

MI's Enjoy Life In Outdoor Lab

On the other side of Tussey Mountain about eight miles from State College, surrounded on three sides by mountains over 3400 feet in height, lies a broad stretch of swamp and forest land, popularly known as Stone Valley.

A sportsman's and naturalist's paradise, this section of the valley is so dense with white pines and hemlocks that the sun's rays can barely penetrate it. The Indians fought many tribal wars over the possession of this region which is still thickly infested with bear, deer, grouse and other game. Here also the timber wolves made their last stand in the state.

This area of scenic beauty and awe-inspiring grandeur is the outdoor laboratory of students at the College who take courses in geologic surveying and field geology during summer session. Here they contact nature in the raw while making geological maps, writing reports, and studying rocks, fossils and minerals at first hand.

Within a radius of only a few miles in this area, sedimentary rock formations of several geological ages lie exposed, revealing the secrets of the past to scientific study. Also near here are rich deposits of iron, lead and zinc ores, glass sand, clay, and limestone which may be studied.

At the camp, the students enjoy the comforts of home with the freedom of camp life. In the main building is a combined dining and living room on the west end of the first floor. The rest of the space on this floor is divided into an office, an instrument room, a kitchen, and service rooms. On the second floor is a classroom, a small library and study room, a laboratory, and a drafting room. Aside from the main building, scattered among the pines, are eight small cabins which are the dormitories.

For recreation, a mushball diamond, and badminton and quito courts are provided. A "swimming hole" is within walking distance and Whipple's Dam is only 10 minutes drive from the camp.

After seven weeks of study at the MI camp, the Geology 72 course concludes with a week's 1000-mile inspection trip to important mineral localities in Pennsylvania, Maryland, Delaware, New Jersey, and New York. The party usually disbands at the Museum of Natural History in New York City.

Twenty-one students were enrolled in the course this summer, including two women students from the College—Doris Bye and Selma Moses. There were also three Chinese students and one Brazilian student sent here by their governments.

CLASSIFIEDS

All classified advertisements must be in by 4:30 p.m. day preceding issue. Prices are: 40c for one insertion, \$1.00, three insertions, 17 words or less. Call Collegian, 711.

SINGLE ROOM available. Pollock Circle. Occupant wishes to move to Winderest. Leave word Collegian office. C. M. Thompson.

SINGLE ROOM Pollock Circle available. Present occupant going fraternity. Contact Jim Sims, Building 4, Room 5.

COUPLE WANTS RIDE to Syracuse or vicinity, Thanksgiving Day or Wednesday night preceding. Share expenses. Call 2534.

WANTED—One ride to Pottsville, Shenandoah or vicinity on Wednesday morning or afternoon. Call Bill, 2210.

PASSENGERS WANTED to Buffalo, N. Y., Wednesday, Nov. 27th. Phone 4326.

RIDE WANTED to Cleveland, Toledo, or Detroit this evening. Will share expenses; can drive. J. Winton, Bldg. 11, Room 34, Pollock Circle.

RIDERS WANTED to Pittsburgh. Leave Wednesday noon, return 9 o'clock Monday morning. Len Freedman, 3960.

LOST—Kappa Alpha Theta pin; name on back. Joyce Parker, Theta House, 4926.

WANTED—Ride to Allentown, leaving Wednesday noon. Call Jane Schlosser, 4643.

LOST—Pair of shell frame glasses, November 21, East Beaver Dr. Zimmerman, Harrisburg, name on case. Call Boalsburg 2031.
