

Long Horse Contest To Open Gym Tryout

The tentative program set up for the Olympic gymnastic tryouts and NAAU championships to be held in Rec Hall April 25 and 26 shows only one final event scheduled for the opening session.

The men's long horse finals, including both compulsory and optional exercises, will open the two-day event at 2 p.m. Friday. Also scheduled for 2 p.m. are the women's compulsory calisthenics.

Competitors will participate only in compulsory exercises or preliminaries in the other gym events Friday afternoon and evening. The optional exercises and finals will be run off Saturday.

In the events in which there are not compulsory or optional exercises such as the rope climb, Indian clubs, trampoline, and tumbling, the participants will compete in preliminaries, moving to the finals on a point basis. Gymnasts competing in the events which have compulsory exercises will also be judged on a point basis with the highest scorers advancing to do their optional exercises.

Five judges will judge each individual as he goes through the exercises. Only three of the judges' votes will count, however, as the highest and lowest scores are discarded. The three remaining scores are totaled to give the performer his score in an event.

The top 20 scorers will com-

160 Wrestlers to Compete In Final Olympic Trials

AMES, Ia., April 16—(P)—With what coach Ray Swartz calls the "most powerful" team we've ever had on hand, the final Olympic wrestling trials begin here tomorrow.

From the champion-studded field of more than 160 well-muscled men will come the U.S. entry in the Olympics at Helsinki this summer.

The eight individual weight champions and an undetermined number of second-place winners will make up the team which goes against the world. The graying, barrel-chested Swartz will direct the American amateurs.

These trim, quick-footed gents are not to be confused with their professional counterparts who entertain television audiences every week.

Two sessions on four mats, starting at 2 p.m. and 8 p.m. (EST) are on tap tomorrow through Saturday. The championship finals will be Saturday night.

The Olympic wrestling rules will prevail with the much-discussed "quick" fall and the weird scoring formula determining the winner.

Under international standards,

It's time for
MILITARY INSIGNIA
Balfour's at the "A" Store

the moment both shoulders touch the mat at the same instant, a man is thrown. The "rolling" fall, however, no longer counts.

The odd Olympic scoring system provides a wrestler must win by fall to escape "penalty" points.

A loss, either by fall or decision, is three bad points. Five demerits and the competitor is eliminated.

The outstanding individual is bull-shouldered Henry Wittenberg, already a legend in American amateur wrestling.

injector shavers!

If you're not satisfied with the shaves you're getting, you owe it to your face to try

PAL HOLLOW GROUND INJECTOR BLADES

Does your face smart after shaving? Does lotion or even cold water sting? Perhaps you're not using the right blade! Usually blades are ground like a penknife. You have to "bear down" to shave clean. PAL's patented Hollow Ground process makes "bearing down" unnecessary. You shave with a light stroke, so easy on your face. No irritation, no burn, no smart. Your skin is left cool as a teen-ager's.

WE ASKED GRADUATES TEN YEARS OUT OF COLLEGE:

WHAT MADE YOU DECIDE ON A CAREER WITH GENERAL ELECTRIC?

This advertisement was written by G-E employees who graduated ten years ago—long enough to have gained perspective, but not too long to have forgotten the details of their coming with the Company. These graduates were sent a questionnaire and were requested to return it unsigned. Their answers, listed below in order of mentions, give an informative appraisal of G.E. as a place to work and as a source of career opportunities.

1. G-E TRAINING PROGRAMS

Sample quotes: "I knew that G.E. offered the best training courses." "Liked the idea of rotating assignments and courses." "Wanted to take advantage of the training courses." "G.E. had a training plan which would let me choose a job after reasonable time for investigating jobs available in the Company." "I felt that Test (Test Engineering Program) would make the easiest transition from school to work." "I felt that I would get the best kind of electrical engineering training if I went with G.E." "The Test course appealed to me because of its combination of continued technical instruction plus practical experience on the test floor."

2. VARIETY OF OPPORTUNITIES

"Why does a youngster run away with a circus?" "Believed it was a good chance to find the field I liked best as I wasn't quite sure what type of work I wanted to get into." "G.E. goes out of its way to find the corner you are happiest in and best suited for." "The varied opportunities of work let you change jobs without leaving the company." "Only company which offered a job where an engineer could be in on design, sales and appli-

cation—i.e., 'application engineering.'" "Promise of varied experience made it unnecessary to decide on a particular specialty until I had more opportunity to look the field over."

3. GENERAL ELECTRIC'S REPUTATION

"G.E.'s prestige and reputation appealed to me." "G.E. was more favorably disposed to the coming war effort and was doing work directly contributory." "High caliber persons with whom to work." "Reputation for technical excellence." "G.E.'s reputation as a good employer." "Because with the name of G.E. went a sense of security." "I felt that G.E. was the leader in the electrical field and I wanted to take part."

4. CONSIDERATE TREATMENT

"The only offer I received was from General Electric—other companies interviewed would not consider me because of my reserve officer status." "Among the companies offering jobs to college graduates in 1941, G.E. seemed to take more of a personal interest in its new men." "The G-E representatives made me feel they were interested in me."

For a free booklet, "Planning Your Career," a description of such G-E training programs as the Test Engineering Program, Business Training Course, Manufacturing Training Program, Chemical and Metallurgical Program, the Physics Program and Sales Training programs, write to General Electric Co., Dept. 221B-6, Schenectady, N. Y.
