

Windcrest Co-op Urges Fraternity Participation

A program for fraternity participation in food-buying cooperatives was presented to house presidents and representatives of the 47 college fraternities at the IFC meeting Wednesday night by Howard Sparks, a member of the organizing committee of the Windcrest Co-op.

Sparks, substituting for All-College Cabinet's Co-op committee chairman Emory Brown of Alpha Zeta, explained that the two main advantages of the co-op system were an initial saving on commodity prices and a fiscal rebate to members on the basis of their total purchases.

Lower Prices for Co-ops

Pointing out that the main reason for recent increases in fraternity house bills can be laid directly to increasing food costs from wholesalers, Sparks reported that Alpha Zeta, a member of the State College Consumers Cooperative at 123 W. Beaver street since last June, has realized a definite drop in food costs since joining the organization.

Although Alpha Zeta purchases were limited mainly to number 10 cans of food, Mr. Hugh M. McClintic, manager of the local Co-op, said that the store's facilities could easily be expanded to handle meat and fresh vegetable

orders on a large scale.

The drop in commodity prices through co-op buying as done at the Beaver Street store is realized by the addition to the cost price on each item of a standard 10 per cent charge which is not subject to a wholesalers handling charge.

Sparks illustrated this commodity saving by describing as an example the saving Alpha Zeta made recently on a case of number 10 cans of beans which cost \$5.00 from a wholesaler and \$3.63 from the Co-op.

Yearly Dividend

The second financial advantage of the Co-op, said Sparks, is the yearly declaration of a dividend after operating expenses have been deducted from the total profits. Last year the Beaver street co-op was run efficiently enough to be able to declare a six per cent rebate to members based on the value of their total purchases.

Individual fraternities can join the Beaver Street Co-op by paying \$1.00 to become a shareholder, Sparks said. Orders may be telephoned in to Mr. McClintic, and delivery to the house will be made within ten days.

New Editors Appointed For College Who's Who

New editors have been appointed for Who's Who at Penn State, journalism honoraries' publication. Joseph Rudik and David Adelman of Sigma Delta Chi, men's journalism honorary, will be men's editors. Janet Schmidt, associate editor, is a member of Theta Sigma Phi, women's journalism honorary. Who's Who lists names and sketches of prominent students

Oklahoma Exhibit Agronomy Department Head Acclaims Beese Operates Throughout State

Robert S. Beese, photographer for the School of Agriculture, was honored at the fifth International Color Exhibit conducted last week in Oklahoma City, Okla.

Mr. Beese entered a color picture of Old Main in winter, and won one of the ten ribbons awarded at the show.

A total of 1180 color pictures from all parts of the world were placed in the competition. Still Old Main was selected as one of the ten best.

The exhibit was conducted by the Photographic Society of America.

The same picture brought similar acclaim to Mr. Beese when it was entered in international contests held at Chicago and Toronto.

Home territory to Dr. Herbert R. Albrecht, newly-appointed head of the agronomy department, covers not only the College's agricultural experiment station but the entire state of Pennsylvania.

A stranger to the Keystone state, Dr. Albrecht for the first time in his work must apply his knowledge of soils and crops to diverse farming practices and products within one state—rich farm lands in the Philadelphia-Lancaster area, the fruit belt of Lake Erie, or the mountainous section around Pittsburgh.

DR. H. R. ALBRECHT

"Since soil conditions in the State College region do not represent the varied factors in this state," said the agronomist, "we will continue to operate our tobacco and corn station in Lancaster, pasture experiments in north-eastern Pennsylvania, fruit station in Adams county, and innumerable test plots throughout the state."

To Expand Research

Dr. Albrecht's agronomy department will attempt to intensify and expand its research program of soil and crop improvement. According to the new department head, the latest trend is to emphasize good farming practices using improved varieties of all farm crops in well-managed rotations, such as planting small grains with pasturage.

