## Ag Eng Society Honors Alumni

Two alumni of the College were granted honorary memberships in the College branch of the American Society of Agricultural Engineers Saturday night at the State College Hotel.

Student members of the organization honored D. C. Heitshu chief engineer of the John Deere farm implement firm, East Moline, Ill., and A. T. Holman, extension engineer for the U. S. Department of Agriculture, Washington, with memberships in the organization at the second annual alumni-student-faculty Agricultural Engineering dinner Saturday night.

Robert Crist, student president, acted as toastmaster at the banquet which honored these two alumni who had graduated before the student organization was founded. Both these men have since distinguished themselves in the agricultural engineering field.

## IE Honorary Initiates Ten Brazilian Educators

Ten Brazilian educators now attending the College were initiated Thursday night by Iota Lambda Sigma, national industrial education honorary, at ceremonies held in the Hugh Beaver room of PSCA.

Dr. J. C. Wright, former assistant commissioner of vocational education in Washington, was the main speaker.

The educators are directors of vocational schools and are attending special classes in industrial education.

The Brazilians are the first foreign members of the national organization. Upon their return to Brazil, they will establish the Beta chapter which will be the first chapter outside the United States. Through these studies they hope to improve the vocational education program in their country. They are studying in the United States under the auspices of the Institute of Inter-American Affairs.

## Special Home Week To Honor County Extension Work

Today's Home Builds Tomorrow's World" has been chosen as the theme of the annual National Home Demonstration Week being observed this week in recognition of the county home extension work throughout the nation.

Among the achievements of the extension home economists with rural peoples of their counties are more convenient, attractive, comfortable homes, and better health.

Working with homemakers of the state for the past 34 years, the home economics representatives of Pennsylvania have offered various services to Pennsylvania homemakers.

They have taught homemakers how to save time and energy in food preparation and packing luncheons, laundering, and ironing.

Better health for families through good nutrition tips, instruction in child care, and freezing foods are among other services rendered through this national group.

It takes a team to save the green.
