Draft Would Call 19-25-Year-Olds

WASHINGTON—A draft bill which would make men 19 through 25 liable for two years of military service was drawn up by the House Armed Services Committee yesterday. It requires the registration of men between the ages of 18 and 30. Hearings are expected to get under way Monday.

President Truman also asked Congress for \$725,000,000 to expand the air forces. The House Appropriations Committee called a special meeting and said it would have a bill ready by next week.

Owners Accuse Lewis

WASHINGTON—Southern coal producers yesterday accused John L. Lewis and his coal miners of breaking the Taft-Hartley law by refusing to recognize their association in bargaining procedure. This, they said, is an unfair labor practice.

Arabs Refuse Conference

LAKE SUCCESS—Arab representatives have refused to consult with conferees of the Jewish Agency in a move toward ending the Holy Land warfare. The vice-chairman of the Arab Higher Committee for Palestine, Jamal Husseini, said he could not recognize the Jewish Agency or sit with its people because they are not Jews of Palestine.

Survey Alums On Grid Slate

Penn State is seeking alumni opinion on the desirability of its present football schedule.

Using "The Penn Stater," alumni publication, as a sounding board, alumni have been asked to list in order of preference the ten opponents they would most like to see on the Lion schedule.

The idea was "lifted" from The Pennsylvania Gazette, University of Pennsylvania publication, which put the same question to its alumni at the close of the 1947 season. The Blue and White rated eighth on this list.

H. R. Gilbert, graduate manager of athletics, has sanctioned the poll but took the opportunity today to point out that such a schedule may not be easily achieved at Penn State.

New Dean Flies Own Plane After Air, Radar Service

The only "flying dean" on campus is Dr. George L. Haller, newly-appointed head of the Chemistry and Physics School.

In his own Piper cruiser Dr. Haller, a consultant on guided missiles, yesterday flew to Washington for a meeting of a national defense board. He has taxied through the air to attend conventions and meetings in every section of the state.

Serving as an Air Corps colonel during World War II, Dean Haller learned to navigate planes. His outstanding contribution to the war effort, the jamming of enemy radar during several major campaigns, won for him the Legion of Merit.

Whitmore Lab
Whitmore Laboratory, conducting research in organic chemistry, has been set up in honor of the late dean as Dr. Haller's first recommendation in his new office. All research papers in connection with organic studies will be published under the auspices of the Whitmore Lab.

Research work in visibility, supersonics, penicillin, sand, and oil (among others) will be ex-

Quest for 'Thing' Makes History Best-Seller

If library circulation were the basis for choosing the book of the month, Wayland Fuller Dunaway's "History of the Pennsylvania State College" would take the award hands down.

Since the "It's in the Ads" contest began a week ago, the Library has been besieged with students who suddenly have taken an interest in the College history.

All three copies of the book in the circulation section of the library are in use with standing orders for them when they are returned. In spite of liberal use of the books, the mystery as to the identity of the "thing" is still unsolved.

Fouss Presents Priestley Lectures

Dr. Raymond Fouss, who will deliver the 22nd annual Priestley Lecture series at the College, starting Monday night and continuing through Friday, is considered one of the country's leading chemists.

Born in Bellwood, Dr. Fouss, now Sterling Professor of Chemistry at Yale University, received his bachelor of science degree at Harvard University in 1925. Upon his graduation from Harvard, he was awarded the Sheldon Fellowship and spent the following year at the University of Munich, where he studied thermo-chemistry.

Returning to America, Dr. Fouss spent one semester as Austin Teaching Fellow at Harvard and in 1927 joined the staff of Skinner, Sherman, and Esselen, consulting chemists, in Boston.

Entering the graduate school at Brown University in 1930, Dr. Fouss received his doctor of philosophy degree in 1932. His thesis work, under the direction of Charles A. Kraus, was on the behavior of electrolytes in non-aqueous solvents.

During 1933-34, Dr. Fouss was on leave of absence and as International Research Fellow, worked at Leipzig and at Cambridge.

