## One in a Million Hand Wins Pinochle Game Hands Down

How does it feel to get a one in a million hand in a card game?

Alvin Schwartz, sophomore civil engineering student, got the answer to this question while engaged in a pinochle game last week.

Playing with Zeta Beta Tau fraternity brothers David Gould, Myron Sloan, and Lawrence Goldberg, Schwartz calmly picked up one of the afternoon's hands to find it contained—eight aces!

Such a hand in pinochle is comparable to holding all 13 cards of one suit in a bridge game, and the odds of drawing such a hand are over a million to one.

Incidentally, Schwartz and his partner won the game on that single hand scoring 125 points.

## Fran Warren, Thornhill Vocalist, Shares Billboard's Singer Title

Fran Warren, vocalist with Claude Thornhill's orchestra, which will play for the traditional Senior Ball in Rec Hall on Friday, had first to face the decision of tearing up her contract with Cosmos records as solo singing star before joining Claude.

Fran joined the new Thornhill organization during its engagement at the Hotel Pennsylvania in New York City. She hopes to gain a reputation with a name band, then advance to the fields of radio, records and movies. Fran feels that Thornhill's band cannot

miss hitting the top. She hopes some of its fame will reflect on her contribution to its success.

Fran, a native of New York, first decided upon a singing career when she was a student of the James Monroe High School in the Bronx. Her first professional opportunity came when she auditioned for Art Mooney and got the job.

Recently Fran was voted most popular female band vocalist, along with June Christy of Stan Kenton's band in Billboard's tenth annual college poll.

## New Process Reduces Student Press Costs

First proposal on the ballot for the class gift now being voted on by the Senior Class is not entirely accurate, Student Press workers said yesterday.

The proposal states that the press would not print student publications. Plans now set up for the project call for the printing of all student work for such groups as Thespians, Players, PSCA, student government, musical organizations, fraternities,

and sororities, student religious groups, school organizations, and all chartered student clubs.

Also included in the plans are facilities for the mimeographing at cost of any student work.

### Equipment

Proposed for the Student Press is the revolutionary new Perry-Higgins printing process. This process eliminates the most costly and space consuming sections of a newspaper plant—the composing room and stereotyping department.

Ten thousand dollar Linotypes have been replaced by the Vari-Typer, the ingenious typewriter-like machine.

Men who have seen the process in operation say that it is different from the traditional present day methods in five important respects:

1. No type is set by expensive typesetting machines.
2. No headlines or ads are set from type.
3. Highly skilled expensive labor is replaced by trained typists.
4. No printing is done from lead, but rather from a plate of magnesium.
5. Pictures can be printed as desired without the expense or equipment of making engravings.
