## Instead Of Hospital Hall

These modern times are mighty trying on the expectant father. They've found ways of helping Sir Stork deliver his "bundle of joy" but no one has come up with a remedy for "future father fever.

Today in California there is an anxious mother-to-be equipped with both pink and blue booties and two sets of names.

Today in State College there is a student, Donald Keagy, who is equipped with nothing but a moldy old slide rule but who is also very anxious about the whole affair. He's soon to be a future "Penn State Pappy."

Pacing up and down a hospital corridor 3000 miles to the west would be a welcome opportunity for this guy who has to be satisfied with pacing up and down the mall between classes.

Not only that, but there's the telephone strike to contend with. "Pop" is confident that if there is a male supervisor at the switchboard in San Jose who has gone through the "mill," the anticipated call is sure to be deemed an emergency.

Upon his return to the States, Bolte became chairman of the then loosely or-ganized American Veterans Committee. He has held this position since January 1944.
