

# Dimes Fund Seeks Student Contribution

By TAMMIE BLOOM

Students at the College are being solicited for individual contributions to the March of Dimes. The drive for funds is being conducted by the Centre County Chapter of the Infantile Paralysis Foundation.

Edward F. Ormsby, professor of mathematics, and publicity director for the local March of Dimes chapter, has appealed to the students to support the drive.

## Advertising Test To Be Given In Philadelphia

The annual AAAA examination for advertising will be given in Philadelphia at the Bellevue Stratford Hotel Feb. 16, the Atlantic Chapter of the American Association of Advertising Agencies announced yesterday.

The examination is given to provide guidance for young persons considering careers in advertising.

In the session scheduled for Feb. 16, 15 aptitude-temperament tests will be given to determine whether the individual has the necessary abilities for the advertising field. There will also be a test on the economics of advertising based on a booklet provided by the AAAA.

The tests are compiled and analyzed by the Personnel Laboratory of New York, who are specialists in the testing of advertising personnel. A fee of \$20 will be charged to cover part of the cost of preparing and processing the tests.

Persons interested in the tests may obtain information and application blanks from AAAA Examination Committee, c/o the Aitkin-Kynett Co., 1400 S. Penn Square, Philadelphia 2, Pa.

## Phi Kappa Sigma Brotherizes Allsop

Peter Allsop, an English student doing graduate work in mining engineering at the College, was made a brother of Phi Kappa Sigma fraternity this week.

Allsop is a graduate of Chelfield University, England, where he studied mining from 1945 to 1948. After his studies there, Allsop worked as a miner and a mining official in England.

The British government is sponsoring Allsop's studies here as part of the Economic Cooperation Administration plans for the transfer of foreign and American students.

After the end of the semester, Allsop will tour mining construction and management companies in the United States. When he returns to England he will work in mining management.

## Small Town Is Subject Of Radio Program

The radio program, "The People Act", to be broadcast at 10:15 p.m. tomorrow on CBS, will have as its subject Blairsville, Georgia.

Blairsville, a town of 350, is located on the Georgia-North Carolina border. The story is of a community in an isolated area, remade by average men, and its relationship to the outside world through the discovery of leadership.

State College is the main office for the network program, which was inaugurated Jan. 6.

## Reception Ushers Needed for Jan. 29

Volunteer ushers for President Milton S. Eisenhower's reception for the graduating seniors have been asked to leave their names and phone numbers at the Student Union desk in Old Main.

Hatman or other interested students who plan to stay in State College between semesters were asked to volunteer by Sally Shoemaker, senior class secretary treasurer. Miss Shoemaker requested that information be left in her name at the SU.

"Many of the students do not realize that they may benefit directly from the Centre County protection against polio," Ormsby stated. "Since the last census, in which students are listed as residents of college towns, the chapter has felt an added responsibility to men and women enrolled at the College," he added.

### Stricken by Polio

Among the many examples of students who have been aided by local funds, Ormsby cited as most outstanding the case of Douglas Schultz, who now resides in Princeton, N.J., and is employed by Princeton University.

In 1945, while Schultz and his wife were both enrolled at the College, as candidates for their Ph.D. degrees, the young man was stricken by polio. He was completely paralyzed below the neck and was placed in an iron lung.

When the case had been diagnosed, the county infantile paralysis chapter was contacted, and Schultz was provided with seven weeks hospitalization at Geisinger Hospital, Danville, Pa. Due to congestion at the hospital, the patient had to be moved to Warm Springs, Georgia, for further treatment.

### University Offers Job

Mrs. Balsler Weber, Bellefonte, chairman of the county chapter, made arrangements for transportation by train and plane to Atlanta, Ga. In Warm Springs, the couple was given a small cottage, where they lived for two years. During that time their only source of income was the \$45 per month which Mrs. Schultz received from a teaching position in a rural school.

When, at the end of two years, Schultz had received all possible help from doctors and therapists at Warm Springs, Princeton University offered him a position, plus a small house on campus and financial means to get started. Since transportation was not provided, Mrs. Weber wrote to the Chevrolet manufacturing company in Detroit, and obtained, free of charge, a new automobile.

Although his wife died from cancer a few years ago, Schultz continues to live at Princeton. Each year he makes large contributions to the March of Dimes fund in State College.

Within the past five years, the local polio foundation has arranged for a total of twenty scholarships at the College for students who take courses closely related to physical therapy.

## Debaters to Hold Candidate Meeting

A preliminary meeting for candidates who wish to try out for the women's debate squad will be held at 6:30 p.m. Feb. 5, in 2 Sparks, according to Marian Ungar, new women's debate manager.

Miss Ungar also stated that Guyla Woodward, Peggy Crooks, Susan Holtzinger, and Sarah Laurie will travel to Slippery Rock State Teachers College over semester vacation to participate in a debate tournament to be held at the school.

Fourteen teams from Ohio, Pennsylvania, and New York will debate the question, Resolved, That the federal government should adopt a permanent program of wage and price control.

## Graduate Student Wins Chemistry Fellowship

Legrand Van Uitert, a graduate student in chemistry, has been named the recipient of the chemistry fellowship established at the College by the Union Carbide and Carbon Corp., according to Dr. W. Conard Fernelius, head of the Department of Chemistry.

