

# Coed Teaches Hazel To Be Glamorous Cow

By L.C. BLOOMQUIST

Penn State's Inka Hazel is one of the more glamorous bovine coeds to enter the Dairy Exposition tomorrow afternoon, says Jacqueline Solomon, 6th semester LA student who has groomed the cow and taught her to pose.

Hazel, daughter of Sir Oshorn-hale Chieftain Inka Ormsby and Penn State Veeman Hazel, belongs to the three generation Holstein family owned by the College.

Despite "Jackie's" inexperience, she does a good job of handling Hazel. She is teaching the cow to pose for judging, with head up, front feet 10 inches apart, and one hind foot ahead of the other, like the cow pictured on the label of the condensed milk can. Posing "square," as the Ag students term it.

One important thing in getting Hazel ready for her big moment at the livestock show is that of teaching her how to walk. Gracefully, that is. And that's where Jackie's fun begins.

"She goes too fast and swings her head from one side to the other when I try to lead her. She should walk slower and space her steps," says Jackie.

"When we get near the barn, she humps her back up and practically drags me toward the door. And then we get stuck; she and I can't get through at the same time."

"Hazel is nervous, too," says Jackie. "When I first came, she wouldn't let me put her halter on or work around her horns. It took about a week for us to get to know each other, and she still doesn't like too many people around."

"Talking helps a lot. Hazel really listens to what I say. That's why I think she's so intelligent."

Hazel knows how important good grooming is to a glamour girl. Her tail is brushed for fluffiness and plaited into pig-tails at night to make it curly. Her ears are trimmed with clippers and nicks are filed from her horns. Hazel is fussy about the polishing of her hooves, too, and she can

show her annoyance with a little sidewise kick.

Being part white is quite a strain on Hazel. The stains must be bleached out of her coat, and her baths are frequent and energetic. After she is dry, sweet oil is rubbed on her hair to make it shine.

Besides being beautiful, temperamental, and intelligent, Hazel has more practical attributes. She has been mother of six calves, has a high milk record, and at the present time leads the herd in milk butterfat content.

# Tschan Heads Honor Council

Recently elected president of the Honor Society Council is Francis J. Tschan, Professor Emeritus of European History.

Other officers include Joseph Goodman, a graduate student, as vice-president; Miss Pauline Locklin, Associate Professor English Literature, as secretary, and Dr. Arnold Currier, Associate Professor of Chemistry, as treasurer.

The Honor Society Council functions as an organization to unite various honor societies on the campus and eliminate any society not measuring up to standards.

# Phi Epsilon Kappa

Phi Epsilon Kappa, physical education honorary recently elected Willard Tease, president; Irving Smith, vice president; Marvin Demp, secretary, and Albert McDonald, treasurer. Initiation of new members will take place May 20.

# LaVie

Pictures of campus leaders will be taken in front of Old Main at 1:30 p.m. Sunday. Women should wear skirts and blouses or jackets. Men should wear sports jackets.

# Three Colleges Vie On Armory Range

Penn State's NROTC will compete for the Commandant's trophy of the 4th Naval District in the College Armory tomorrow.

In a shoulder to shoulder match, the midshipmen will meet the University of Pennsylvania and Villanova College teams in a competition with 52 other universities.

The College's NROTC firing line includes Captain David Laudig, Charles Calhoun, George Gibson, Robert Keagy and George Williams.

C. J. Code of the National Rifle Association will referee the match.

# Snow Common In May Says Weatherman

Even though you may have thought yesterday that winter was back to stay, the Bureau of Meteorology says that snow flurries in May are common.

The lowest temperature yesterday was 31 degrees which was warmer than last year's 29 degrees. So don't worry. Spring is on its way even if it does snow, for the highest temperature ever reached in May was 93 degrees in 1895.

# Dragon Lady Disappears After Golf Course Flight

"Where, oh where has my pet falcon gone?"

Dragon Lady disappeared one fair day in February when Dick McCown, her owner and admirer, took her out for a flight on the golf course.

"I expect by now she's reverted to a wild state," Dick, a student in C&E, commented. "They generally do so in just a few days if they don't come back immediately."

Dragon Lady had long, pointed

wings with a spread of 42 inches. She weighed 30 ounces and was 22 inches long, from head to tail. Since falcons live as long as 30 years on the average, Dragon Lady, only three years old, was a mere infant.

Dick got the bird from a friend in Colorado. He expects to replace his loss in the near future with a peregrine falcon, or duck hawk as they're commonly called. Dragon Lady was a prairie falcon, a foreigner in this section of the country.

The bird flies at an average rate of 180 miles an hour. It feeds on pigeons and other prey which it swoops down on from the air and thrashes to an unconscious state before swallowing whole. Bones, feathers, and other waste are later regurgitated.

Unlike other fowl falcons cannot be bred in captivity. They are trapped along the sea coast in the fall while migrating to fairer climes.

The male falcon is a good father though he may be considered somewhat henpecked. This is all very natural for the female is three times as large as the male.

# Graduate Students Order Caps, Gowns At AA Store

Candidates for advanced degrees will order caps, gowns and hoods through the Athletic store, it was announced by Prof. Frank D. Kern, Dean of the Graduate School.

Orders should be placed by May 20. The store will make every possible effort to see that all candidates are supplied and will furnish directions about receiving and returning orders.

Members of the faculty desiring caps and gowns are invited to place orders in a similar manner.

# Campus Papers Available

## Positive

The second issue of Positive, independent paper published by the Independent Student Council, will be circulated to students at Pollock Circle, Student Union, and Independent Town houses and dormitories today, said Betty Gibbons, editor.

The paper was originally scheduled to come out on Monday but was held up for the story on the Penn State Club trophy award to the most outstanding independent senior man.

There is also a sketch on Frank Tidona, ISC president, and a poem "Bare Fact" by Ted Kunin.

## Ag Hill Breeze

The Ag Hill Breeze, publication of the School of Agriculture, will come out tomorrow for the Dairy Exposition Show to be held in the Stock Pavilion, reported Peter Horen, editor.

This paper, an eight-page issue, will also be available to all students at Student Union, the Agriculture Library and the Agriculture Building, Monday.

# How a city's voice was restored!

Early on December 14, 1946, flames gutted the Central Office at River Grove, Illinois. Telephone service for 10,000 families ceased to exist.

Even as the fire burned, restoration work was begun. Emergency telephone headquarters was set up. Mobile equipment arrived to handle calls of first importance.

Telephone men from distant points came to aid the local forces. Bell System standardization proved itself again for all men were able to use the same methods, the same tools, the same Western Electric equipment. From Western Electric plants

hundreds of miles away the needed supplies—the right kinds and amounts—were started toward River Grove.

In a matter of just 11 days... a record accomplishment... two Quonset huts were erected, new switchboards installed, splices and connections made. River Grove's communications system was restored.

Planning well in advance for both emergencies and normal growth, is a task of telephone management. The many and varied problems presented offer a stimulating challenge—promise adventure and opportunity—to men who choose telephony as a career.

What Could Be Sweeter?
