Open Minds
—for open Country

TELEPHONE men are hard at work extending and improving telephone service in rural areas served by the Bell Companies. They're pushing a \$100,000,000 three to five year program to give telephone service to all who want it just as fast as possible.

To do this they had to look beyond conventional telephone practices. New techniques and new and improved equipment had to be planned, developed and proved. Now they are furnishing telephone service over rural power lines, over new steel wire that requires fewer poles per mile, over insulated wire that can be buried directly in the ground and by means of rural radio.

Men who approach every problem with open minds . . . who are guided by ingenuity and resourcefulness rather than by established method . . . find telephony an ever stimulating and interesting career.
