

AIM Council Will Circulate Questionnaire

A questionnaire to get the town students' opinion on student government issues has been drawn up by the Town Council of AIM and will be circulated today, the council announced yesterday.

The questionnaire is available at the Student Union desk in Old Main.

From the questionnaire the council hopes to get an idea of what students expect of their governing body. The questionnaire will take the place of dorm meetings such as those held by representatives of campus groups, council members said.

The questionnaire will answer these questions, among others: Do the students favor eighth semester finals, the student union assessment, and the present marking system? Would any prefer to live in the dorms, and are any in favor of the AIM-IFC sponsored blood donor drive?

The council urged students living in town to fill out the questionnaire and turn it in at the Student Union desk.

Foreign School Study Ready

Students interested in combining travel and study abroad this summer may register with the Institute of University Studies Abroad in Washington, D.C.

By advance registration the Institute guarantees to avoid the past confusion that American students encountered while applying for entrance in foreign universities. Every attempt will be made to see that students have proper transportation.

This summer, courses will be offered at the Sorbonne in Paris, University of Fribourg in Switzerland, University of Madrid, Oxford University, and the University College in Dublin covering the fields of philosophy, sociology, political science, literature, economics, and modern languages. A series of cultural tours have also been arranged to supplement the courses and give the student a better understanding of Europe.

For further information about foreign study opportunities with the institute or other groups, students should contact Prof. Laurence LeSage of the Romance Language department, who is official liaison with the Commission of International Cooperation in Education at the College. Dr. LeSage has complete information on universities abroad which are offering summer courses, including fees, scholarships, fellowships, courses for study, and hotel and transportation arrangements. He also has information on student tours.

Employment Head To Speak Today

Howard W. Arrison, supervisor of male employment for North American companies, Philadelphia, will speak on "The Importance of the Interview" in 121 Sparks at 3 p.m. today.

Part of the program will be a demonstration interview. Ted Allen, assistant director of the College placement service and former All-College president, will assist Arrison. A question-answer period will follow.

Arrison has been in personnel work for 20 years and has interviewed 3000 persons per year.

The lecture, open to the public, is sponsored jointly by the Department of Economics and Commerce; Alpha Kappa Psi and Delta Sigma Pi, commerce and economics fraternities; and the Industrial Relations Research association.

'Engineer' On Sale

The March Penn State Engineer goes on sale today at 25 cents a copy.

The magazine features articles on color television, the gas turbine, and a new mine detector. The Engineer also carries a story on a mobile laboratory which is used to combat air pollution.

More Cups For Debaters

FOUR MEN from the men's debate team this weekend took temporary possession of another trophy cup in the state tournament at Temple University. Left to right they are Harry Kondourian, David Lewis, Prof. J. F. O'Brien, coach, Clair George and Marlin Brenner.

O'Connor Talks On Qualities For Peace

One quality essential for world peace is belief in the integrity of the individual, the brotherhood of man and the fundamental rights of man, Basil O'Connor said in chapel Sunday.

O'Connor, eminent Catholic layman who is president of the National Foundation for Infantile Paralysis, spoke on "One Funda-

mental of Peace." He said that we have problems today which have no precedent in history, so that we do not know where to begin looking for a solution to them.

Three Problems

Three of these problems, he said, are: first, for the first time in history the world is under the control of only two large nations; second, these nations have totally opposite ideologies; and third, by far the largest part of the world today is economically bankrupt.

He suggested that we should try to solve these problems as doctors would try to learn the cause and cure of a new disease. He pointed out that they would let the disease run its course hoping to learn how to control it, working to find a cure for it and to prevent its recurrence.

In searching for a cure for world problems today, O'Connor said, we must learn to face fundamentals. We must seek the fundamental causes of unrest and understand the fundamentals of peace, he continued.

Brotherhood of Man

That is why, O'Connor said, we must believe in and act as though we believe in the brotherhood of man. If Communism were to die out completely tomorrow and no solution were found for the social and economic equality of men, some new "ism" would quickly take its place.

One way we can insure world peace, O'Connor concluded, is to seek the economic welfare of all men and women and to reaffirm by our actions our faith in the brotherhood of man.

12 Ag Students Win Awards

Twelve students in the School of Agriculture have won \$100 cash scholarships for the second semester, Dr. R. B. Dickerson, vice-dean of the school, announced yesterday.

The scholarships, provided by the Pennsylvania Power and Light company, were awarded on the basis of academic achievement and need, and are restricted to students whose home areas are served by the PP&L, Dickerson said.

Three students in each class were awarded the scholarships. A similar group of awards was made last semester. Those receiving the grants were Edgar Fehnel, Joseph Folcarelli, Barry Rumberger, freshmen; Kermit Knouss, Morris Schroeder, William Wagner, sophomores; John Blanchard, Howard Killian, and James McKeehan, juniors; and Ray Ard, Joan Burlem and Charles Zellner, seniors.

Five O'Clock Theatre Presents Play By Vail

Today's Five O'Clock theatre presentation will be "From Inside The Bottle," by Walt Vail.

