

Speed

According to the National Safety Council, excessive speed is involved in one out of three fatal traffic accidents.

ALTHOUGH THE COUNCIL published many warnings to holiday motorists, the accident toll over the Fourth of July exceeded even the most pessimistic predictions. The tragic number of immediate traffic deaths piled up over the Memorial Day weekend was 347-topping all previous records for that holiday.

A recent test conducted in one of the nation's largest cities proved that a car racing through all stop lights and disregarding other safety rules, managed to gain only a few seconds over another auto observing the lights over the same course.

The Council has come up with a phrase that everybody agrees with, but many choose to forget; It Isn't Worth It.

Ned H. Dearborn, president of the Council, has suggested five tips to help lower the death toll. They are:

1. Start early so you won't have to hurry—and slow down at sundown.
 2. Drive sensibly and obey legal speed limits.
 3. Avoid abrupt stops and turns—and don't take a chance passing.
 4. Keep your mind on driving and expect the unexpected from the other fellow.
 5. Mind your manners. Be patient and courteous in heavy and tiresome traffic.
- "The life you save may be your own."

A Tradition

The Monday night group sings, long a tradition at Penn State, offer summer students informal and friendly entertainment, and what's more, a chance to meet two campus personalities—Professors Frank Gullo and Hummel Fishburn.

THIS TEAM IS WELL KNOWN throughout the State, their musical talents are in demand at clubs, institutes, and other gatherings. They have even made films to be used at more remote occasions when time will not permit a personal appearance.

So far, the crowds this summer have not been up to expectations. This may be because many people feel that "all sing festivals are alike." However, for an evening of vocal enjoyment that is different, Gullo and Fishburn, "un-rehearsed programs" would be worth a try.

SOME FIRST-NIGHTERS might even join the ranks of those who return year after year to Schwab Auditorium.

Popular

According to reports received by the vacation bureau of the Department of Commerce, Pennsylvania is realizing its best recreational travel and vacation season in history.

Theodore Roosevelt III, Secretary of Commerce, points out that resort hotels and inns are entertaining larger numbers of out-of-state visitors than ever before.

DR. JOHN FERBEE, world traveler, told a College group recently that a traveler can go to Arabia faster than one can get to State College. Dr. Ferbee might be surprised to see how fast students can get out of State College at the close of a semester.

 - SQUARE DANCE, TUB, 9 p.m.
 - WORK PARTY, PSCA, Leave from rear of Old Main, 1 p.m.

DuMont Predicts Video Boom Will Increase

Three out of every four families in America will have television three years after the FCC "freeze" on new TV stations is lifted, predicted Dr. Allen B. DuMont in the opening lecture of the Radio-Television Institute last Wednesday.

At the end of World War II, he stated, there were about 6,000 television sets in operation. Today there are more than six million. The number of stations has jumped from 17 to 106 over the same period.

Affects Sports

Touching on the effect that television has had on sports, Dr. DuMont said the major leagues feel that it has helped their attendance, while the minor leagues feel that it has cut theirs. He quoted a recent survey revealing that during the first six months after a TV set is installed, people have a tendency to remain at home, after nine months they start returning to sports events, and after one year many of them for the first time are sports fans.

Color TV

As to color TV, he stated that he hoped a standardized system would soon make possible the reception of both color and black and white pictures.

The inevitable authorization of channels in the ultra high frequency range will remedy the present shortage of channels, he said.

Radio Possibilities Seen For Penn State Campus

The possibilities of Penn State for a campus limited radio station were seen by Prof. John Roberts, director, Temple University Radio Workshop, at the recent session of the Third Annual Radio-Television Institute at the College.

Professor Roberts explained that in addition to everyone on campus being able to hear the station at moderate expense, the separate power units between the town and college afford Penn State an ideal location.

Explaining the campus limited wireless system used at Temple University in Philadelphia, Professor Roberts told how instead of putting the transmitter up, it is built downward and fastened to steam pipes or wires which act as conductors. At Temple, he said, the transmitter is wired to a power line and built in a basement.

Trains Students

Stating the advantages of a campus radio as a training ground for students who wish to go into the commercial field, he pointed out that the station at Temple operates from 12:30 p.m. until 11 p.m., five days a week.

Started as an experimental laboratory, wired wireless has now become so popular on the Temple campus that last year the station was given the award as the activity which did the most for the University.

At the Movies

CATHAUM—Spencer Tracy, Joan Bennett, Elizabeth Taylor, and Don Taylor in "Father of the Bride."

STATE—Dennis Morgan and Dane Clark in "God Is My Co-Pilot."

NITTANY—The International Film Club presents "Lover's Return."
