Harper's Tells Former Prof's Hormone Find

The current issue of Harper's Magazine carries a story of a former Penn State chemistry professor and his work with the extraction of sex hormones from plants.

The article, entitled "Cortisone and Plenty of It," deals in part with the work of Russell E. Marker and the effects that his discovery has on the world today.

About fifteen years ago, Marker became convinced that plants offered a cheap source of sex hormones, then expensively extracted by a tedious, low-yielding process. He worked out the chemistry of steroids from three large families of plants growing in Mexico and devised on paper a simple process for making progesterone, pregnancy hormones, from one of these steroids—diosgenin. When he couldn't obtain financial backing for his process, he left Penn State and went to Mexico to work on his own.

The article goes on to tell of the progress made in Mexico and the United States toward finding an abundant source of this now famous hormone.

The new ways of producing cortisone came as a climax to an unrestrained race involving several of the largest American pharmaceutical manufacturers, foreign drug houses, and three foreign governments.

Cortisone is now used in the treatment of rheumatoid arthritis, rheumatic fever, gout, asthma, ulcerative colitis, iritis, bad burns, and some of the fatal skin diseases.

Plans Are Made For Ag Hill Party

Plans for the Ag Hill party, important Ag Hill social event each year, were discussed at the first meeting of the Ag student council Monday night.

Wallie Butz was named student committee chairman, and Paul Margolf faculty chairman.

The party, to be held Nov. 3, will consist of square dancing, bingo, and presentation of awards and scholarships totaling over \$4000.

The student council will meet again Tuesday at 7 p.m. in 103 Agriculture Building. After the council meeting the Ag Hill party committee will meet.

Aid to Students Is Explained In New Booklet

Detailed information on student aid available at the College is contained in a new booklet published this month.

Samuel K. Hostetter, controller, explains that this booklet was planned to acquaint advisors, deans, department heads, and the students with the various kinds of financial aid that are available in the form of scholarships, awards, student loan funds, and part-time student employment.

The publication lists all scholarships and loan funds and the restrictions that apply to each. It also includes information on the qualifications and instructions on how to apply for them.

Many scholarships are limited to students in a specific curriculum or school, to students having a high scholastic average or in a specific class, or to students who are residents of a specific area of Pennsylvania or of another state.

Copies of this booklet have been sent to the deans of each school for distribution to department heads and advisors.

Chilean Educators Visit College Today

Senora Mercedes Castro de La Torre, home economist, and her husband, Dr. Gonzalo La Torre, elementary education leader, will visit the College today, tomorrow, and Saturday. Both are attached to the Ministry of Education in Chile.

The School of Home Economics has arranged a coffee hour at the living center at 9:30 a.m. today to welcome the couple.

Mineral Industries Gets \$1500 Fund

A \$1500 scholarship fund was given to the Mineral Industries school at the College by E. W. Rugh, a 1929 graduate of the College, and now with the Garfield Refractories Co., Bolivar. The fund, which will be for the current year, will be made available to undergraduates, graduate students, or faculty members.

Under the terms of the gift, the school may use the money any way it sees fit to promote scholarship and research in mineral industries.
