State Establishes Itself As Leader

The recent step by the College Athletic Advisory Board in attempting to arouse the now dormant dislike for the two-platoon system of modern football and spring practice sessions, will be an aid to Penn State in more ways than may immediately be noticed.

Aside from the fact that the elimination of either of these financial and academic foes of the College team would be of a great aid in these days of 'watch the money no matter what,' the move by Dean Schott & Co. may go far toward establishing Penn State as leader in intercollegiate Athletics.

Steps such as these in picking up the leadership among schools and rallying others around us will serve to raise our worth in the eyes of colleges throughout the country.

We are a large institution. Many would call State a great institution. There is no reason in the world why we shouldn't act like one. The Athletic Advisory Board, in stepping out ahead of the pack may have gained a position that it will hold in the future, that of spokesman and organizer for Eastern Colleges.

The issues themselves, the platoon system and spring practice are worthy of abolition by any school that is worried about its athletic budget or the academic standing of its players. The platoon system necessitates carrying larger squads and the spring sessions are not only a costly item but also serve to break up the academic year for the players at a time when most of us are becoming aware that the end of the semester is near and concentration is in order.

By taking the initiative on the football question, the College may serve to forward itself in many ways, not the least of which will be in prestige.

In 1861, the College graduated its first class of 11 members. This was the first class in the United States to graduate from an agricultural college.
—History of State College

Cease-Fire Views

Students at Penn State for the summer sessions have the unusual opportunity tomorrow afternoon of hearing the Korean spokesman in the United States talk on his country's views toward the currently-negotiating Korean peace treaty.

Dr. You Chan Yang, Korean ambassador to the United States, will address the fourth annual Radio and Television Institute being held at the College today and tomorrow. Dr. You is expected to discuss the United Nations-Communist cease-fire talks now under way.

Here is the opportunity for the student to get a first-hand look at history in the making. The first real world army is making its first overtures toward peace with an aggressor, and a diplomat from the war-ravaged country that is the subject of the dispute will tell his listeners just how that country feels about the proceedings.

The Institute is not charging admission to the speech, and has opened its doors to any interested persons. You owe it to yourselves to attend.

Gazette . . .

SATURDAY, JULY 14

1 p.m. Mixed swim party. Glennland pool.
9 p.m. Square dance. Andy Mastalski, caller. Admission free. TUB.

SUNDAY, JULY 15
