

Construction--

Continued from page one

ing the return of the carpenters. Mr. Ebert stated that about a week's work will finish it ready for use.

At the same location and slightly above the new Foods building, work is proceeding on the Navy water tunnel to be used for experimental purposes. Again a temporary delay has been encountered for the need of certain essential carpentry work. Welding in the tunnel tube is expected to begin next week.

New Men's Dorms

Foundations have been completed for the new Men's dormitories and dining hall which are being built as extensions from the West dorms located behind Sparks. The new dorms will extend down along Burrowes Road to Pollock Road and behind Carnegie Hall. The dining hall will extend above West dorms at a location opposite Rec Hall.

Progress on both the excavations for the dining hall and foundations of the dorm units are being delayed by need for carpentry work. However dorm unit three has been completed to the first floor level.

But the construction picture at New Beaver Field is much brighter where the new stands at the south end of the field are being erected. The concrete piers have all been placed and are hardened and actual steel erection will begin on July 1.

Dressing Rooms

The new team dressing rooms being placed under the West stands have been completed except for partitions, heating, and plumbing. The dressing rooms will be used in place of the water tower and Rec Hall which have been used previously.

Construction on the storm sewer, cause of the ugly gash across the main campus and Mall, has been started along Electrical Engineering and up the service road between Willard Hall and Mineral Industries to Pollock Road. Work on the sewer is also proceeding across the Mall toward Electrical Engineering. Starting today, excavation for the sewer will proceed out Pollock Road toward Burrowes. After reaching Burrowes the sewer will be placed up that road to a point opposite Rec Hall.

State Projects

Mr. Meynor, director of the Commonwealth program, reported that their projects were all over 80 per cent completed. Willard Hall, located on Pollock Road at the right of the Mineral Industries is 87 per cent finished and should be completed by August 15. Plant Industries building, at the corner of Curtin and Shartledge Roads, is 82 percent finished and completion is expected by August 21. The Mineral Science building at the corner of Pollock and Burrowes and to the left of Mineral Industries is 90 percent completed and should be finished by August 7. All buildings require only interior finishing for completion.

Work at the power plant includes putting in a 4000 kilowatt turbo-generator, a new boiler, and a cooling tower. It will be completed on August 5.

Weston Attends Convention

Dr. Pearl O. Weston, dean of women, recently attended a meeting of the national officers of Alpha Lambda Delta, freshman women's scholastic honorary, at Breezy Point Lodge in Brainerd, Minnesota. The meeting was that of the council of the organization composed of the deans of women from 8 colleges and universities.

While at the convention Miss Weston was elected national secretary of the organization. The council is composed of the president, vice-president, secretary, treasurer and four members-at-large. Miss Weston originally attended the meetings as a member-at-large for this province.

Coinciding with the Alpha Lambda Delta convention, was the national convention of Mortar Board, senior women's activity honorary. Ruth Lehman, president of the local chapter of Mortar Board, represented that group at the convention.

College Offers Riding Instruction

Instruction in riding is offered by the College for physical education credit to Summer Session students and staff members. It is also offered as a non-credit extracurricular activity.

Captain Gregory Gagarin is in charge of instruction in the College riding ring adjoining the stable. The fee is \$25 for 6 weeks, and is payable at the Bursar's office in Old Main. Classes are held 3 times weekly.

It is important that persons desiring to take advantage of this instruction should make arrangements immediately in order not to lose the benefits of the preliminary instruction. For further information call Captain Gagarin, 6711-ext. 205 R, or Marie Haidt, 6711-ext. 01, or inquire at 101 White Hall.

LA School--

the School of the Liberal Arts, will head the committee.

"By means of this inter-school committee," President Milholland stated, "we will be able to apply the educational resources of the entire College to the training of these students. We expect to start modestly and to limit enrollment at first to a very few outstanding students. Development thereafter will depend upon the degree to which this program meets the practical demand for such personnel."

Neuberger Presents Paper at Convention

Dr. Hans Neuberger, professor and chief of the division of meteorology at the College, presented an illustrated paper entitled "Weather and Air Pollution" at the 14th annual convention of the American Retail Coal Association at Cleveland, Ohio, recently.

Interior of TUB

TUB Offers Recreation To Summer Session Students

The temporary Student Union building known as the TUB opened during the fall semester of 1948. Originally the building was the USO club in Lebanon, and was purchased by the College for use until a permanent Student Union building could be erected.

Facilities of the building include a large dance floor, spacious lounges, card and game rooms and a soda fountain. The TUB is also the home of the new BX, the student cooperative effort.

Playing cards, checkers, chess, ping pong equipment, magazines and other games are all provided by the TUB for student use and enjoyment.

Located on Shortlidge road, the TUB will be the scene of many of the summer activities. There will be bridge tournaments every Tuesday from 7 to 10 p. m. Highlighting the summer weeks will be the Summer Sessions Dances to be held regularly. The first such dance is scheduled from 9 to 12 p. m. on July 8.

During the week, the TUB is open from 8 a. m. until 10 p. m. On Fridays it is open from 8 a. m. to 1 a. m. and on Saturdays from 8:30 a. m. to 1 a. m. Sunday hours are 2 to 5 p. m. and 6 to 10 p. m. It is closed between 5 and 6 p. m., every day.