Five O'Clock theatre productions are presented each Tuesday at 5 p.m. in the Little theatre, 11 Old Main.

This week's cast includes Prim Diefenderfer as Mrs. Hipman, Don Colbert as James, Fran Stridinger as Mrs. Smith, Robert Klein as the junkman, and John Pagonis as Harry. Betty Lou Morgan is director.

Technical effects are by Wes Pfirman. His assistant is Jeff Gray. Ted Jones is manager.

Sample To Speak To Metal Society On Electroplating

The American Society for Metals will sponsor a talk by C. H. Sample on "Corrosion and the Protective Value of Metallic Coatings" tonight at 8 o'clock in 217 Willard hall.

Sample received his B.S. in chemical engineering at the University of Idaho, and later he joined the staff of the Bell Telephone Laboratories, inc., where he worked on corrosion and metallic finishes.

Following this he received his M.A. degree in physical chemistry from Columbia University.

Since 1946, Sample has been with the electroplating section of The International Nickel company in New York city.

A dinner will be given at the Nittany Lion inn for the speaker before the meeting.

Cadet Selection Team Cancels Campus Visit

The Air Force Aviation Cadet selection team scheduled to interview students at the College next week has cancelled its visit to the campus. Lt. Col. Jack W. Dieterle, professor of air science and tactics, said yesterday.

Colonel Dieterle said that Major G. F. Brodie, head of the team, informed him that the visit was cancelled because of a change in procedure in obtaining men for aviation cadet training.

Groups Recommend Examination Files

By BUD FENTON

The uncovering of recent attempts to steal and sell final examinations among the student body has brought to light some of the consternation and apprehension felt by some of those who must take the examinations.

One remedy suggested by members of both the student and

faculty groups is the establishment of an examination file similar to those kept by fraternities.

Although it has not been determined whether the file should be kept on an all-College, school or departmental basis, many campus figures have been approached on the question of the advisability of such a project.

Faculty Opinion

Adrian O. Morse, College provost, said that some of the faculty think it is a mistake, while others just don't care one way or the other.

He said that there were faculty members who did not think the fraternity examination files did any good.

The gathering of such a file would be a big job and there was a question as to whether the result would justify the effort, Morse said.

Fraternities Have Advantage

Although he admitted that the fraternity men did have an advantage over independent students, he didn't think that both groups could be made alike since the fraternities are long-standing organizations.

Mixed reactions were received from others questioned.

Dean of Men Emeritus Arthur R. Warnock, who now resides in State College, said that "an examination file would be a good thing if it were properly administered, so that it couldn't be taken from the library shelves. It is done in other schools and could help (the students) if properly indexed."

He added, "The file is no magic way of passing courses, it would just tell you what to study."

Hard To Keep

Lyman E. Jackson, dean of the School of Agriculture, said, "It (the file) could become too large and hard to keep in proper form. It would be a hard thing to keep on hand and still arrange for students to take it out for study."

He added, however, that it would be quite a service to the student body. "Some of the schools I've been in provided files for students who were not in fraternities," Jackson said.

Marlin Brenner, chairman of the committee that asked the College senate to study the possibility, said (continued on page eight)

Armory To Be Finished Soon

The 112th Aircraft Control and Warning squadron, State College's Air National guard unit, is building a new armory near the National Youth association cabins on the campus. The new armory will replace the temporary armory, at 120 McAllister street.

The new unit will include an administrative and operations building, a supply depot, and an automotive maintenance building. The group of buildings is scheduled for completion by late spring.

The 112th is part of the 153rd Aircraft Control and Warning group. Commander of the unit is Col. George L. Haller, dean of the School of Chemistry and Physics. Maj. John E. McHugh, Jr., instructor in the School of Physical Education, is squadron commander. The unit meets for training activity two evenings and one day a month, and also spends 15 days during the summer at an Air Force installation.

About 30 per cent of the personnel of the group are students, staff members, or faculty members of the College. The duty of the unit is to warn of approaching enemy aircraft, and direct the flight of fighter planes necessary to intercept enemy planes.

CA To Hold Panel On Summer Jobs

"What Will You Do With Your Summer?" will be the topic of a student panel on summer work projects at a general meeting of the Penn State Christian association at 7:30 tonight in 304 Old Main.

Students who have participated in summer work projects will briefly tell of their experiences. Paul Reaver, Patricia Bender, Irene Sloat, and Marilyn Detweiler will speak.

A discussion period will follow the panel debate.

The CA round table, formerly called the sophomore round table, which met on Wednesday nights, has been discontinued, Marjorie Allen, associate secretary of the PSCA, said yesterday. Members of this group will attend the general meetings on Tuesday nights, Miss Allen said.

Student In Accident

An automobile driven by Donald Thomas, of Shamokin, a senior at the College, ran into a guard rail at the intersection at Old Fort at 9:40 a.m. Saturday. No one was hurt.

Damage to the car was \$300 and damage to the guard rail about \$20.