## Xmas Cards To Provide Busy Hours

Because of a project conducted by a group of students last week, many children who are confined in hospitals in Pennsylvania will be kept busy and happy during their convalescence.

A class in public relations taught by R. H. Wheery of the Economics department asked students and faculty for used Christmas cards which will be sent to hospitals for physical therapy work with children.

Approximately 135,000 cards were received by yesterday, according to Mrs. Jean Schultz, honorary chairman of the group. The group is named the Christmas Card Club.

The students of the class, Commerce 470, placed deposit boxes at the State College Commerce Club office and at the WMAJ studio. In addition, the men made about 100 calls to homes after housewives had telephoned the Economics office that they wished to participate, and many cards were left at the economics office.

Mrs. Schultz expressed appreciation to all who helped to make the drive a success.

## Four Appointed Air Lieutenants

Four Air ROTC seniors have been selected for appointment as second lieutenants in the regular Air Force, Lt. Col. Jack W. Dietterle, professor of air science and tactics, announced yesterday.

The appointments, which are subject to Presidential nomination and Senate confirmation, are awarded to Distinguished Military Students. They would become effective after the students have completed the advanced Air ROTC program and been conferred their bachelor degrees.

Students selected are John Frantz, Raymond Gomez, Robert Matasick, and Elliott Smith.

## Penn State Club To Seek Talent

The search for talent for the Penn State Club's 12th annual talent show, scheduled for Feb. 22 at Schwab Auditorium, will begin next semester, club officials announced.

Arnold Gasche, talent show chairman, said students interested in auditioning for the show may fill out application blanks at the Student Union desk in Old Main from Feb. 4 to 8. Auditions will be 6:30 to 9 p.m., Feb. 8, in Schwab; and 2 to 4 p.m., Feb. 9, in the Little Theater.

Freshmen as well as upperclassmen may audition for the show. Three cash prizes of \$25, \$15, and \$10 will be awarded to the winners.

# Grad Engineering Positions Now Open

Graduate assistantships, research assistantships, and fellowships in engineering, are now available.

Applicants must possess a 1.5 grade point average for their last two semesters, and hold a Bachelor of Science degree or be in the process of completing the final semester's work for this degree, according to Earl B. Stavelly, assistant dean of the School of Engineering.

Three types of graduate assistantships, quarter, half, and three-quarter time, are available with stipends varying from \$510 to \$2016, and allowable credits ranging from 16 to 34 according to the amount of service required. Holder of both assistantships and fellowships are, in general, exempt from the incidental fee, the general fixed fee, and the out-of-state tuition fee.

The salary of research assistantships depends upon qualifications of the candidate and the nature of the research project. Six credits of graduate work may be carried per semester with permission of the head of the major department.

**Engineering Fellowships Open**  
Fellowships offered are the Hamilton-Standard, Naval Ordnance research, and the W. S. Elliot fellowship.

Three fellowships are available each year under the Hamilton-Standard fellowships for graduates in aeronautical, electrical, or mechanical engineering with a stipend of \$1200 per year for a ten month academic year. Fifteen credits of work may be carried per semester. The Hamilton-Standard Co. expects the holder of the fellowship to accept employment with them for a period of not less than one year at the completion of his studies.

**Elliot Fellowship Available**

Four fellowships are available each year under the Naval Ordnance research fellowships for graduates of engineering or physics with a stipend of \$1260 for a ten month academic year for a single person and \$1860 for a married person for the same period of time. The research program is to be carried out in electronics, mathematics, hydrodynamics, mechanics, or acoustics, and must be of interest to the donor.

The W. S. Elliot fellowship is open to graduates of engineering for carrying on work in the general field of engineering research with a variable stipend depending on the amount of money accumulated from the interest on the Elliot fund.

Dean Stavelly said applications for these fellowships should be made directly to him or, in the case of graduate assistantships, to the head of the major department.

## Med Tests Scheduled For May 10

Candidates for admission to medical schools in the fall of 1953 included in the Association of American Medical Colleges are advised to take the medical college admission test May 10, 1952 in one of the more than 300 local centers throughout the country, according to J. E. Terral of the Educational Testing Service.

Candidates taking the May test will be able to furnish scores to institutions in early fall, when many medical colleges begin the selection of their next entering class, Terral said.

The second of the two tests, required of applicants by a number of medical colleges throughout the country, is scheduled for Nov. 3.

Application forms and a bulletin of information, which gives details of registration and administration, as well as sample questions, are available from pre-medical advisers or directly from Educational Testing Service, Box 592, Princeton, N.J. Completed applications must reach the ETS office by April 26 and Oct. 20, respectively, for the May 10 and Nov. 3 tests.

## Bell Forum Talk Changed to April

The Community Forum lecture by Dr. Bernard Iddings Bell, noted consultant on education, originally scheduled for Feb. 14, has been re-scheduled for April 29, at his request, according to Lynn Christy, forum program chairman.

Dr. Bell, who is the author of 18 books, including "God is Not Dead," "Crisis in Education," and "Beyond Agnosticism," was to have been the fourth forum speaker.

The next scheduled lecture will be that of Kurt von Schuchnigg, former Austrian chancellor, on March 25.
