Hart at Galloway's arraignment, the veteran rushed to a neighbor's trailer and summoned aid. David Jones called the physician while Mrs. Jones called a nurse residing nearby. Galloway, meanwhile returned to his wife.

The student, who is a junior in chemistry and the son of Mr. and Mrs. A. E. Galloway, of Harrisburg, was quoted by Juba as saying he had drunk five bottles of beer at a fraternity house with his wife before the shooting. Before that they had had dinner and seen a movie.

When first questioned by Juba, Galloway told police the shooting was accidental and even later insisted it was not intentional. No motive for the shooting was given by the authorities.

Neighbors reported the couple had acted like "happy newly-weds" while Galloway's mother said "they had seemed so happy together" only a week ago.

Galloway re-entered the College in November, 1945, after two years in the service. His wife had attended as a student in the School of Liberal Arts for four semesters but stopped school last February. She was the daughter of Louis Diamond, a Nanticoke confectioner.

Late AP News

WASHINGTON—The OPA is preparing another wholesale removal of price controls. The new decontrol order may be issued late this week.

The OPA estimates that price controls still affect about 44 cents of each dollar the average family spends on living costs. The agency has not indicated how much more of the cost of living items would be removed from ceilings in the coming decontrol order.

WASHINGTON — President Truman declared that there would be no coal strike. The statement was made after the government agreed to a conference with John L. Lewis. The chief of the mine workers has announced that the existing contract would remain in effect during the negotiations.

NEW YORK—The White Russian foreign minister, Kuzma Kiselev, has made a sharp criticism of American policy in China. Addressing the United Nations General Assembly, the White Russian foreign minister attacked the presence of American troops in China. He asserted that our policy in China is not calculated to maintain peace in the Far East.

CHINA — Government troops are driving toward the important Manchurian port of Dairen. Travelers returning from that vicinity say there are many Russian troops in Dairen, a free port by treaty.

Dr. Morgan To Discuss Problems of Parenthood

Fathers and mothers living in Windcrest will have a chance to discuss their parental problems at a meeting of parents to be held in 14 Home Economics, from 7:45 to 9 o'clock tonight. Dr. Winona L. Morgan, associate professor of home economics, announced today.

The meeting is the first of a series planned by the Child Development and Family Relationship division of the department of home economics. Dr. Morgan explained. Types of problems that parents wish to discuss at future sessions will be studied at the meeting.

State to Offer Geochemistry

Penn State has introduced a course in geochemistry and is believed to be the first college in the country to offer training in this new science.

To carry out resident instruction for students enrolled in the new course, and also to conduct practical research in the development of new mineral resources, a laboratory of applied geophysics and geochemistry has been established under the direction of Dr. Sylvain J. Pirson.

Geochemistry is a new field in this country. Dr. Pirson explains, pointing out that Russia probably is 25 years ahead of the United States in this work, and has produced some outstanding modern geochemists.

The science of geochemistry, according to Dr. Pirson, aims at studying the laws of distribution of mineral elements in the earth. The application of the principles of geochemical processes and associations is necessary for long range forecast of the expected future reserves of essential industrial minerals, and helps to conceive and develop new technological means for prospecting and developing hidden mineral reserves.

The course is theoretical in nature and is designed primarily for juniors enrolled in the new curriculum of geophysics and geochemistry.

All Male Bridge Club Turns Up One Short At Initial Gathering

A fourth for bridge is needed, it was discovered last Thursday as thirty-nine men showed up for the first meeting of the Men's Bridge Club.

The meeting was scheduled for organizational purposes, and five members were appointed to a program committee to direct activities until permanent officers are elected. The program committee consists of: Ray McKinley, Larry Röststein, John Stenger, Howard Stethers, and Lewis Van Antwerp.

The following things were decided upon before the gathering took to the card tables:

The program committee is to procure a permanent meeting place as 405 Old Main was declared unsuitable.

The club will meet every Thursday, at 7:30 p.m., with one meeting a month to be set aside as distaff day. On this day, to be named later, women will be allowed to participate.

At a later date the WRA Bridge Club will be contacted in order to arrange joint meetings. Mr. Ray Conger then announced that the School of Physical Education will pay for the boards used in playing duplicate bridge.

Local AVC Chapter Held Outstanding By State Convention

A Penn State student, Edward Banyai, is one of the new members of the Pennsylvania State Planning Committee of AVC. As a result of elections held during the AVC State Convention in Harrisburg this past weekend, Banyai will be head of AVC in the North Central Region of Pennsylvania, an area comprising one-eighth of the state.

When the three day convention ended on Sunday, tribute was paid by all the delegates to the excellent leadership the Penn State delegation gave to the convention. A majority of the revisions of the state constitution were proposed by Earl Kemmler, who was spokesman for the College delegation. All of the proposals made by the College representatives were accepted by the convention, many times by spontaneous applause.

Another announcement released after the state meeting was over is that a conference of AVC collegiate chapters in the Middle Atlantic Region will be held in State College on November 24.

According to Kemmler, local AVC chairman, the purpose of the gathering is to discuss problems confronting student and faculty veterans. Several outstanding educators are now being contacted to speak at the conference, he added.

Delegates to the convention were Earl Kemmler, Edward Banyai, Gayle Geahart, Maur Levan, Kay Challenger, Virginia Minshall, Francis Isenberg, Royce Nix, and Lewis L. Jaffe.

Election Day

In order to aid students to vote in the Congressional and gubernatorial contests next Tuesday, Collegian will daily publish, free of charge, a list of rides available near election day to different districts in the state.

