Parking Conditions Are Easing up

The announcement that better than 375 student parking spaces have been completed or will be completed in the near future is good news for student drivers who have been forced to scurry about looking for someplace to park their cars.

The two additional parking places will ease the problem, but they certainly will not solve it. For that reason additional parking space is needed urgently. How much space is needed is the crucial question.

Before the College Board of Trustees can approve expenditures for additional parking space they must have exact and accurate figures on just how much space is needed. For that reason a poll was conducted earlier in the year to find out how many student, faculty and staff members use their cars on campus and how often.

A great many students failed to cooperate in the student end of the poll, being under the impression that the poll was being conducted as a means of checking those students who drive on campus.

In an effort to obtain correct estimates of the number of student cars on campus, All-College Cabinet has authorized a student-conducted poll. The poll is not for regulatory purposes, but is rather to gather information with which the need for additional parking space may be justified.

The cooperation of all student drivers is needed if this poll is to be a success, if additional parking areas are to be made available.

Ring Era Ended With Loss of Louis

Friday night we sat by our radio and heard the final chapter of a great American era in the squared circle. Rocky Marciano knocked out Joe Louis, the former heavyweight champion of the world in the eighth round of a scheduled ten round match.

The husky Negro from Detroit had deadpanned his way to the most cherished crown in all ring history in 1937 and from there held an iron hand over all the big boys for over 11 years, defending his title more than 30 times before "retiring" in 1949.

But old Joe couldn't keep away from the big crowds—many say he was broke and had to fight in order to pay his debts—and the familiar blood-calls of the smoke-filled arenas.

After his retirement, Joe watched Walcott and Charles, two scrappers, but still mediocre heavies, battle for his old crown. Soon after, he returned to the ring and fight fans could see that the blast was gone from his short jabs and the power was gone from the very familiar hooks.

His opponents were not the big names in the game any longer. He fought exhibitions and occasional ten-rounders.

Although many will claim the Louis era came to an end long ago, we feel that Friday night brought the old "Brown Bomber" to the end of the line. When we hear his name mentioned now we'll be like the typical old timers and say, "Yes, we remember him—a great fighter, one of the best, and a real American."

—Bob Fraser

Key Game

The football team will play one of its most important games of the season when it travels to Lafayette, Ind. tonight to battle Purdue Saturday.

The Boilermakers have an unimpressive one and four record but are in the Big Ten, enough to mark any team as better-than-average. The Boilermakers also have one of the best passers in the Midwest in junior-quarterback Dale Samuels. State's pass defense, which has been shoddy this season, will be given another stern test by Samuels.

If Coach Rip Engle's team can jump this barrier they should go through the rest of the campaign undefeated. A decisive victory for the Lions would probably give them the needed encouragement to face the remaining schedule of Rutgers, Syracuse, and Pitt. Thus, with a lift Saturday, the Nittanyans could compile a 7-2 mark, the best grid record since 1948.

—Dave Colton

Middle East Bases, Oil Are Not Lost

The biggest threat to the Atlantic pact countries today is not direct attack by Russia but the inability of NATO countries to consolidate the Middle East. The eruption of a fierce nationalism in Egypt has already started talks of other Middle East nations throwing off the colonial yoke.

Sympathy for the Egyptians was expressed from Morocco to Indonesia. However, the falling out of the West and the Middle East is not as complete as Russia would like to have it.

While the Anglo-Egyptian relations are exceedingly tense at the moment, there may be a compromise available that will satisfy all. Seven western powers, including Britain, the U.S., France, Turkey, New Zealand, Australia, and the Union of South Africa, are going ahead on a Middle Eastern defense plan. All the Arab countries and Israel will continue to be informed of the proceedings.

Furthermore, so far as can be ascertained, there are Arab countries which hope for such a defensive link with the West. Among them are Saudi Arabia, Lebanon, and Iraq. Neither Syria or Jordan are entirely opposed to the plan.

If the grim situation in Egypt can be ironed out without antagonizing the entire Moslem world, the West will win not only rich oil lands but invaluable military bases along the Mediterranean.

—Len Kolasinski

Safety Valve—

Fly Trouble at Dinner

TO THE EDITOR: Down Nittany way we have the usual troubles and gripes about the food service, but every once-in-awhile we find something really wrong. Now it's the fly!

The dear fellow has invaded the cafeteria and takes particular delight in munching on someone's salad or dancing daintily from plate to plate. Now the fly isn't really a bad fellow at heart. It's just that his daily itinerary usually includes breakfast at the dairy barns, luncheon at the sewage disposal plant, a cleansing bath in someone's spittle, and then . . . oh yes . . . dinner at Nittany Commons. Since the fly is a friendly fellow, he usually associates with typhoid, dysentery, and other friendly germs.

This is a dangerous situation and while flies are a local bother, hasn't the Food Department heard of D.D.T. bombs?

—Lewis N. Goslin

Get Off the News Pages!

