

USNSA Will Meet In Brazil

The United States National Student Association will represent American students at the Inter-American Student Congress from Nov. 3 to 10 in Rio de Janeiro, Brazil.

The decision to send an American delegation to the Congress was made at the College this weekend at a meeting of the national interim committee of USNSA which checks the group's policies.

Members of the committee include Robert Murphy, chairman, William Dewey, Robert Ferguson, James Murphy, Leonard Wilcox, and William Dentzer.

Sponsored by the Uniao Nacional Dos Estudantes (National Union of Students of Brazil), the Congress is for the unions of students of all the American countries.

Four Delegates

The USNSA is a national federation of college and university student governments which serves as American students' voice in national and international affairs.

Included in the United States delegation are Dentzer, USNSA president from Rochester, Pa.; Avrea Ingram, USNSA vice president of international affairs, and Helen Rogers, past executive secretary of USNSA. Another delegate is yet to be chosen.

The Brazilian conference will be the first international student congress held in this hemisphere. To facilitate the growth of mutual understanding among students and ideas will be the aim of the congress.

Five Commissions

All of the unions in the Western Hemisphere have been invited to the Congress, and the USNSA expects most to accept. The President of the Republic of Brazil and other national leaders will visit the meeting.

The five commissions will discuss student social conditions, economic conditions, improvement of courses and teaching, exchange of students and ideas, and the common role of all students in preserving democracy and independence.

Knipe to Show Film

Fred Knipe, agricultural engineer with the Rockefeller Foundation, will show a film, "Mosquito Eradication in Sardinia," at the Bioforum meeting at 4:15 today in 214 Frear Laboratory.

300 Attend IE Conference

The fourth Conference of Industrial Education attracted approximately 300 delegates to its session at the College Saturday. The theme this year was "The Place of Industrial Education in Meeting the Needs of the 60 Per Cent Group."

Dr. Lewis S. Land, head of the Vocational Education department at the College, was chairman of the conference. Dr. Land explained that of all high school graduates, 20 per cent go to college, 20 per cent go to vocational schools, and 60 per cent do not get any training after high school.

Dr. Land said that "keen interest was displayed by those attending to work towards changes in the secondary school curriculum to meet the needs of youth."

Marion Trabue, dean of the School of Education, addressed the opening session Saturday morning. The general meeting was followed by two sectional meetings, devoted to the needs of industrial arts teachers and vocational industrial directors and teachers.

Summaries of the sectional meetings were given at the luncheon at the First Presbyterian Church.

WSGA, WRA —

(Continued from page one)

Malloy, Beverly Morgan and Margaret Troutman are candidates for WRA sophomore representative.

In the primaries last spring, 79 percent of the total enrollment of women students voted, with 100 percent voting in Woman's Building, MacAllister, and the three home management houses.

Satchell to Speak

Dr. Donald P. Satchell, assistant professor of agronomy, will speak to the Clover Club at 7:15 tonight in 111 Plant Industries, about his work with radioactive isotopes in plant raising. Refreshments will be served.

16 New Members Join Debate Team

The sixteen upperclasswomen selected yesterday from 45 debate squad candidates will meet with the team at 7 tonight in 2 Sparks.

The new members are Marilyn Cohn, Barbara Cole, Harriet Garfinkel, Susan Holtzinger, Marjorie Kahn, Mary Jane Kelley, Sally Lowry, Lorraine Mondrick, Nancy Nelson, Agnes Porter, Sihrey Restau, Margaret Troutman, Emilie Tyler, Marian Venzlauskas, Ellen Wescott, and Carolyn Zimmerman.

The women's team now numbers about 50, according to Lois Pulver, manager. This includes the freshman squad, which will meet at 7 p.m. tomorrow in 2 Sparks.

No more places will be open on the squad until next semester.

College, Inquirer Co-Sponsor Show

An exhibit demonstrating atomic energy from the basic concept of radioactivity down to the effects of an atomic explosion will open at the Franklin Institute in Philadelphia on Oct. 31 under the sponsorship of the Philadelphia Inquirer and the College.

The exhibit, created by the American Museum of Atomic Energy at Oak Ridge, Tenn., is made available through the National University Extension Association.

Answers to such questions as how uranium 235, the basic bomb material is extracted, how plutonium is made and extracted, what an isotope is, and how it is manufactured and used in medicine, industry, and agriculture will be provided by the exhibit.

The exhibit will continue until Nov. 7.

Research Club to Hold First Meeting Tonight

The Graduate Faculty Research Club, a new organization at the College, will hold its first meeting at 8 tonight in the Home Economics Living Center. Dr. E. K. Schilling, dean of the Graduate school, will preside at the meeting.

Dr. P. F. English, professor of wildlife management and acting head of the Department of Zoology and Entomology, will address the group on "The History and Development of Wildlife Management." The program will also include the election of officers, a discussion period, and refreshments.

Dr. F. R. Matson, professor of ceramics, who made the arrangements for the meeting, said that all members of the Graduate school faculty are invited to join the club. Dues will be \$1 per semester.

Campus Interviews on Cigarette Tests

No. 25
THE
SEA
HORSE

This little gee-gee was all at sea. It was enough to upset his equine-imity. He'd been reading about those rush-rush cigarette tests — the quick sniff, the fast puff. "Hardly the scientific approach," he said in his confusion. But then he realized that one test is an equine of a different pigmentation—a thorough, conclusive test of cigarette mildness.

It's the sensible test... the 30-Day Camel Mildness Test, which simply asks you to try Camels as your steady smoke—on a day-after-day basis. No snap judgments! Once you've tried Camels for 30 days in your "T-Zone" (T for Throat, T for Taste), you'll see why...

After all the Mildness Tests,

Camel leads all other brands by billions
