Bacchus Poured Wine, Creating Feb.'s Birthstone

Tradition has it that February's birthstone, the amethyst, was the favored gem of St. Valentine, the patron of lovers.

Modern jewelry designers, to please the saint, are showing amethysts increasingly. They are being featured as faceted stones for rings, in flower-design mountings for pins and clips, in gold, silver, or platinum, and in other pieces in which they are often grouped with contrasting colored gems.

Amethysts vary in color from the palest violet to the deepest purple. They are found principally in the Siberian Orals and in the mines of Brazil, Ceylon, and Madagascar. Amethysts were said to be the favorite gems of Catherine the Great and Queen Charlotte; even today they appear in the coronation service of English kings, and in the coronet of the Prince of Wales. Amethysts are also the traditional gem for bishops' rings.

The amethyst is set in a legend of passion and repentance. Bacchus, the ancient Greek god of wine, was feuding with Diana, goddess of the hunt and patroness of maidens. Angered by some mockery of Diana's, Bacchus vowed to revenge himself by sacrificing to his tigers the first maiden to approach Diana's altar.

It was Amethyst, a beautiful young virgin, who approached Diana's shrine after this threat had been made. But as the tigers leaped to devour the girl, Diana intervened and turned her into a statue of pure white stone. Repenting his cruel intention, Bacchus poured a libation of wine over the young maiden's statue, turning it a delicate purplish-violet hue.

And that is why the favored gem is called "amethyst."

Swathes Of Veil Replace Bonnets

By BETTIE LOUX

Designers from Paris to New York start showing their new hat collections about this time each season. But this year will be different, for there are no hats—there's just veil!

A strip of veiling pulled tightly over the eyes or softly swathed around the face and throat "brings glamour to your eyes and makes your skin seem flawless," according to one leading periodical.

The veils are stiffened and blocked like felt so they will not wilt and lose their shape. One version is fastened in back by slender velvet ribbons; another is held in place over the ears by the use of star-studded combs. Lavishly adorned with artificial flowers or simply sprinkled with cutouts of felt or sequins, many are sure to be seen come Easter Sunday.

The Lilly Dache innovation was originally intended for evening wear only. The trend seems to be contagious, however, and it is expected that many women will be wearing their masks with tailored street outfits.

Designer's originals are priced between \$35 and \$80, but mass production should soon bring down the cost.
