College Grows Large Heads For Medal Winning Entry

The College has added a new twist to its plan of turning out well developed heads. These heads have leaves, and won bronze medals for their producer, Professor Milton T. Lewis.

Of the seven superior new vegetables winning All-America Selections awards for 1949, two were developed at the College by Professor Lewis. These are both new varieties of head lettuce, representing the "fruit" of many years' effort.

Both lettuce introductions were pollination of lettuce blossoms is awarded the bronze medal in the a time-consuming job, and many All-America tests, and are being years of experimentation are featured in the new seed cata-necessary before a new variety logs. Ratings Finished By Council

Education Student Council has completed the course ratings which were compiled from the questionnaires filled out by stu-dents in the School of Education last year. The purpose of these ratings is to help the teachers plan their courses more towards the students' viewpoint, and to help students select the proper subjects.

The courses rated were educa-tion 1, an introductory course; education 52, a secondary education course; and education 70, a course in test measurements. One of the interesting points brought out concerned the question: "Has it (the course) opened new fields of thought for you?" The education 1 group unswered with 100% agreement; then, as the subjects increased in com-plexity and consequently in repe-tition the newsentage depended tition, the percentages dropped to 83% for education 52, and to 70% for education 70.

In a question about the val-idity of the exams, the introductory course received highest percentage of approval. The courses were also rated according to difficulty. The most advanced course, educational measurements, re-ceived 100% agreement that it was a hard subject; 88% of the same group felt that the course credit should be increased; however none of those taking the sec-ondary education course felt that credit should be increased, and only 11% of the introductory education group agreed on that question.

Joseph Daniels, president of the Education Student Council ex-A survey of the College home pressed this opinion of the rat-ings: "Student rating of courses,
