

Open House --

(Continued from page one)

will include an electronic weighing machine, and a light effect demonstration in the basement; a section-indicating machine, and a radio station set-up which will send Mothers Day greetings by wireless, on the main floor; and an electrically controlled car and wire recording and television exhibits, on the third floor.

Chemistry and physics students will help conduct the tours in the Chem-Phys School. Personally conducted tours will leave the Osmond lobby every 15 minutes to visit the chemistry and physics laboratories. Engineers will be stationed at the exhibits, to answer questions.

Some of the displays to be shown are the cryogenics exhibit in the basement of Pond laboratory where fruits and meats will be frozen and fried with liquid air; the magnetism and combustion of liquid oxygen; and the condensation of carbon dioxide with liquid air.

Another featured exhibit will be the electron microscope in 13 Osmond. Equipment for preparation of specimens, and photographic facilities for making electron micrographs, will be displayed.

A shock wave demonstration, showing effects similar to explosions, will be in 14 Osmond.

In 306 Osmond, a colloid exhibit will show substances which can be broken down into small particles and suspended in water.

Senior Class --

(Continued from page two)

named by cabinet to report on methods of equalizing the publicity in class gift campaigns of the future. Richard Lemyre, junior class president, was named chairman of the committee and was charged by cabinet with the selection of three sophomore or junior members of cabinet to complete the committee.

Cabinet also discussed Krasnansky's fourth proposal, that the All-College elections committee handle the counting of ballots for both the gift and class day honors, and that the results be made public. Craine, and David Olmsted, senior class president, questioned whether cabinet had the power to say who should count the ballots. However, cabinet passed the resolution that the elections committee count the ballots next year.

Krasnansky's fifth proposal, which was among those withdrawn pending committee action, suggested that the elections committee count the ballots this year. John Laubach, All-College president, proposed that the problem be committed to a constitutional committee, but the proposal was defeated.

Laubach also named Arthur Rosfeld and Edward Howell to the Penn State-in-China committee of cabinet.

The Freshman Dance committee reported to cabinet that over 600 couples attended the dance, and called the dance "successful."

Dance Concert Tonight

The final presentation of the Modern Dance Concert, "And So to the End" will be given at 8 tonight in White Hall. No more tickets are available for the concert, which is being given in conjunction with the Combined Arts Festival.
