

**Noted Sight-seer . . .**

**TAKING THE SAME GENERAL FARM TOUR** as other visitors to the School of Agriculture's Farm and Home last week, Dr. Milton Eisenhower, new College president, obtained a glimpse of the College's 3,000 acre farms and experimental plots. He told Dean Lyman Jackson (right) he was "pleased" with the general layout, and paid special tribute to the experimental work he observed.

**Infirmary Additions To Augment Facilities**

Additions to the College Infirmary will double the number of beds and provide adequate space for dispensary and clinical services under one roof.

Preliminary plans for an east and west wing have been approved by the Board of Trustees of the College and College architects are now drawing up final plans. S. K. Hostetter, assistant to the President in charge of business and finance, announced recently that bids for construction will be asked as soon as the plans are completed.

The dispensary, now located in the basement of Old Main will be moved to the first floor of the new west wing with an entrance from the west. Adjoining the foyer of the dispensary will be a large waiting room with facilities for as many as sixty students.

**New Offices**

Also located in this wing will be offices for the director, his secretary, a staff library, and small waiting and examining rooms.

Outlining the plans for the remainder of the dispensary wing, Dr. Herbert R. Glenn, director of the Health Service, pointed out that the active records room and main desk will adjoin the waiting room to one side. The pharmacy will also be located there. North of the waiting room will be six treatment rooms, each with a small waiting alcove. There will also be consultation rooms and an inoculation room in the wing, while at the north end will be an ambulance receiving platform to facilitate the moving of patients by ambulance.

Second floor of the west wing will include facilities for the dentist, psychiatrist, and for handling athletes, as well as a minor operating room.

**Dining Facilities**

The main floor of the east wing will include dining facilities for the nurses which will be moved from the basement of the present building, and ten beds for women students which, added to the eight beds now available on the first floor, will increase to eighteen the number of beds for women. A sun

**Physics Talks Scheduled Here**

Noted scientists from all parts of the world will gather at the College July 24 to 27 for the second Conference on Ionosphere Physics. The program is sponsored by the School of Engineering at the College and the Geophysical Research Directorate of the Air Force Cambridge Research Laboratories.

Among the scientists on the program are men from India, Norway, Germany, Belgium, England, Canada, and Australia. All papers will be technical.

(Continued on Page Fourteen)

porch to the north of the east wing will be provided for women students.

Second floor of the east wing will provide beds for eighteen men increasing the total number to 38. A sun porch will be added to the north end of the wing and the present sun porch to the west of the original structure also will be reserved for men students.

Numerous alterations will be made in the basement of the old building, which will include a central sterilization area, space for storage of inactive records, locker room facilities for nurses, and space for physical plant facilities.

**Storage Space**

In the east wing basement will be located the kitchen with refrigeration and storage space while the west wing basement will contain rooms for physical therapy and x-ray equipment, a fracture room, a clinical laboratory with waiting rooms, and pharmacy storage.

**Louis H. Bell New Member Of ACPRA**

Louis H. Bell, director of public information at the College, is a new member of the executive board of the American College Public Relations Association and editor of its newsletter.

This was announced today by Stewart F. Harral, ACPRA president, following the annual meeting at the University of Michigan, June 27-30.

At the meeting, the College won a citation for the nation's best public relations project attempted through the press "judged from the college public relations viewpoint."

**Scholarship Plan**

The winning project was a plan through which the College and 15 daily Pennsylvania newspapers cooperated to select outstanding teachers and to provide them with all-expense scholarships for the Main Summer Session. The plan was developed by the Public Information Department in cooperation with the School of Education.

The College became the conference's only double winner of awards when its photographic entry was selected second best. The winning picture was taken by Edward H. Leos, photographer in Central Extension. It was a picture of Francis H. Tolan in cap and gown holding his twin daughters, symbolizing the twin commencement exercises at the College.

**Poultry Group Ends Contest**

The Chicken of Tomorrow contest wound up on June 20, with the selling of the dressed carcasses at auction in Coatesville.

The broiler growing contest began in Pennsylvania during the week of March 23 to 29. Chicks born during this period were entered in the event which ended with the dressing of the birds at the Producers' Cooperative Exchange at Coatesville on June 15.

The event was sponsored in Pennsylvania by the Pennsylvania State Poultry Federation in cooperation with many other allied educational and commercial groups. A total of 19,400 broilers were submitted in the 239 entries. The competing growers represented 24 different counties in the junior class; 20 counties in the senior class; and 12 counties in the regional division.

**Baby Chicks**

The regional division group was composed of poultry growers who are known as key breeders.

**Trustees Approve New Student Union**

The College Board of Trustees approved on June 10 the construction of a Student Union building and it is expected that the structure will be under contract by late fall.

The Trustees also approved the assessment of a student fee to assist in financing the building. The assessment was passed by All-College Cabinet on May 25. The fee will amount to \$7.50 per semester next year and the following year will be increased to \$10 per semester.

The Joint Trustee-Alumni Committee had approved preliminary plans for the building and recommend their acceptance to the Trustees prior to the Board action.

**Pollock Site**

A site on Pollock road, south of Osmond Laboratory, was set by the Board as the location for the structure. The entrance will be from Pollock road, and terraces commanding views of Holmes field and of Mount Nittany

will be south of the building.

Following the approval of the preliminary plans, the College architect was instructed by the Board to complete the detailed plans and submit them for final approval to the Executive Committee of the Board.

The Trustees also heard preliminary plans for the construction of a Field House on the campus. The investigating committee was instructed to continue its study and present plans and estimates of cost at a future meeting. It is expected the committee will present the next report to the Joint Trustee-Alumni Committee in the fall.

**Noted Pastor To Present First Lecture**

Dr. John Paul Jones, pastor of the Federated Church, Dowagiac, Mich., will present the first of the series of lectures to be sponsored at the College this summer by the 11th annual Pennsylvania Workshop.

Using the topic, "Knowing Your Neighbors," Dr. Jones will speak at 11 a.m. Friday in Room 3, Carnegie Hall. Mary Jane Wyland, professor of education and co-ordinator for the Workshop, pointed out that the lecture by Dr. Jones, as well as other lectures of the series, will be open to the public as well as to students of the Workshop.

Dr. Jones, who was graduated from Olivet College, and later received his master's degree in educational administration at the University of Michigan, began his career in public education as a history teacher and debate coach. He later became administrative head of Flint Junior College, Flint, Mich. and in 1928 established a junior college at Jackson, Mich., which for four years he served as dean.

**13 Years At Indiana**

In 1932, Dr. Jones entered the ministry—a field in which he had long been interested. He obtained a student-pastorate in a small town community church near Chicago while attending the Divinity School and Chicago Theological Seminary. In 1935 Dr. Jones was called to the pastorate of Plymouth Congregational Church in Whiting, Indiana, where he remained nearly 13 years.

**Easy To Make Smart To Carry**

Make your own summer handbag with new "Belastraw," a gayly colored straw-like yarn.

Select the pattern you want and you'll see how easy it is to make a smart, attractive bag to accompany your summer wardrobe.

"Belastraw" is also adaptable to making sandals, hats, and place mats.

Choose from a rainbow of colors . . . plain, 69c; colored, 89c.

We also carry a complete line of nylon and wool yarn . . . Bernat, Beehive, Columbia, and Botany.