TO THE EDITOR: We, the members of Nittany Dorm 44, passed the following resolution in our meeting of October 16.

We recognize the fine caliber of work done on the Daily Collegian by its editor, Marv Krasnansky. While being thrilled by his daring exploits in the field of journalism we are also desirous of reading about the other world-shaking events, collegiate and national. Therefore, we suggest that more space be allotted to these aforementioned events. This idealistic state of journalism could be reached by limiting the appearance of The Daily Collegian's illustrious editor's name to five times in each issue.

—Roger Lowen

Little Man On Campus

By Bibler

"Oh by the way, I just got your papers graded last week— If I could just think to bring them."

Poor Man's Paradise

By PAUL POORMAN

A recently-announced government project is being undertaken to investigate another source of bewilderment to an already confused democracy—love. Yes, true enough, the government is subsidizing a research project headed by a 40-year-old Northwestern University professor to try and discover why men and women fall in love and why they choose the mates they do.

Young people who had previously doubted that anybody besides themselves understood their feelings were probably right, but all that is going to be changed. If nobody else cares, the government is enough concerned about the problem of who falls for whom to set aside \$12,000 for research.

The university professor, who incidentally is himself married, will take up the torch of love and bear it untiringly backward in quest of its source.

An article in the Pittsburgh Post-Gazette wonders if the professor is puzzled by his own marriage. Speaking from our own inexperienced viewpoint, we'd say that the professor is just lapsing into the state all men find themselves in once in a while. He's probably wondering, in unison with millions of others, just whatever made him fall in love with THIS woman, or what he ever saw in her. He's either thinking along those lines, or along \$12,000 lines.

The mechanics of the system are not explained, but from former government ventures into science, we assume they will be coldly objective and horribly scientific. It doesn't take much to imagine production wheeling in to full swing behind the project, a la A-Bomb style. And the re-

sults could be more earth-shaking.

Where the A-Bomb may merely kill thousands at one blast, the love exploration may disrupt the entire cycle of life, and lead to mass suicide that would make atomic killings seem infinitesimal. For it is an established maxim that if you take away everything a man has to live for, man does not live. And life without love is life without living, from our inexperienced viewpoint.

To say that the causes of love would not be of interest to everyone would be a careless fallacy. But say we go ahead and actually determine the basic germ of the disease. Let's stop a minute and consider: After we've got it, what do we have? Will we have the objective assortment of facts that brought the downfall of kissing? Science said that kissing was unsanitary, so everyone stopped kissing. If love was proven unhealthy, would everyone stop loving?

If the government and the professor want to dabble in things over their heads, all right. But keep the findings secret. After all, when you're young, you don't really care what causes the damn stuff; you're just glad something does. When you hit forty, that's time enough to stop and investigate. Right now, who cares?

COLLEGE PLACEMENT

Aluminum Company of America will interview January graduates in M.E., I.E., C.E., E.E., Chem. Eng., Metal, A&L, C&F, and A&C, Monday, Nov. 12.

General Electric company will interview January graduates and M.S. candidates who will receive their degrees in 1952, in Chem., Chem. Eng., and Metal, Friday, Nov. 9.

Allegheny Ludlum Steel Corp. will interview January graduates in E.E., M.E., I.E. and Metal Thursday, November 8.

Carbide and Carbon Chemical Co. will visit the campus Thursday, November 8, to interview January graduates in Chem., M.E., Ch.E., E.E., and I.E.

International Latex Corp. will interview January graduates and M.S. candidates in M.E., and I.E. Wednesday, November 7.

Penn Mutual Life Insurance Co. will interview January graduates in A&L and C&F Friday, November 9.

Standard Oil Development Co. will interview January graduates in E.E., Ch.E., M.E., C.E., and I.E. Friday, November 9.

Pittsburgh Consolidation Coal Co. will interview 1952 M.S. and Ph.D. candidates, and January graduates in Chem., Com. Chem., Ch.E., and Science Monday, November 12.

Procter and Gamble Manufacturing Co. will interview January graduates in C.E., E.E., I.E., M.E., S.E., Ch.E., Chem. and Metal, Monday, November 12. They will interview M.S. candidates in C.E. and Ch.E. also.

Boeing Airplane Co. will interview January graduates in Aero. E., C.E., E.E., I.E., M.E. and M.S. and Ph.D. candidates in Phys. and Math, Monday, November 12.

Factory Mutual Engineering Division will interview January graduates in Ch.E., Phys., Aero. E., Arch.E., C.E., E.E., I.E., M.E., S.E., Min.E., and Arch. Tuesday, November 13.

STUDENT EMPLOYMENT

Man to set pins for bowling league.

Piano player for Wednesday, Friday, and Saturday nights.

Graduate Student in Chemistry or Chemical Engineering for special project.

Man to work two hours every morning Monday through Friday as a messenger.

Woman for full time store work.
