

Trustees Approve Four Industrial Research Grants

Four agreements, providing grants to the College for research for private industry, were approved at a recent meeting of the Executive Committee of the Board of Trustees.

A grant of \$2,500 from the Virginia Smelting Co. will provide for research on the sulphur dioxide preservation of grass and legume silages. The Naugatuck Chemical Division of the U.S. Rubber Co. has granted \$500 for fine turf research. Dr. Cloy B. Knodt, professor of dairy husbandry, will head the first project and H. Burton Musser, professor of agronomy, will conduct the fine turf research.

The College also approved the renewal of an agreement with the Lederle Laboratories Division, American Cyanamid Co. for the continuation of research on biological and chemotherapeutic agents on the treatment of diseases of domestic animals. Dr. Alfred L. Bortree, professor of veterinary science, heads the project.

Another project provides for a grant of \$6,000 for the continuation of penicillin research under the direction of Dr. John C. Garey, professor of bacteriology.

Last of Veterans

Billy Jeffrey, soccer coach, and Charlie Speidel, wrestling mentor, are the only coaches remaining from the Penn State staff of 20 years ago. Both have fielded 24 teams.

can approach the level of ours." Mrs. Reynolds then advocated that the world be considered as one market.

"Start raising food for people instead of for the market and there will be less surplus and a more even distribution. FAO's keynote is full production, no restriction," the UNESCO public relations member concluded.

Infirmiry Additions

Additions to the infirmiry at the College will double the bed capacity and provide space for a dispensary and clinical examining rooms. Present facilities were completed in 1929 when the student enrollment was 4,000, and are no longer adequate for a student body that today exceeds 10,000 on the main campus during the fall and spring semesters.

Speech -

(Continued from page three)
tation Program; Prof. Margaret Raabe, head of the clinic's auditory work; Dr. C. Cordelia Brong, head of the clinic's College program; and Mrs. Lee Phillips, head of the clinic's public school program.

Besides their special duties, these senior staff members teach courses in speech correction for College students. Last year, the staff also included 12 graduate assistants working for their masters and doctor of philosophy degrees.

During the regular sessions, undergraduate students majoring in speech correction work in the State College public schools with speech handicapped children. The clinic feels that caring for speech defects in the lower grades will eliminate the need for much more extensive correction work later on and will also lead to a happier childhood for many children.

Waiting List

Graduate students work with speech handicapped College students. In fact, each year the clinic gives all new students a speech test during Orientation Week. After a careful screening, the names of those needing speech correction are sent to the deans of the various schools so they can notify the individuals. It is not mandatory that the persons notified take clinic work but so many do that there is a waiting list.

This summer, 39 speech correction clients are enrolled in a summer rehabilitation program. They live at the Beta Theta Pi Frater-

College Constructs Drive; Starts Carnegie Repairs

A new approach from Pollock Road, to facilitate deliveries to Old Main and provide additional parking facilities for visitors, is now being constructed.

The new construction will provide an entrance drive and an exit with 16 new parking spaces for visitors to the building.

Work has also started on extensive repairs to the exterior of Carnegie Hall.

According to George W. Ebert, director of the physical plant, dangerous terra cotta and brick will be replaced.

One of the cracked stones is located above the main entrance to the building. Since last winter, a scaffolding has been in place under the stone to prevent pieces that might be loose from endangering persons using the building.

Ebert points out that it is the first major repair to the building's exterior since it was constructed in 1904 and presented to the College as a library by Andrew Carnegie.

In addition to the new construction, physical plant employees have excavated a ditch to repair a steam line south of the Agriculture Building.

Gains Honor

Dr. Laurence J. Rosan, instructor in philosophy at the College, has been awarded honorary membership in the International Mark Twain Society for his book, "The Philosophy of Proclus." The award is made in public recognition of a contribution to literature.

Dr. Rosan will participate in a full schedule at the clinic.

Give Banquet

A banquet, planned and executed by the handicapped youngsters, will climax the summer work. A skit, featuring all 39 clients, will be presented at the banquet. There will also be a toastmaster and several main speakers from the group.
