Kershner Charges America With Wasting Vital Foods

"I'm glad the people in Europe don't know how well we are living, or their friendly feelings toward us would change," said Dr. Howard Kershner, vice-chairman of the Save the Children Federation, Inc., speaking to a group of students and townspeople recently.

Dr. Kershner has been in Europe for the past eight years doing relief work for the Federation, and after returning in December said that it was impossible for the comfortable and well-fed Americans to realize the impossible hardships that Europeans are enduring.

Americans waste almost 40 percent of all food they use, according to Dr. Kershner. If they mobilized their waste products, he said, there would be plenty for us as well as the people in Europe.

"For example," Dr. Kershner said, "everyone should have 20 pounds of fats per year. In the United States we have 44 pounds; in Europe, they have 7 or 8."

"Two years ago, the food ration was about 400 calories a day for four to five months," the speaker continued. "This is about one-eighth of the amount necessary to preserve life. Men went from

AVC Middle Atlantic Representatives Convene To Solve Veteran Problems

Among the 48 college chapters in this five-state region will be delegations from George Washington University, University of Pitts-

Many of the problems that are to be discussed have been or are being solved here at the College, Earl Kemmler, AVC chairman, said. Local AVC members will exchange solutions with the visiting delegates, he added.

Powers' choice of Marilyn Globisch last Spring as Queen of the Spring Nocturne Dance was based on these attributes, said Stober. "In accordance with these aims, a small group of finalists will be interviewed before the final Penn State choice is sent in."
