Miller said the council several weeks ago sent letters to several members of the administration in order to obtain their support and ideas. He said the plan had been discussed several times with Harold K. Wilson, dean of men, and that "certain problems arose that will require ironing out before anything definite can be done."

In order for such a plan to become reality, the support of other student councils and eventually All-College cabinet would be necessary, he said.

"We believe a majority of the student body will be in favor of such a program," Miller said.

Other business discussed at the meeting included the dean of men's coffee hour for council members. It will be held from 4 to 5:30 p.m. in 109 Old Main.

present in our every lives, he added.

Weekly Worship

Weekly worship, prayers, and biblical study are the finest sources for keeping one's religion, Proctor said. Evidence is overwhelming that most crimes are committed by people who did not regularly attend Sunday school, he pointed out. No one has enough experience to travel alone.

The Rev. John Peabody, moderator for the panel, said we show our greatest religious immaturity in our prayers. He said most of the things we ask for in our prayers are silly and not worthy of God's help. All prayers are answered, he said, but the answer can be yes, no, or wait.

Reorientation

Dr. Wiley Childs, associate professor of metallurgy at Brown university, said God can come into our lives. He said we need a reorientation in our lives. Man has failed to live up to what God meant for us, he said. Man has rebelled against God with God's permission, but against his will. Man tends to be evil, despite what sociologists claim, he added.

Richard T. Sutcliffe, assistant editor of "The Lutheran," said Christians need things in plain, simple language. Ministers must throw out cliches they use every Sunday so the average can understand them, he emphasized.

Campus Interviews on Cigarette Tests

Number 11...
THE OPOSSUM

"Thereby hangs
a tale!"

The class clown went out on a limb and tried to prove cigarette mildness by the quick-trick method! He tried the fast inhale, fast exhale test—a whiff, a sniff—and they still left him up in the air! But then he got his feet on the ground. He learned that there is a reliable way to discover how mild a cigarette can be!

And that test is . . .

The sensible test . . . the 30-Day Camel Mildness Test

which simply asks you to try Camels as a steady smoke—on a pack after pack, day after day basis. No snap judgments needed. After you've enjoyed Camels—and only Camels—for 30 days in your "T-Zone" (T for Throat, T for Taste), we believe you'll know why . . .

More People Smoke Camels
than any other cigarette!
