Students To Cheer Cagers Via Radio

Penn State's basketball team will leave from Altoona this morning for Raleigh, North Caro-lina and the National Collegiate Athletic Association's tournament.

The Lions will be faced with their toughest assignment of the year: a great Kentucky team which has won 28 games while losing but two all season. The Lions will have to be at their best if they are to tame the perenially strong Wildcats.

Kentucky has height, speed, and the confidence it takes to make a winning combination. The Wildcats record and reputation are enough to beat many opponents before the starting whistle sounds.

We will not venture to make any predictions on the outcome of this game. We are certain, however, that Coach Elmer Gross and the team will make a good showing, and will do credit to the College.

Raleigh is more than 400 miles from State College, but the hearts and minds of the student body will be down South with the team, and 20,000 ears will be "glued" to radios.

Foreign Aid Bill Should Be Passed

President Harry S. Truman recently urged Congress to adopt in full his program for foreign aid. Congress is now facing a challenging job either to approve or curtail Truman's \$7,900,000,000 foreign aid program.

The President was acting on three major premises. To begin with, he is considering the fact that Russia has intentions to try to dominate the world. Secondly, the balance between a free and slave world lies in the carrying out of a mutual foreign aid program. Finally, the amount he has recommended is what is needed to carry out the important job facing the United States.

Russia's recent actions leave the free world with nothing but a doubtful outlook. Likewise, our foreign aid program thus far indicates that we must continue it. Whether the recommended amount of money is too much or not enough is a controversial point.

We hear many persons expounding the belief

that we are spending ourselves into trouble. But the fact remains, as we have learned from past wars, economic insecurity abroad has been much of our trouble. Part of the job of international security lies in the building up economically insecure nations. Truman's plan includes economic aid for the Near East and Africa, Asia, and the general Pacific areas. These are vital areas where we must be strong.

Although this is an election year, Congress should definitely come to its senses and pass an appropriate piece of legislation which may effect the future security of the United States as well as the entire world.

If you do little things, they only print your fingers."—"Bugs" Baer

Israel Fund Needs Student Support

The United Jewish Appeal opened its student campaign for \$4200 last Sunday in an effort to play a part in the continuation of rebuilding

UJA in the 13 years of its existence has been devoted to saving and building lives. It has fed, cared for, and educated more than 1,000,000 distressed men, women, and children since the end of World War II. It has also helped nearly 900,000 refugees reach free lands, including Israel and the United States.

This year's national goal of \$151,500,000 will go toward further assisting the 700,000 immigrants in Israel, who got there with the assistance of the UJA. However, the job is not complete. Along with the building of thousands of new housing units, settlements, and industries, development in Israel sorve as proof of what. developments in Israel serve as proof of what the UJA can do, and must do, to continue this help to a growing nation.

The appeal campaign is run independent of the Campus Chest because it is an appeal to a particular group of persons. Members of the Hillel Foundation are soliciting money for the drive which closes Sunday.

We will consider it a real accomplishment if the goal is reached. Israel's people are still fighting for their independence—an economic independence this time—and it is our duty to help them win this fight.

Israel is an example of one of the many nations in the world that is in dire need of constant and capable assistance. We should feel indebted to provide some of that assist-

"Worthal, I can't understand why you flunked this test—it's the same one I've given for the last four years."

'Mr. X' Flunks Detector Test as Morse Howls

WASHINGTON—(P)—Senator Morse (R-Ore.) said recently the Defense Department had notified him it had stopped using liedetector tests on job applicants.

He told the Senate the practice was ended after he had protested to the Pentagon, and Defense Secretary Robert A. Lovett had made an investigation.

Morse denounced use of the polygraph machines as "repus-nant, foreign and outrageous."

He said other agencies besides the military also were using the tests. He said he was going to check on them, too, and that if they did not stop, he would introduce legislation designed to the hadn't already struck out."

used in determining whether a job applicant was a good security risk. But he said that at least one applicant described only as "Mr. X," had the "reaction that it was voluntary in name only." "He felt." the Senator said, "that if he didn't submit he would have one strike on him if, indeed, he hadn't already struck out."

eliminate them.

Morse said the Pentagon tests
were voluntary and apparently rejected for a job.

Man, Goose Share Cell

PITTSBURGH—(P)—A 9-year-old goose—of all things—spent a night in jail.

The goose and its master 56-year-old Ralph Hertzinger, were year-old Ralph Hertzinger, were day on a charge of conspiring to day on a charge of conspiring to commit burglary.

Det. C. W. Nanny said that Charles Cinnamon, 37, had installed 60 safes in markets, homes and business establishments and that there

Police officers thought it unsanitary that the men and the goose share the same cell and tried to take the bird away. The goose became enraged and started honking, waking up other prisoners. Police returned the goose to its master, who explained:

"He loves me, that's all. I raised him from an egg.

Hertzinger paid a \$10 fine on a disorderly conduct charge. Alder-man Martin Newell reserved his the first fireworks display on decision on a charge of cruelty to animals."

Safe Installer Opens 'em Too

WEST LOS ANGELES—(AP)-A man who, police say, got a job installing safes so he could burg-larize them later was in jail to-

that he:

1: Kept a copy of the safe com-

2. Made floor plans of the places where he installed safes. 3. Had duplicate keys made of the rooms in which the safes were

installed. Nanny said the case came to light when officers stopped a car

in which blueprints and safe combinations were found.

record. The event was during the 13th century.
