

7500 Attend Hort Club Exhibit; Plans Underway For 1949 Show

More than 7500 persons attended last weekend's Horticultural Show, according to Louis F. Rave, Hort Club president.

As a result of this successful event, students are already making preliminary plans for the 1949 show. This year's show was the first since 1941, and, because of this factor, none of the participating students had had any previous experience in arranging such an event.

Robert R. McLane, show manager, and his assistant, James J. McElwain, said the woodland scene stirred the most comment from the steady line of visitors.

We've proved it!

Problem: To hold down costs, and speed the extension of telephone service.

Solution: High-strength wire whose use allows the span between poles to be increased from 150 feet to more than 300. One pole now does the work of two.

The problem, of course, is a continuing one for telephone people. High-strength wire with required electrical qualities is only one of many things they have developed to help solve the problem in these days of high construction costs.

In total, their developments are the reason why telephone service here is the best in the world--the reason why a telephone call costs only a few pennies.
