

Spartans' Streak of Ten Goes on Line Saturday

Veteran MSC Team Battles for Lead In National Race

When Penn State takes the field against Michigan State tomorrow afternoon, the Nittany Lions will be up against a football team that hasn't been beaten in ten straight ball games. The Spartans' last defeat came at the hands of Maryland, 34-7, last October.

With 25 lettermen back from a team which won eight games and lost only one, Coach Biggie Munn's squad is currently battling powerful California and Tennessee for number one rating in the country.

With four wins already in the record books, Michigan State fans are looking to this season as the one which will see the Spartans finish undefeated—something which has evaded the Spartans since 1913.

Four Wins

So far this season, Munn's powerful offensive squad has posted wins over Oregon State, 6-0; Michigan, 25-0; Ohio State, 24-20; and Marquette, 20-14.

Although Oregon State, Ohio State, and Marquette gave the Spartans a rough time before bowing in defeat, Munn's grid-ers proved themselves a second half ball team which can really roll when the chips are down late in the game.

Against Marquette last weekend, the Spartans had to come through with two touchdowns in the last quarter to turn back the Hilltoppers, 20-14.

Two All-American Candidates

Munn has a strong offensive aggregation built around right halfback Vince Pisano, a former New Kensington High School star; end Bob Carey, an All-American candidate; tackle Don Coleman, another All-American candidate, and quarterback Al Dorow, the Spartans' passer.

Pisano was Michigan State's third leading ground gainer last season. Carey, whose twin brother Bill plays at the other offensive post, is almost a sure pick for

Spartan Captain

BOB CAREY

All-American honors this fall. The six-foot, five-inch, 215 pound end is also Big Ten shotput champion and a star basketball player for the Spartans.

Coleman, another pre-season choice for All-American honors, is described by Lion Assistant Coach Al Michaels as "one of the best line blockers in the country." The fastest lineman on the team, Coleman packs only 185 pounds over his five-foot ten-inch frame.

Dorow plays both on the of- (Continued on page seven)

Dorm 4 Edges 36 in Overtime IM Grid Battle

By JIM PETERS

In the opening game of last night's intramural schedule, Dorm 4 edged Dorm 36 in an overtime battle, 7-6. Dorm 4 had advanced the ball to the 48 yard line of Dorm 36 when the six overtime plays were completed.

A spectacular catch by George Waltz on an 11-yard pass from James Phillips gave Theta Chi a 7-0 victory over Pi Lambda Phi. The drive for the touchdown covered 73 yards.

Phillips passed to Lloyd Dietrich for the extra point. Pi Lambda Phi had threatened in the first half by driving to the Theta Chi 6-yard line, but here the drive was stopped.

A beautiful one-handed catch by Donald Civitelli of a 13-yard pass thrown by Ronald Faust brought the 39'ers from the brink of defeat to a 1-0 overtime win over McKee Hall.

Pi Kappa Alpha rolled to a 19-0 victory over Phi Sigma Kappa in the final game of the night. Walter Saxe, Dick Schaefer, and Arthur Obert scored touchdowns for the winners with Schaefer scoring the extra point on a pass from William Harral.

Lion Soccermen Play At Navy Tomorrow

Penn State's soccer team will make its fourth straight visit to Annapolis when the Lions clash with the Middies tomorrow.

The match is set for 2 p.m.

State has paid an annual visit to Annapolis since 1948, losing that contest, 4-0. Penn State came out on top the following season, 3-0 and Coach Bill Jeffrey's teams also grabbed the next two tilts in 1949 and 1950, 3-0 and 1-0.

'Green Teams'

Both clubs will be fielding relatively green clubs this year. The Nittany Lions have only four first-team men from last year's aggregation, Navy also is in the process of rebuilding as it has lost eight starters from last year's club which ended with a 6-4 log. All of Navy's losses were by a one-goal margin. Besides the State loss, the Midshipmen also dropped games to Yale, Swarthmore, and Army.

Several new men will make the trip to Annapolis, as Jeffrey was far from impressed by last week's performance against Army. State displayed a mediocre calibre of ball and some radical changes might be the order of the day.

Pinezich Ready

State hopes for a victory received a shot in the arm yesterday, however, when it was learned that Jack Pinezich will probably be ready for Navy. Pinezich, Penn State's regular in-

side right man and a good ball handler, pulled a back muscle in the Army fray. Another Lion casualty, right halfback Frank Follmer, will also be available. Follmer suffered a severe head cut against Army.

Leading Navy will be Captain Gordie Jayne, outside left, who also played against the Lions last year. Jayne tallied twice last week in a losing cause against Princeton as the Middies dropped a 5-3 overtime decision.

The U.S. Navy has found that a salt-water spray system is one way to protect men and ships from atomic radiation.

EAST MEETS WEST IN NEW RELAY EVENT

You've heard of the Penn Relays. But have you ever heard of a relay where the hurdles are mountains, the average stride is thirty miles, and the track stretches coast to coast?

It's the Bell System's *Radio-Relay* and it brings East and West together in one of the most important events in the history of communications.

Telephone construction crews have just recently completed the coast-to-coast *Radio-Relay* system. Today, Long Distance calls ride on radio microwaves, beamed through the air from tower to tower. And, for the first time, television programs have been flashed from coast to coast.

The new system supplements the thousands of miles of wire cable that already tie the nation together. It helps make America's vast communications network even stronger and more flexible. And it could hardly happen at a better time. The demands of defense are heavy and urgent.

HOW Radio-Relay WORKS. Microwaves travel in a straight line. So relay towers are usually built on hilltops and spaced about thirty miles apart. Just as a runner picks up the baton from another runner, so each tower picks up microwaves from its neighbor, and with complex electronic equipment amplifies and focuses them like a searchlight, then beams them accurately at the next tower. And hundreds of Long Distance calls ride the beam at the same time.
