NSA Outlines Study Abroad On 'Man in Today's World'

National Student Association programs for foreign study and exchange include study in German universities, correspondence with foreign students and hospitality to foreign students this summer, James Bachman reported to the local NSA chapter at the Wednesday night meeting.

American students may register for the International Holiday Courses offered by the universities of Munich, Marburg and Heidelberg this summer. These non-credit courses are organized around the general theme of "Man in Today's World" and are related to political science, education, sociology and other subjects. The purpose of the program is to foster international understanding among university students.

Electrical Exhibit Scheduled for EE

The Pennsylvania Power and Light Company will exhibit a \$25,000 scale model of their new 150,000 kilowatt steam electric station at Sunbury, Pennsylvania, in the lobby of Electrical Engineering, May 18 and 19, announced Theodore Hissey, AIEE and EE Society chairman.

Supplementing the visit of the scale model to the school, George M. Keenan, chief engineer of the PP&L Co., will address a combined meeting of the student branches of the AIEE and ASME on the power plant in 110 EE, at 7:30 p.m. Tuesday. All engineers are invited to attend.

Mr. Keenan, a graduate of Purdue University, was active in the design and construction of the new plant at Sunbury. He served on the Power Branch Division of the Office of Production Management and the Office of War Utilities as a dollar-a-year man for three years after Pearl Harbor.

All interested persons are invited to visit the exhibit. Company officials will be standing guard and will be available for questioning. The scale model and speaker have been made available through the cooperation of Mr. W. A. Brokenshire, Penn State, EE '24, Production Engineer of the PP&L Company.

Scholarships Available
University faculties and the American Military Government have arranged the program, for which scholarships are available. Total living costs will be \$50 excluding transportation to and from the university city.

Students who are interested in applying must have some facility with the German language, be able to secure certification of good standing and a recommendation for enrollment from the College and must show need for a scholarship if desired.

Interested students may obtain further information about these activities by leaving at Student Union desk an envelope enclosing their name and local address and addressed to the Penn State NSA chapter.

Student Letters

The International Activities Commission of the NSA has access to 50,000 letters from students abroad and is anxious to distribute them among American college students. This plan, which has received overwhelming response from students abroad, will further a program of correspondence exchange sponsored by the U. S. Office of Education. Preference as to age and sex of the correspondent will be given consideration.

Interested students may obtain further information about these activities by leaving at Student Union desk an envelope enclosing their name and local address and addressed to the Penn State NSA chapter.

European Visitors

NSA has invited a number of European student organizations to send a small group of students to this country this summer. Each student will spend three two-week periods in different sections of the country with American families who can provide for them.

Students who are interested must apply immediately to Miss Patricia Owen, Washburn House, Smith College, Northampton, Massachusetts. The following information should be included: name and home address; address to which the student will be invited; the particular two-week period between July 1 and August 23 during which the foreign student would be invited; preferences as to sex, interests and nationality; whether or not the family can pay full expenses during the visit; activities in which the host will be engaged and a list of any other young people in the family.

Original Eng Dean Dies in Florida

Dr. Louis Erhart Reber, first dean of the School of Engineering, died at his home in West Palm Beach, Fla., last Monday. A victim of a stroke, he was 90 years old.

A native of Centre County, Dr. Reber enrolled at Penn State in 1876. He was valedictorian of his graduating class in 1880 and received a master of science degree from the College in 1887 and a doctor of science degree in 1908.

Named as an instructor at the College in 1880, Dr. Reber founded the mechanical engineering department six years later. When the School of Engineering was organized in 1895, he was named dean. He resigned this post in 1907 to become dean of the extension division of the University of Wisconsin. He retired there in 1926.
