tion charges, Clark said, "I refuse to be 'sucked in' to an unorganized plot to destroy AIM by malicious gossip."

Referring to Galati's charges Monday night that Clark had confidential information proving the election unconstitutional, Clark said, "I repeat that I am entirely innocent of having (this) information."

The flareup over last week's AIM election began when Weston Tomlinson told the AIM meeting Wednesday that he had learned that members representing the West Dorms had been ordered to vote in a bloc for four Lion party AIM candidates. John Stoult heatedly denied Tomlinson's charges in a letter to the Collegian yesterday. Stoult, Lion candidate for senior class president, was elected AIM vice-president last week.

Neither Tribunal nor the All-College elections committee has any jurisdiction over the recent AIM elections which have stirred up a political hotbed on campus, the Collegian learned yesterday.

Tribunal has no investigative authority over the AIM elections, Neil See, tribunal chairman, told Collegian.

John Clark, who helped defeat Galati's proposal for an investigation of the election by the West Dorm Council, had said he would agree to bring the matter to Tribunal.

All-College elections committee has "no jurisdiction whatsoever over AIM elections," Edward Barnitz, committee chairman, said yesterday. He said the committee would only be able to give opinions on the matter, and that it had jurisdiction only over All-College elections.

Clara Robison and Barry Brinsmaid will conclude the program with a piano duet. They will play "Liebeslieder Waltzer Opus 52," by Brahms.

PHYSICS PROGRAM offers studies and rotating assignments for physics majors.

BUSINESS TRAINING COURSE trains college graduates for accounting, administrative jobs.

CHEMICAL AND METALLURGICAL PROGRAM is for chemists and chemical and metallurgical engineers.

ON "TEST"—popular name for Student Engineering Program, by which most engineers enter G.E.

Four broad avenues by which college graduates begin careers with General Electric . . .

Both the individual and the company learn a lot when a college graduate enrolls in one of these four basic General Electric training programs.

The individual orients himself in the company's products, organization and problems. By rotating through varied job assignments he determines the work that most appeals to him and to which he can make the greatest contribution. Many students go from these courses to training in advanced engineering,

sales, manufacturing, etc.

The company learns about the individual's abilities and capacities. The training programs are a major means of recognizing young people of creative ability, of making sure they move ahead to ever more challenging assignments.

A large percentage of General Electric's top scientists, specialists, and managers of today began their careers in company-conducted training programs.