"Our program must also keep pace with varied climates and topography in the state," remarked Dr. Albrecht, "plus the state's diversified production of potatoes, apples, corn, barley, dairy, chickens, and what have you. Pennsylvania is one of the few states with such a wide field of agricultural interests and whims," the agronomist added.

Previous Work

In the previous states where Dr. Albrecht has studied and worked, this diversity of crop conditions did not complicate his problems—or help make the state self-sufficient.

At the University of Wisconsin where the agronomist earned three degrees, his research was aimed at boosting the grain yield of his native state. He worked

with soil-enriching legumes, with alfalfa and clover grasses.

While at Alabama Polytechnic institute from 1936 to 1944, Dr. Albrecht's chief concern was King Cotton. At Purdue from 1944 until his appointment to the College last month, Dr. Albrecht limited his experiments to Indiana's forage crops and turf grass.

Hammond To Address First ASME Meeting

The student branch of ASME will hold its first meeting of the fall semester in 110 EE building, at 7 p.m. Tuesday. A special invitation is extended all new sophomores who would like to become familiar with the organization.

Following the meeting a cider and doughnut party will be held in the ME laboratory.

ROOM available Pollock Circle, Dorm 7, Room 24. November bonus to renter. Must leave, have home for family. Harrison.

REWARD for room substitute. Contact Mickey Stone, Room 33, Dougherty Hall, Pollock Circle; phone 3971.

WANTED to buy second hand copies of Wann's "Rise and Fall of Realism." Apply 204 Sparks Bldg.

WAITERS WANTED to serve one meal October 25, 7 p.m. to 10 p.m.; \$3.00. Phone Tom Fox, Chi Phi 4332.

I'D WALK A MILE from Pollock Circle to Junior Prom, October 24th.

BEST DEAL in State College offered by Penn State Club! Apply 321 Old Main afternoons, 4 P.M.

COEDS—Let Pegilu Pulls, Vogue School of Fashion Arts graduate, do your alterations. 455 E. Beaver. Hours 10 a.m.—4:30 p.m.

BUNYAN QUINTET, fresh from Mount Alto; songs old and new to liven up your party. Call Ted Allen, 3931 Pollock Circle.

WANTED!!! THE OLD LOOK

LOST—Blond cocker puppy on Wednesday; a child's pet. If found please call 3921.

WOULD FINDER please return the wide brown leather studded belt misplaced last week. Liberal reward. Call 5051—21.

Sound Expert Wanted

To Imitate Rifle Fire

Is anyone in the audience an expert on machine gun sounds? Yes? Then you're the man that Kelly Yeaton, director of "Sound of Hunting," is looking for.

Anyone who can tell the difference between the sound of a German MG 42, a B.A.R., and a Thompson machine gun will be a fair haired lad to Mr. Yeaton, who wants this first Players' stage production to be as authentic as possible.

Or perhaps someone might own or know where to get hand grenades, tommy guns, a case of K rations, a French mortar, a case of motar shells, or a sound-powered telephone.

Mr. Yeaton will be glad to stick a feather in the cap of anyone reporting the whereabouts of any of these articles to him at his office on the second floor of Schwab Auditorium.

on campus. This year the staff will try to include pictures with their writeups. A committee to select those names to be listed will be appointed soon. Mr. Rudik said.

CLASSIFIEDS

All classified advertisements must be in by 4:30 p.m. day preceding issue. Prices are: 40c for one insertion; \$1.00, three insertions; 17 words or less. Call Collegian, 711.

FOR SALE—Tennis racket; Chicago roller skates, size 8; pair of Ray-ban polarized glasses. Paul Gaver, phone Nittany dorm 43.

FOR SALE—German Leica camera with 1:3.5 Leitz Elmar coated lens range finder; speed 1 to 1/1000 sec. Call Mary at 6112 after 8 p.m.

FRATERNITIES, Pollock Circle, Nittany Dorms—Fresh cider, delivered any evening, 65c gallon. To order call 2816.
