Peace Hinges on Poverty Home Ec Audience Told

Peace will not be realized until the discontent with poverty and depression caused by a world shortage of food is eliminated, Gove Hambidge, regional representative of the Director General, Food and Agricultural Organization for North America, told an audience of approximately 800 in Schwab Auditorium yesterday afternoon.

Hambidge, principal speaker for the Home Economics Spring Weekend, said that depression is the outbreak of revolution and

wars.

The disparity between food and people can be shown by a population increase of 13 per cent, or 55,000 new mouths to

feed a day, and a food growth in-

crease of only nine per cent since the last war, he said.

but were unsuccessful:

The idea that it is now possible
