## Swim Team Places Third in Nationals

The women's swimming team placed third in the National Intercollegiate Telegraphic Swim Meet, according to a telegram received by Miss Marian Whallon, varsity coach.

The team placed first in the eastern region with a score of 41 points. Second place went to Penn Hall College with 35 points. Ten

colleges participated in the region meet.

The 75-yard relay, 100-yard relay and individual medley teams took first place in the nationals. Ruth Black, Judy Klein and Lee Ann Wagner swam the 75-yard relay in 45.4 seconds, topping last year's 46.5 record, also set by the College.

The 100 yard free-style relay team, Ruth Black, Judy Klein, Lee Ann Wagner and Jacqueline Zivic, took first place, clocked in 53.3 seconds.

Ruth Black, Judy Klein and Jacqueline Zivic took top honors in the individual medley. Their time was 53 seconds.

Lee Ann Wagner, swimming in telegraphic competition for the

first time, took third place in the 40-yard crawl and fourth place in the 100-yard crawl. Swimming the 40-yard event in 22.3 seconds, Miss Wagner broke the last year national record, 22.4, set by Hattie Ludwig at the College.

Ruth Black, a former Canadian

amateur champion, took fifth place in the 40-yard back stroke, clocked in 27.5 seconds. She topped her 28.4 second time which last year tied for third place.

Judy Klein, former U of P record breaker, tied for fifth place in the 100-yard breaststroke.

## His genius gave wings to words

It was an historic moment. Alexander Graham Bell's telephone had just spoken its first words—"Mr. Watson, come here, I want you!"

That evening in Boston—March 10, 1876—Dr. Bell's crude instrument transmitted his voice only to the next room. But out of it was destined to come a whole new era—the era of quick, easy nation-wide telephony, of radio telephony in all its varied forms, of talking pictures, voice and music reproduction systems and electrical aids for the hard of hearing. Few inventions have played a greater part in shaping the world we live in!

Since 1877—just one year after Bell's long experimentation was crowned with success—it has been Western Electric's privilege to help carry forward his great idea which gave wings to words. In that year Western Electric made its first telephone. More than 45,000,000 have followed it—over 4,000,000 of them in 1946 alone.

Today, from coast to coast, in factories, offices, distributing houses and central office installation crews, there are more than 110,000 Western Electric workers. Imbued with the Bell System spirit of service, they are helping to provide equipment in record quantities to meet telephone needs far beyond any envisioned by the inventor.

Alexander Graham Bell

This year marks the 100th Anniversary of Bell's birth in Edinburgh, Scotland, on March 3, 1847. From early youth, he was keenly interested in aiding the hard of hearing. He became a teacher of "visible speech" when 18 years old.

This work led to experiments with "telegraphing" sound, out of which, in 1876, came his greatest invention—the telephone.

Dr. Bell was a great humanitarian as well as a great scientist. His accomplishments—in aiding the deaf, in communications, in aviation and other fields—were outstanding. His rich life—which had an incalculably great influence on the world—came to an end on August 2, 1922.