To perform this service, Collegian is asking for the cooperation of all students who have cars on campus. If you are driving home next Monday or Tuesday and have space available for passengers, please call the Collegian office and leave the following information:

1. Where you are going.
2. The date you will leave.
3. Your name and phone number.

Skyview Shows Grandeur Of College Autumn Scene

Old Main, proud and quiet, looked out over a sunlit campus on Saturday afternoon. Her slim tower didn't seem to be trying to dominate the autumn-colored scene. She was just part of a giant painting.

To her far right, fresh and green, lay the golf course, its surface pocked with grotesque sandtraps. And behind Old Main, the empty seats of the stadium faced an empty football field. All of Rec Hall that could be seen was the "State College" and other air-markings painted on the roof.

Tiny Model Cows
To her left, there could be seen fields with tiny model cows and tinier chickens, their heads working busily in the late grass. Windcrest wasn't a trailer camp. It was an army of tiny beetles, their silver backs gleaming in the sun, their rain-streaked hides hidden in shadows.

And Pollock Circle. It wasn't a group of temporary dormitories. It was only a group of child-drawn "T's," strewn in a circle. And above everything, sunning herself with a gay tweed shawl about her worn shoulders, was Mt. Nittany, perhaps brooding silently on her many "sons" who have "gone out."

Not Catalog Viewpoint
No, the College catalog doesn't say it that way, for it was written from the ground. From the air,

State Appropriates 2 Million for Buildings

Approval of the construction of five additional new buildings at the College with a total cost of over two million dollars has been received from the office of the Governor, Ralph D. Hetzel, president, announced today.

The five new construction projects are: a Plant Industries building, \$625,000; a wing for the Mechanical Engineering laboratory, \$515,000; a Mineral Industries building, \$550,000; the first unit of a new Armory, \$327,000; and expansion of the Power Plant, \$305,000.

These buildings, Dr. Hetzel said, are in addition to the two announced nearly a year ago, under the terms of Act 72-A, allocating funds for new construction, repairs, and renewals at certain State institutions, and are also provided for therein.

Last October, Governor Martin announced that \$1,296,000 had been earmarked for the College for the construction of a general classroom and laboratory building costing \$750,000 and a wing to the Recreation building costing \$546,000.

Plans for the construction of the five new buildings, said Dr. Hetzel, are now in the hands of the architects. The Secretary of Property and Supplies who is responsible for this construction expects that plans and specifications will be ready to submit to contractors for bids sometime in December.

"These projects," Dr. Hetzel said, "were selected from a list which was recommended to the Governor by the Board of Trustees. They were selected by the Governor upon recommendation of the Superintendent of Public Instruction, in accordance with the procedure prescribed by law."

Coed to Reign At Belle Hop

One coed will be assured of a room for Pitt Weekend in one of Pittsburgh's leading hotels and for free, too, when the Junior Greater's Club chooses a "Belle" for their Belle Hop Saturday night in Recreation Hall.

Penn State's future hotel managers of the Hotel Administration course will play host to Fordham weekend dancers with Glenn Michael's orchestra from Wilkes-Barre furnishing the music.

The winner of the title and free room will be announced at the dance intermission, according to George Earnshaw, chairman of the event. Details of the selection will be announced tomorrow.

The theme of the dance will be appropriately hotels, and decorations are being planned to transfer Recreation Hall into a Grand hotel.

Michael's orchestra has created a sensation, Earnshaw disclosed, by playing in the Glenn Miller style. Consisting of all ex-GI's, the group contains 11 musicians plus three vocalists and specializes in sweet stylings.

William Kraus Elected Secretary of Blue Key

William Kraus was elected secretary of Blue Key at a meeting of the society in 405 Old Main, Thursday evening. Kraus replaces Larry Foster who had resigned from the position.

Dick Lose, president of Blue Key, had appointed Stan Roth to chairman a dance committee making plans for an affair some time in December. Also chosen to the committee were Tom Botsford and Dick McAdams.

Blue Key men will continue to act as judges and assistants at all times at all home cross country meets, it was revealed at the meeting.

News Briefs

Scarab Taps

Scarab, architectural professional honorary, held its Tapping Smoker in the Corner Room and tapped nine students: Herbert C. Anderson, William Dickson, Edward M. Ghezzi, Kenneth W. Holt, E. Lenker, Harry A. McMillen, H. F. Mumma, Jane F. Whitby, and R. B. Widder.

Players Hold Tryouts

Penn State Players will hold tryouts for Moliere's "Imaginary Invalid" in Schwab Auditorium at 7 o'clock tonight, announced Director Reifsnider.

There are 13 speaking parts, 9 men and 4 women, he said, and tryouts will be held later for the dancers.

Radiant Energy Lecture

"Expanding Applications of Radiant Energy" will be discussed by S. G. Hibben, director of Applied Lighting for Westinghouse, in 110 Electrical Engineering at 7:45 o'clock tonight. The lecture is sponsored by the Illuminating Engineering Society.

2 Ag Eng Conferences

The department of agricultural engineering will be host to two conferences, the frozen foods conference and the Pennsylvania section of the American Society of Agricultural Engineers, during the coming week, announced R. S. Crist, scribe for the Ag Eng Club.

Library Display

Famous Battles of American History, a collection of lithographs presented by Dr. Asa E. Martin, professor emeritus of the history department, is on display at the Main Library this week.

X-GI Club Movies

Moving pictures of the Penn State-Michigan State football game played at New Beaver Field October 19 will be presented by the X-GI Club in 121 Sparks at 8 o'clock tonight, announced Fred S. Barvouek, social chairman.

Plane's Insignia

from Old Main. The pilot of the plane was Henry Myers, president of the club, who earned his private license during the summer.

On the side of the Piper Cub, dual-control trainer, was the club's insignia pictured here. Designer of the insignia, and winner of the club contest and a free ride this summer, was Mrs. John Herring, wife of a Petroleum Laboratory worker.
