Psychologist Maintains

Dr. Herman G. Canady, noted Negro psychologist and head of the psychology department of West Virginia State College, said Tuesday night that the only differences among peoples of the world are cultural differences.

"Unless man can control these cultural differences, he will destroy himself," he said. Dr. Canady attempted, before an audience which jæmmed 121 Sparks, to show that

there are fundamentally no biological or psychological differences among peoples of the world,

and therefore cultural differences -the only possible remaining difference among human beingsare the sole distinguishing factor.

"Cultural differences which divide mankind are learned, and can be unlearned," he said. Similarities between the existing hu-man being are much greater than the differences, he said, and thus "people differ in outer layer
