You probably know a number of men in your class who were pilots in the wartime Air Force. They are the best advertisements for the Aviation Cadet program. Talk with them about it.

Chances are, they'll tell you their service as pilots was one of the most interesting and exciting phases of their lives. Fast action, comradeship, and the chance to serve their country paid them dividends they don't forget... added something to their stature and poise that they couldn't have gotten anywhere else.

Cadet life today is no different. As a potential pilot in the new U. S. Air Force, you serve at a time of equal importance to the nation. Freedom, responsibility, the chance to use your own initiative are all yours.

The training you get is the finest your government can provide - \$35,000 worth for every Cadet.

You're taught by skilled instructors, fly the best airplanes. Your living facilities are excellent.

Learning to fly today opens profitable fields to you in aviation - which is expanding more rapidly than at any other time in history.

Pilot training is open, now, to single men, 20 to 26 1/2 years old, who have completed at least one-half the credits for a degree from an accredited college or university - or pass an equivalent examination. Cadets completing the course will be commissioned Second Lieutenants, ORC, and assigned to active duty as pilots with the Air Force. During their tours of duty they will be given a chance to qualify for Regular Air Force Commissions. This is your opportunity! Look into it today at your nearest U. S. Army and Air Force Recruiting Station.
