JOYCE SAYS:

"I smoke Chesterfields because they never irritate my throat. I also like the way they're packed—not too tight, or too loose."

A nation-wide survey shows that Chesterfields are TOPS with College Students from coast-to-coast.

'Gerton or Neiman?' Confused Staff Wonders

With the end of the semester near at hand, the Collegian staff now feels that they can release for public knowledge news of a horrible coincidence that has been their misfortune to encounter. A pair of junior board members named Arni Gerton and Jim Neiman, who, though unrelated, looked too much alike.

All during the present semester these two have been confusing their Collegian associates and even some of the journalism department. Unfortunately, the "twins" have several classes together and usually not by choice they sit near each other.

Not long ago, Gerton received a card from the College which had first been sent to Zeta Beta Tau, Neiman's house, and then was forwarded to his house, Beta Sigma Rho.

Each is constantly having trouble convincing people he can't be responsible for the other's debts.

The resemblance between the two has its limits as far as one coed is concerned. She's pinned to Neiman and not apt to make a mistake in knowing who is who.

More than meets the eye...

One look and you'd say that a great deal of work lies ahead before this new telephone central office is completed. That's true. But *already*, much of the job is done!

For months telephone men have been hard at work—in offices and in the field. One group has carefully studied business and population trends and has forecast the telephone needs of the community for years to come. Another has determined the amount and types of equipment that will best meet these needs. Still others have found ways to make this new equipment a part of our world-wide communications network.

At our Western Electric plants the telephone equipment—the switchboards, frames and switching mechanisms, the cable, wire and relays—has been scheduled and is already being manufactured.

All this and more before the ground was broken!

The telephone business is a constantly expanding business in which thousands of college men are finding interesting and rewarding careers. There's a future in telephony.
