Chief Nurse Leaves Post

Miss Alice M. Chubb, superintendent of the College Infirmary, retired from her position at the College August 31 after almost 20 years of service.

Coming to Penn State in 1928 from a position as instructor of nurses at Uniontown Hospital, Miss Chubb saw the Infirmary grow from a hospital with a staff of two nurses and a capacity of eight patients located in what is now the Beecher Home Management House to a more modern unit with 11 nurses and an emergency capacity of 50 patients, housed in the present Infirmary building which was presented by the Potato Growers of Pennsylvania in 1929.

Miss Chubb's major aim now is to go fishing, a hobby she enjoyed before assuming her duties at Penn State. Her parting wish is that the College might erect a larger hospital with complete medical and surgical facilities.

Doc Yeagley Makes 'Life'

Dr. Henry L. Yeagley, associate professor of physics, and his homing pigeons have received national recognition. He had been experimenting on the correlation of magnetism and the earth's rotation in determining why a homing pigeon is a homing pigeon. In last week's Life magazine is a story on the experiment and an explanation of his success.

Prof. Yeagley first discovered that, by attaching magnets to his homing pigeons, they could not find their way home. This demonstrated that the earth's magnetic fields were at least partially responsible. But as magnetic fields prevail all over the world, he guessed that this could not be the only reason for a pigeon's homing instinct.

He concluded that a force created by the rotation of the earth was the deciding factor. To test this idea he set up a pigeon loft in Kearney, Nebr., where magnetic and rotational conditions are exactly the same as at State College, and loosed the birds on the Nebraska plains. They returned to the loft, proving his theory.

Now Life has printed the complete story with pictures and a map. State College is clearly indicated on the latter. So Prof. Yeagley, besides winning himself national renown, has helped put State College on the map.

Record Enrollment Set for Summer

A new record was set this summer for the number of students registered in the Summer Sessions at the College. A total of 4471 enrolled in the main session, according to Marion R. Traub, director of the Summer Sessions. This was the highest number of students registered in the 38 years that the College has offered these summer courses.

The 4471 enrollment even topped all but the first of the summer semesters offered under the accelerated program, said John E. Miller, administrative assistant to the director of Summer Sessions.

For the three-week post session, 368 students were enrolled, and for the six-week post session, 1476 registered.

Mr. Miller estimated that approximately the same number will attend next year's summer courses, and stated that essentially the same subjects will be offered.

A total of 1073 students attended the inter-session, which ended June 27.

Windcrest Honors

Fifty students living in Windcrest were named to the Dean's list for the semester that ended in June, Dr. Ralph D. Hetzel, president of the College, announced. Five of the honor students were wives of veterans.