The American Chemical Society in 1935 gave Dr. Fouss the award of Pure Chemistry for his research work on electrolytes and the following year he joined the staff of the Research Laboratory at the General Electric Co., Schenectady, N. Y.

In 1945, Dr. Fouss was appointed to his present position as Sterling Professor of Chemistry at Penn State. (Continued on page eight)

Keep Off Grass Campaign Begins

"The grass always looks greener on the other side of the street." So goes the proverbial saying. But to us here at Penn State the grass is just as green on both sides with the aid of student cooperation.

To help the grass get a fresh start each spring has been the job for the last several years of the "Keep Off the Grass" campaign sponsored by All-College Cabinet.

The campaign which is being launched immediately will last the next eight weeks in order to allow the newly seeded ground an adequate growth period.

"If the student body will refrain from traversing the grass the next eight weeks, 28 weeks of the school year will be left for walking on the velvety green, and we'll still have the best-looking campus in the East," said Alan Pottasch, chairman, of the campaign committee.

Members of the committee who will help in the campaign are James Lotz, Jo Anne Roraback, and Selma Zasofsky.

Co-op Film Shows Nation-wide Move

"Here Comes Tomorrow" and "The Co-op Way," two movies telling of the cooperative movement in the United States and the co-op store at the University of Texas, will be shown at 119 Osmond Laboratory 7:30 o'clock tonight.

All students and faculty members are invited to the films which are sponsored by the All-College Cabinet campus cooperative committee.

Produced by the Cooperative League of America, "Here Comes Tomorrow" shows the growth of the cooperative trend throughout the United States. In 1940 students at the University of Texas made the film, "The Co-op Way."

University of Texas students were able to provide room and board for \$18.21 a month when "The Co-op Way" was produced, according to Eugene Wheeler, a member of the College cooperative committee.

More than \$50,000 was made in patronage refunds to the students of the University of Texas in the 18-month period ending July, 1947, Wheeler said.

Barron, Hill Participate In Debate Tournament

David Barron and Richard Hill will represent Men's Debate team participating in the Eastern District preliminary of the West Point Debate Tournament at Middletown, Conn., today and tomorrow.

Ad Contest

A rolling stone gathers no moss, but the "It's in the Ads" contest keeps gathering prizes every day as the entries pour in.

A double-header features today's added prize. Should a girl send in the correct answer to the identity of the "thing," she will receive a gold filled choker from Crabtree's. A pair of 14 kt. gold overlay Kernentz cuff links will be given to the male winner of the contest.

Today's prize brings the total value of the merchandise to \$70.

The other five prizes are:
1. Four Essley shirts—College Sportswear.
2. Electric iron—Hartman Electric Company.
3. \$10 credit—Bill McMuilen.
4. Pressure cooker—Marshall Electric Company.
5. Two portraits and gold frame—Lion Studio.

King, Queen Deadline

Deadline for submitting candidates for PanHel-IFC king and queen is 4 o'clock today. Each fraternity and sorority should turn in the name and an eight-by-ten picture of its contestant to the Student Union desk.

The king, selected at the PanHel-IFC Ball next Friday, will receive a \$15 merchandise certificate from Jack Harper's Clothing Store and the queen will be awarded a gift from Ethel Meserve's.

Chairmen Explain Goals of WSSF

The purpose of the present WSSF drive is not to solicit funds for a general fund, but for two specific purposes, according to Dorothy Parks and William Renshaw, co-chairmen of the WSSF drive.

First, funds collected will be used to support 14 European refugee students in a tubercular sanatorium in Stockholm, Sweden, and secondly, to establish a hospital ward at the University of Bombay, India.

Renshaw said that students who have not been contacted by a WSSF solicitor may contribute to the fund at Student Union.

The drive, which has been called "Operation Survival," will be Penn State's reply to the immediate needs of fellow students fighting for their education and their lives. Within this year students will be told precisely how the money they donated was used to fight the battle of world student need.

A food shipment from Penn State students last year to Rumanian students impressed them so much that this year, when Rumania finally had an adequate corn harvest, the students there collected six tons of corn to be sent to any student group which World Student Relief headquarters in Geneva should select.

Senate Committee Receives Forms

Applications for College fellowships and scholarships are being received by the Senate Committee on Scholarships and Awards, Dr. Clarence O. Williams, committee chairman, said today.

The John W. White Fellowship will be awarded to a member of the 1948 January or June graduating class, who has attained a high standing and who possesses, in the opinion of the committee, the ability and personality that will enable him or her to profit best by graduate study.

The fellowship pays \$600 and the recipient must spend the year in advanced study either at the College or another college under the direction of the president of the College. To qualify, the student must have had an average of 2.5 or better and must present evidence of clear-cut purpose and specific plans for graduate study.

One Louise Carnegie Scholarship, amounting to \$75 and available to a sophomore, will be awarded on the basis of scholarship and financial need. The applicant must rank in the upper tenth of his class.

Scholarship application forms are available in 106 Burrows and must be filed not later than April 28.

Students may obtain more detailed information from the committee member representing his school: Agriculture, Dr. R. Adams Dutcher; Chemistry and Physics, Dr. Harold K. Schilling; Education, Dr. Williams; Engineering, Leland S. Rhodes; Liberal Arts, Dr. John H. Ferguson; Mineral Industries, Dr. Elbert F. Osborn; and Physical Education and Athletics, John D. Lawther.

Cabinet Approves AIM Constitution; ISC Vote Needed

Council to Include Town, Dorm Members

Final draft of the Association of Independent Men's constitution was tentatively approved by Cabinet last night, subject to revision and approval of Independent Student Council and Pollock Circle and Nittany Dorm Councils.

Governing Council of AIM would be composed of one representative from each of the campus men's dorms and one from each of the specified voting districts in town. The constitution was prepared by the committee on revision of constitution, headed by Robert Troxel.

Formal, public inauguration of this year's newly elected officers will be a departure from the former custom of closed swearing-in ceremonies. Allan Hack was named chairman of the committee to arrange the program. Jack Cameron and Allan Ostar were also appointed by Thomas Lannen, All-College president.

Traffic Violations
The prevalence of student traffic and parking violations on campus was discussed at great length, with Tribunal being directed to study the situation. Handling of violators by Tribunal will be considered.

A \$2500 fellowship for a year's study at the College for an European scientist will be studied further by the UNESCO committee, headed by Robert Morgan. Only fifteen colleges in the country have made conditional commitments. Recent curtailment of the study periods to six months was considered a major drawback to more complete acceptance.

Insufficient Time
Reasons for not approving the plan are insufficient time this semester, lack of clarity on the national level, and insufficient information. Three major financial drives this spring were also cited as being a hindrance to raising funds.

Trustees meeting with the Cabinet cooperative committee were interested and helpful, according to Emory Brown, chairman. They asked that a set of by-laws be drawn up, and that student opinion be determined concerning the relinquishing of a TUB lounge for a campus co-op store.

One of the two co-op films to be shown in 119 Osmond Lab at (Continued on page eight)

News Briefs

Coed Contestants

Contestants in the recent Coed Contest may pick up their pictures at Student Union now, said J. Arthur Stoba, Froth editor.

Liebig Society

The Liebig Chem Society will sponsor a farewell party for June graduates in the Ag Bio-Chem school in 405 Old Main at 7:45 o'clock tonight.

Lutheran Students

Members of the Lutheran Student Association who are attending the roller skating party are requested to meet at the church between 7 and 7:30 o'clock tonight.

Hillel Services

Norman Schiff, chairman of the National Conference Committee of the National Jewish Youth Planning Commission, will speak at the Hillel Foundation at 7:30 o'clock tonight.

Youth Leadership Institute, seminar I—Influence of religion on Jewish life will be held at 9 o'clock tonight. The chairman is Herbert Hollenberg and discussion leader is Saul Isserow.
